Special CSS  
Mock Exam (September 2023)

Batch #045

No A

Name: Sadaghuil Hussain

# Topic: Artificial Intelligence: its promise and perils.

## Outline:

### 1- Introduction:

Artificial intelligence is being used <sup>sentence structure</sup> to go <sup>expression</sup> more in various domains in the world.

21<sup>st</sup> century is the epoch of technological <sup>be</sup> mind set. World ~~should~~ <sup>be</sup> ready for modern revolutions.

*Does not address the topic.*

### 2. Rise of Artificial Intelligence.

#### 3. What are the promises of the Artificial Intelligence

- (a) I-I may <sup>weakens the argument</sup> help in enhancing the knowledge
- (b) I-I can reduce extra work force — *How is that a benefit*
- (c) AI can boost <sup>SP</sup> ability of humans
- (d) It provides social and political awareness — *How is unclear.*
- (e) AI helps in economic sustainability
- (f) I-I does task <sup>expression</sup> in least time
- (g) AI gives unbiased solutions

#### 4. The perils of Artificial Intelligence

- (a) Excessive use may make human dominant
- (b) I-I may cause of unemployment
- (c) Excessive usage of AI may promote anxiety and depression
- (d) AI does not know the rules of ethics
- (e) This technology can be used for surveillance *why is that a peril?*
- (f) I-I may promote the culture of war

*May means you are not sure. If you are not sure and confident about your argument do not write it.*

(1)

5. How to deal with these perils.

- (a) Less excess of AI
- (b) Promote the human activities more
- (c) Make International rules for this technology

Stop using it is not a solution

6. Conclusion:

Sir Syed Ahmed Khan once said, "Adopt the Modern culture". That means the nations should adopt contemporary things which may help in development. 21<sup>st</sup> century is the ~~technological mind set~~ <sup>era</sup> of technological mind set. World should <sup>is</sup> getting advantages from the revolution of technology. Artificial Intelligence is the advanced technology of the 21<sup>st</sup> century.

With this technology, common man gets various benefits and learns more. Every developing country should <sup>is</sup> adopting this technology.

~~The~~ Pakistan has been facing various problems in many domains; these problems can be solved with this technology. <sup>Pakistan is not functioning in the domains of AI development or regulation. It is only a consumer.</sup>

~~This~~ Artificial Intelligence gives advantages but also produces perils for the people <sup>of the countries</sup>.

Artificial Intelligence can improve excess of knowledge and make people more creative. It can also promote

?

-the social, political and economic awareness.  
Artificial Intelligence may give <sup>sentence structure</sup> extra efforts  
in education development. With this technology,  
a child can be more creative. ~~Artificial~~  
Artificial Intelligence also produces some  
dangers for the human beings. It  
may promote the culture of Robots.  
As per report, after few a few decades  
humans may disappear from the planet earth. <sup>no examples or facts</sup>  
Humans should delimit the usages of Artificial  
Intelligence at once. → <sup>Intro</sup> Give proper overview of outline  
End the Intro with the T.S.

The emerge of various technologies such  
as: ChatGPT, <sup>Not AI</sup> Social Media, VR Technology,  
META technology etc, can be seen in  
21<sup>st</sup> century. This is the epoch of  
technological mind set. The Artificial Intelligence  
(AI) is also an advanced technology of  
21<sup>st</sup> century. It may improve the human  
lifestyle with its advanced <sup>approaches</sup> ideas. It may  
helps in thinking, education system, and  
various activities. After the rise of  
Artificial Intelligence, the thinking power  
of humans has been changed. <sup>in what manner</sup> Hence,  
the power of Artificial-

# Intelligence.

No ~~double~~ Artificial Intelligence gives <sup>expression</sup> more excess do gain more knowledge in the world. World has accepted the hegemony of this technology with release of knowledge. World gets updated with the technology. If a country wants to know the current circumstances of the other countries, it should press only one button to know the essential situation of those countries. This is only because of advanced technology. In that case, Artificial Intelligence is the major source of knowledge.

negative connotation of the word.

which AI is this? what is it called? source of information

Artificial Intelligence promotes the culture of less workforce. It <sup>not a positive aspect of AI. Especially the way you are phrasing it.</sup> reduces the extra humans from the works. It gives more strength with less workforce. As per report, the capacity of Artificial Intelligence is equal to more than 1 thousand workforce. Therefore, Artificial Intelligence can be used instead of extra workforce.

specify

But why is that? As it will lead to displacement from jobs

Artificial Intelligence <sup>sentence structure</sup> enhancing the ability

→ and power of human being. Human can learn more from this technology. This technology may accumulate the evidences that how human's mind is working. As per report, Artificial Intelligence can do a work faster than human. The speed of Artificial Intelligence such as: ChatGPT, is 10 million times faster than humans. Hence, Human beings can enhance his ability and inner power from this advanced technology.

Sentence structure is speculative

not the current argument

Also though you are discussing premises your language & word choice is very negative

Social development can be promoted through the advanced technology. With the algorithms, the maintainance of peace, law and order, and sustainability of environmental activities can be promoted. Artificial Intelligence may also helps in political awareness. Artificial Intelligence produces literate mindsets in the society. Humans can learn more from this technology. In that case, without education the sustainable social and political development is out of question.

How?  
example?

Also deviates from the argument

Developing countries have been facing

various problems such as: educational, political, constitutional, and economical problems. For Pakistan, economical problem is the major of all problem. Artificial Intelligence may reduce the peril of economic declination.

This technology gives various options with regard economic model. A country can easily adopt an economic model.

Pakistan economy is the major of all problems.

Pakistan should earn billions of dollars with the advanced technology. Hence, Artificial Intelligence may ease the danger of economy.

Humans can easily get advantages from Artificial Intelligence. Artificial Intelligence can be used for problem solution.

It may reduce the danger of bad relations with others. It gives unbiased solutions of the problems. It may use for

international problems. Human can solve the mysteries with the help of Artificial Intelligence. It gives impartial solutions of any problems in the world. Hence, A major problem can be solved with the help of this technology.

Also the argument is not do what AI can do regarding a situation. Also what countries should do regarding AI? How?

what sort of economic model does AI encourage? Also changing an economic model is not easy.

not relevant to the current argument.

no argument a paragraph

Lack cohesive link b/w Paragraphs.

Artificial Intelligence imposes the dangers for human beings. Human beings would become dormant, if ~~he/she~~ use it excessively. Excessive use of artificial technologies may ~~produce~~ ~~to~~ the habits of laziness. It ~~shrinks~~ the capacity of thinking capabilities and make humans more inactive physically and mentally. As per report, <sup>which report</sup> ~~social media~~, <sup>not an AI</sup> many people are unable to think critically. Therefore, ~~it passes the danger zones for~~ human beings.

Artificial Intelligence is responsible for unemployment. Many owners of the various companies prefer the accurate work rather than ~~inaccurate~~ inaccurate work. The owners want ~~least~~ <sup>best</sup> work force environment. As per <sup>which report</sup> ~~report~~, 10 million people would lose their respective jobs due to rise of Artificial Intelligence. ~~Therefore~~ ~~unemployment is the~~ major issue in various countries in the world. <sup>Therefore</sup> ~~Artificial Intelligence~~ <sup>can</sup> would promote the culture of unemployment.

*Used to contradict previous statement or argument.*  
~~However~~, this technology generate anxiety and depression among the youth. Excessive usage of social media, chat GPT, and other technological instruments may produce anxiety among humans. There is ~~plenty~~ plthora of scientific evidences ~~that~~ the fact that there is link between excessive usage of technology and anxiety. As per ~~research~~ the advanced technology is major responsible for sleeping disorder. Therefore, Artificial Intelligence is the major contributor of anxiety, depression, and ~~and~~ sleeping disorder.  
*Do not generalise advanced technology. Make it specific to AI.*

Similarly, Artificial Intelligence has no emotions. It can not feel or react with reference of emotions. It may promote the unethical environments in the world. Recently, Microsoft produced man-made algorithm. It spread unethical words for the world leaders. This act actually the evidence of how dangerous this technology is.

*example? which model? which App?*

*Paragraph Structure*

last but not least, Artificial Intelligence can be used for war purpose and can be used for spy within other evil country. It may create the bad <sup>academic writing.</sup> environment. There is <sup>International</sup> anarchic system in ~~International~~ the world. This technology can be used for hampers the development of other country. Humans ~~can be~~ <sup>should</sup> ~~would~~ aware of the negative impacts of this technology. It may start the nuclear war within the world. Therefore, this technology may promote the war.

These are many advantages and disadvantages of Artificial Intelligence. Humans should avoids the disadvantages and promotes the benefits of this technology. There is dire need to introduce limited rules for usage of this technology. This will help in controlled and limited <sup>No suggestions mentioned in the paragraph.</sup> use of Artificial Intelligence. Less excess of Artificial Intelligence should produce sustain environment.

Secondly, Humans should promote human activity rather than artificial activity.

Humans should learn from it. <sup>what?</sup> However, humans should not fully rely on this technology. Artificial Intelligence replaced the humans with its accurate work. In painting, education, languages, and arts, technology does perfect work than humans. It may cause of unemployment of humans in various department. Humans should give ~~sympathy~~ <sup>respect</sup> to humans rather than machines. Humans need some source for livelihood. Therefore, world need to do work on Artificial Intelligence's rules. *no suggestions mentioned in the paragraph*

To sum up, role of Artificial Intelligence in this modern world is crucial. It gives benefits similarly, produces dangers for human beings. This era needs more creative and technological mind. <sup>It</sup> ~~It~~ may cause of problems and also gives solution of the problems. It promotes the awareness of various domains in the world. World should adopt the technological revolution and also ~~it~~ gives some limited rules and regulation for this technology. *generalised conclusion not specific writer to the essay*
