The duty of a student is to benefit from the teachers and the books. They can enlighten the paths of life for us that contain darkness. To fulfil this duty, unity of cause and consistency is required. Every external interruption that is against this needs to be separated from this cause of learning. Otherwise the training of the student would be incomplete and the progress that needs to be made in acquiring education will be spent on the political activities. More than political leaders, our country needs scholars and educators who are educated on Eastern, Western, Religious and worldly subjects. Obviously, these diversely competent people will prevail only if education is free from political interferences. It is said that our education system is weak compared to the western countries' education system. This is a result of our economic situation to some extent. It is not far from truth that often teachers are not able to ignite the flame of passion for acquiring education in the heart of the student.
