

Topic: You are not a tree;
move on.

OUTLINE.

1. Introduction

Thesis Statement: Tragedies of life gives human a clunk of memories. These shocking experiences influence each and every sphere of mankind. However, human should learn from the experiences and try to move on with better opportunities, because, to live in those tragedies makes man a tree, which can not move forward in life.

2. Difference Between the very living nature: Human and Tree

3. Individual level

a) Man lives with his dark childhood memories

b) House wives stuck towards the patriarchal norms

c) Every individual learn some old values of culture

4. Societal level

a) Society is unable to accept gender

• roles

b) Misinterpreted religious values stops man to grow.

c) Society is unable to Uninterested to know their basic rights.

5.) State level

a) Periphery countries are stuck to get used as labor.

b) Ideological differences has more importance than needs.

c) Charities can not raise purchasing power of people.

6.) Political level

a) Politicians are using old same policies to confuse public.

b) Shaking or getting aids will not solve problems.

7.) Global level

a) Anarchic Structure. Indulge world into a balance of power vicious cycle.

b) Global law compromises freedom of countries.

c) Brain Drain gave a policy to keep capitalist down.

8.) Environmental level

a) Meeting conferences does not help.

- to solve earth from global warming.
- b) Carbon Market made development
to combat carbon emission
as here.

9.) Conclusion.

Tragedies of life gives human a chunk of memories. These shocking experiences influence each and every sphere of human life. However, human should not stay with those memories but he should learn from the past experiences and tried to move on. A girl live in the memories of her childhood. ~~When~~ when she treated as princess, she called by a good names she grows and face the realities of society where man is grabbed every role and field of society and the only thing to do, left for her is to stay home. At that time she has two options to stay what others decide for her a tree or to move forward for her about it will depend upon the what she experiences and how strong these experience affect her. Similarly, things in the world goes the same. If an individual keep on

Stay on old values of his culture than he will never move forward towards a better change. Mistake of Islam of religious practices and unawareness of basic rights made people to stuck in past. These basic strategies helps countries away from development and those who determined the world get all benefits. Any steps put forward for the move of betterment will be a game of powerful who want to keep down or keep freeze its competencies. Hence, Markets should learn from its experiences not also stay with them.

The Big Difference Between trees and human is movement. Both are the very living nature of earth. They share enormous of each other and help each other to survive in the planet. Though they have similarities but human are as far important and precious than that of trees, because of their abilities. Whatever, human experience in his whole life of his abilities or we forward and to learn from those experiences. But, in case of trees, they

experiences disastrous situations as well. I think they ~~than~~ not made on ~~and~~ died as the same position. Perhaps, there are some human and its ~~dear~~ which makes him to be like a tree. Throughout the life he made such beliefs, policies, institutions, which shield himself to the same position, even, he do not know as he ~~to~~ know how to get out from the problems he made. However, Maulana do not understand the appearance that how they are about a tree. They can move on with new beliefs, policies, and reforms institutions for the development of their life.

These norms and values of culture shield individuals as a tree, At every stage of life individual has to face various defined ideas of societies. Following are the viewpoint on this.

Firstly, Man lives with his date memories of childhood. These memories built his character according to what he experience in past. And, for any case if he does not able to maintain his emotions he moves towards the psychological

issues. This scenario is explained by Sigmund Freud's Psychoanalytical theory which explains that how childhood memories affect our thinking character of human and bad experiences of past made him to smile on past. Hence, man becomes what he experienced and behaves like by those experiences. Secondly, Housewives become a free due to patriarchal norms. Mostly housewives in patriarchal societies depend on man. They feel devaluable on the superiority of man whereas they feel humiliated by their men. The Humanistic theory of Maslow explains that women who stayed home after marriage are satisfied with the dominance of men, they do not even able about living with free man. Thus, harmonious relation makes housewives a happy her husband house.

Thirdly, It is important for every individual to learn the same old values of culture. The societies already defines the role and practice for every individual. And for every person they are supposed to do their defined

practices in each stage of the evolution-
ary theory of William Storer Hall at
an evolutionary stage of human from
feeding to death. The societies define
their role. Thus, males were making
but a tree.

In addition, societies itself works
and grows as a tree because of the
old defined values. Following are two
statements regarding that view.

First of all, society unable to
accept the gender equality. Majority
of it has been considered that there
are only two genders, male and female.
However, now, multiple gender has
been perceived but societies are unable
to accept that.

Gender Trouble says that there must be
perceived plurality and most of her followers
agree with her ideas but patriarchal
societies are unable to accept modern
views on gender. Hence, societies old values
makes them trees.

In this way, religions are
interpreted to suppress man. Even religions
are misinterpreted for one cause. But,
due to only one cause whole society

strayed away from development. In the Europe before enlightenment, Pope dominated the whole Europe and used people of the Christian religion and used people of wealth for church use and more has right to vote against Pope as it was considered voice against religion. Hence, religious misinterpretation stops man to grow.

Further, there are societies which are not interested to know their basic rights. They do not want to participate in the politics as they consider it a class phenomenon. For doing this they left their rights on the hand of others and eventually even basic rights were not fulfilled. As per the statistics of Bureau of Palestinian almost 25mm children are out of school. There shows that new people are not moving forward for their rights.

Additionally, states are behaving like free because of their values and structure of system. Following are the points regarding their.

If states had, ~~power~~ power for instances, Resigning countries are able to get

used as labor. As they suppressed by advanced powerful country. Through underdeveloped and developed countries have resources and labor. More are skillful, but the developed states' dominant their with the their advanced technology. The Dependency Theory of Paul Prebisch have the view that the resources and skillful labor are suppressed by the advanced technology of developed states. Hence, peripheral countries are because labor for the developed societies.

In the same way, the ideological differences restrain from forming. For some states ideological values are more important than their needs of development. They compromise with their success but never make enemy a friend, whether their enemy is benefited or treated as friend. The scenario fits to the Indo-Pak ideological differences. It can not be ends whether there happens ends type of behavior people. Hence, ideologies makes states to behave like a tree.

Additionally, to manipulate their wrong decisions, state announces chaotic

which are not helpful, as they do not rise purchasing power of people. Vocals speeches with long last, at the stage the presents the skills of the officials. Pakistan works on ability rehabilitation stage by providing aids to handicapped programs. Help it to solve its emerging problems.

~~The British also make out as free free, then set of policies as gave by getting power.~~

The policies are made a free as politicians represents policies which does not help countries to move on following are the viewpoint regarding this.

First, politicians are using some old policies to confuse public. They make speeches forwarded to guide the attention of people. However, they do not show any power to implement such promises. The Pakistan political party (PPP) remains unable to fulfill its slogan (Roti, kapra, aur makhan) and fails to raise the

status of Syria is every great. Here, politicians make country a free which can not more forward.

Firstly, politicians shields on getting aids to fulfill needs. As their needs politics make the use of current account deficit. Politician is also facing the same issue of current account deficit and it's politician tried to solve their problem through getting loans in order. However, they must realize that \$350 of IMF can not solve the issue of Palestinian problems. Hence, politicians shield on getting aids for the development of country, a better approach.

Global institutions and Global system also work as free as it dominated by those who are powerful. Following are the viewpoints on this. Firstly, Marshall's structure indulge world into a free for all states in the system of balance of power. First it has been endorsed that ~~only~~ ~~with~~

World is bipolar but now all states are rising towards the power politics to get superior position, at any cost. The world has been faced millions of deaths in world war 1, world war two and now in Ukraine war and while international institutions are fails to stop the devastation war. Hence, the market structure of world is moving but a free world did not make world a peaceful place.

Basically global laws comprises freedom of states. Because world have an the desire of powerful. International institutions of laws are however made for independence but they make an the desire of who dominant then they being act a free United Nations allowed United States justification on war on Lebanon and world has 200 plus millions of people for 3000 people. Hence, global law are state of free state to the same position and can not change for the better.

Thirdly, Brave Daria is a poetry of powerful to make

offer a free. Powerful makes multiple policies to keep down weaker ones from ^{itself} ^{itself}. Through scholarship, etc, and business people more ~~things~~ the developed countries and bunch of skills full subjugated from under-developed countries. This Brain drain game has been ^{industrial} as last year if ^{Palestinian} moves for the ^{absorbs}, as per Statistic Bureau report. Hence, Brain Drain game is ~~making~~ ~~bad~~ ~~to~~ keep down weaker.

Otherwise, Environmental effects also works as fees ^{voluntarily} does not results good: Following are the Viewpoint on 1073. As arranging conferences ~~do~~ not help to save ~~data~~ ^{from} global warming. As world has been facing serious climate change issues ^{institutions} decided to ^{make} conference to ^{talk} on it. However, results show opposite. According to CNFCC ^{man} of State fulfilled ^{his} claim ^{to} cut down carbon emissions. Hence, conference does not ^{reduce} ^{helps}.

Last but not the least, Carbon market made development efforts combining carbon emission on free - Be aware, result says opposite. But other countries affecting badly. The recent flood in many countries such as Taiwan, India, Moscow says all. Hence, development of carbon emission is strict like free.

In conclusion, Man is a selfish person free but worst experiences make him to shield in a safe person. These experiences are the part some of societies laws and behavior of family towards a child. Even state policies have old values of culture that developed the ideas uniquely and when made them to face problems. Global level efforts fails to combat these problems of states as they dominated by the power. Hence, though's not a free but he can not move on because it has old values of burden.
