

Topic Artificial Intelligence : its promise and perils

Outline

1 / 100

1. Introduction

Thesis statement:

Artificial Intelligence has superseded the humanity in various sectors. However, Artificial Intelligence have both positive and negative role in the world. Future enhancement is being day by day some safety steps should be taken to meet ~~this~~ its challenges.

2. History and Advancement of Artificial Intelligence

3. Causes of High speedy transformation of AI

a) Rampant increase in death rates due to Medical errors.

b) Rise in population

c) Increasing the interest of world in research and technology

d) Demand of Advancement in security

e) Time consuming and Error chances by humans

4. Impacts of Artificial Intelligence while transforming the world

Your heading should relate to the given topic. Discuss promises and perils offered by AI

Positive Impacts

a) Reduction in human errors ✓

b) Creating job opportunities ✓

c) Medical Applications. elaborate

d) Improvement in cyber security ✓

e) Automatic and efficient work ✓

Date:

--	--	--	--	--

~~4) Negative Impact~~

- a) High cost of Creation ✓
- b) Risk of Massive Unemployment ✓
- c) Lacks out of box's thinking ✓
- d) Affecting the human health ✓
- e) No improvement in working ✓

5. Way forward to meet the challenges of AI

- a) Suggestion of scientists regarding future advancement in technology ✓
- b) Balance use of AI in various sectors.
- c) Moral and ethical checks on AI technological advancement and innovations.
- d) Make policies to prevent the negative spread of AI's innovations ✓
- e) Keep innovation subverient to Humans.

Lessen the ways forward
Focus on promises and perils

6) Conclusion
