# Protection of women.

If women will have legal rights in the society. They will not be treated in bad ways. But, they will get their legal right to exercise them in the society. Nobody will pressure them for not exercising their rights in the society. Government should take an action to give women their legal protection rights.

Elaborate the argument  
give reasoning and example

As there are no proper laws in Pakistan against the harassments of women. The country should have such strict laws and punishments against these acts so that they are able to think of the punishment before they harass a woman. This way many women would become safe.

Media should play a very strong role to educate the masses on

women protection and their rights. 90 percent of our society has no education on women protection, that is why they treat them in non human ways. If media gives them awareness they may start protecting. Awareness campaigns should be done to aware the masses.

In a nutshell, women in Pakistan are not protected socially. They are unsafe at educational institutes, as well as at work place. Harrasments cases are increasing per day and new cases recorded every second day. People are also unaware of the women protection rights. So proper laws and punishments should be done against these acts. Some legal and strong actions could may protect a women but these are hardly followed in our countries as our culture is a patriarchy culture.
