- (e) Awareness among the society

5- Strong and strict legal actions can may protect women from the societal evils.

6- Conclusion

Women are the most sensitive and beautiful creatures in the world. The most important thing in our society is the protection of women. Now a days women are not protected socially, not only in Pakistan but all over the world. They are supposed to be the most tiny and suppressed creature on the planet. Males has complete

dominancy over them in the third world countries specially. As these countries are less aware about the rights of women. Patriarchy norms are followed everywhere which is suppressing the rights of women everywhere in the world. Patriarchy cultures do not let them to be on a safe side. Women are not safe anywhere, specially the increasing rate of harassments in the educational institutes has snatched the right of education from many women in the society. As they are afraid of the harassments and do not get proper education due to this fear. While in some places, specially the work places women are kept as a showpiece for the attraction, which is also leading the society towards negative impacts on women protection rights. If people will be properly educated about their rights and their self respect, they may protect their and may come out of these

backwardness. If the media plays its role strongly by educating people on their rights and protection, that way people can have awareness on the protection of women.

Women in the society are unsafe and not protected because of the males and those ancestors who has planted the roots in society to suppress the rights of women. One can say that the previous cultures and people from the beginning of the universe were all the same in mentality regarding women. Women are treated very badly and inhumanly in the society. Per day their harassment cases are increasing worldwide and specially in third world countries. But Pakistan has increased numbers of these cases. According to the research article on women protection, Pakistan has 19.3% of rape cases recorded yearly in those girls who are under age, and are below ten years of age. Small kids are raped

they are unsafe. People are afraid of sending their female children out of homes due to these rape cases.

Furthermore, women are supposed to be the most suppressed and tiny creatures of the earth. Due to this way of thinking women are only supposed to give birth to the children, cooking and working at homes and having very less or no rights of living life of their own choices. One can say that women were used only for the self satisfaction of males and the source to keep them happy and satisfied. They were having no rights of education and outings like males. The only reason was that they were born female. They were having a biological different traits from males, which makes them the suppressed creatures for males. It is the saying of (Malala Yousafzai) that every woman should have the rights to live life of their own choices.

● On the other hand, Pakistani, Indians and specially the third world countries are the countries which has patriarchy norms and cultures. These cultures are based on a society which has patriarchy culture and norms. They follow the rules and obey the male of the family, that maybe a father or a brother who gives orders and the women has to do as it is. Patriarchy culture do not let the women to groom in a liberal society. They become that much suppressed and depressed that they can not even fight for their legal rights.

People in the country and all other under developing countries are less aware or maybe unaware of the women protection rights. That is why the women in these countries faces alot of hurdles in the way of their protection as compare to other foreign and developed countries. Accord

ing to (Malala yousafzai) "I am not born to live under the four walls of a house". But due to these situations women are supposed to live under the four walls of a home.

Beside this, Educational institutes are also unsafe for the females. Per day harrasments and rape cases increases in the educational institutes. This reason is becoming more and more common nowadays. According to the (news report in January 2023) "Rape cases and harrasments in educational institutes rises to 29.6 percent in universities and other institutes of Pakistan". This is the the reason, that many women has lost their right to get good education in the highest universities of the country.

Furthermore, women at the work place are also unsafe. Many private institutes, companies, factories etc uses the women as a showpiece to

attract the costumers. Mostly this matter is observed at bank jobs and other posts specially the reception posts. They hire female for such type of Job. Also female are hired on telephonic posts for the betterment and promotion purposes. These things are just making the females more ~~inferior~~ inferior and lower creatures. Also their self-respect has to be compromised for the reputation of the companies.

Socially women are not protected so further legal actions can give them protection some of them are discussed below. People should be properly educated about the rights of women and their protection. If people will not be aware of the women protection they will further not come out of this mud of suppressing a women. The only way is to educate them and aware them about the

Protection of women.

If women will have legal rights in the society. They will not be treated in bad ways. But they will get their legal right to exercise them in the society. nobody will pressure them for not exercising their rights in the society. Government should take an action to give women their legal protection rights.

As there are no proper laws in Pakistan against the harrasments of women. The country should have such strict laws and punishments against these acts so that they are able to think of the punishment before they harras a women. This way many women would become safe.

Media should play a very strong role to educate the masses on

women protection and their rights. 90 percent of our society has no education on women protection, that is why they treat them in non human ways. If media gives them awareness they may start protecting. Awareness campaigns should be done to aware the masses.

In a nutshell, women in Pakistan are not protected socially. They are unsafe at educational institutes, as well as at work place. Harassment cases are increasing per day and new cases recorded every second day. People are also unaware of the women protection rights. So proper laws and punishments should be done against these acts. Some legal and strong actions could may protect a women but these are hardly followed in our countries as our culture is a patriarchy culture.
