

Topic: You are not a tree;
move on.

OUTLINE.

1. Introduction

Thesis Statement: Tragedies of life gives human a clunk ^{wrong word} of memories. These stucking experiences influence each and every sphere of mankind. However, human should learn from the experiences and try to move on with better opportunities; because, to live in those tragedies makes man a tree, ^{sentence structure} which can not move forward in life.

2. Difference between the very living nature: Human and Tree

3. Individual level ^{Topic specific heading}

a) Man lives with his dark childhood memories

b) House wives stuck towards the patrilachal norms ^{Sentiment of patriarchy}

c) Every individual learn some old values of culture

4. Societal level

a) Society is unable to accept gender

^{Argue that these incidents should not hold one back.}

• roles

b) Misinterpreted religious values stops man to grow.

c) Society is unable to Uninterested to know their basic rights.

5.) State level

a) Periphery countries are stuck to get used as labor.

b) Ideological differences has more importance than needs.

c) Charities can not raise purchasing power of people.

6.) Political level

a) Politicians are using old same policies to confuse public.

b) Shaking or getting aids will not solve problems.

7.) Global level

a) Anarchic structure indulges world into a balance of power vicious cycle.

b) Global law compromises freedom of countries.

c) Brain Drain gave a policy to keep competition down.

8.) Environmental level

a) Mearging conferences does not help.

to solve earth from global warming.
b) Carbon Market made development
to combat carbon emissions
as here.

9.) Conclusion.

The outline does not elaborate on the 'Move on' what you have written as part of what address the opposite the topic demands.

Tragedies of life give human a chunk of memories. These shocking experiences influence each and every sphere of human life. However, human should not stay with those memories but he should learn from the past experiences and try to move on. A girl live in the memories of her childhood. ~~When~~ when she treated as princess, she called by a good names she grows up and face the realities of society where man is grabbed every role and field of society and the only thing to do, left for her is to stay home. At that time she has two options to stay what others decide for her a tree or to move forward for her about it will depend upon the what she experiences and how strongly these experience affect her. Similarly, things in the world goes the same. If a individual keep on

wrong me of word

stay on old values of his culture than
he will never move forward towards
better change. Mistake of religion of
practices and unawareness of
made people to stuck in past. These
have strategies keeps countries away
from development and those who
dominant the world get all benefit.
Any steps put forward for the move
of betterment will be a game of power.
Who want to keep down or keep
freeze its competency. Hence, markets
should learn from its experiences not
also stay with them.

powerful support structure

The big difference between trees
and human is replacement. Both are the
very living nature of earth. They share
experience with each other and help
each other to survive in the planet.

Though they have similarities but
human are as far important why
precious than that of trees, because
their abilities. What is human experience
in life ~~experience~~ ^{experience} has ability to
move forward and to learn from those
experiences. but, in case of trees, they

Also why is part of
doctors, etc.

experiences disastrous situations as well
! Sheld They often not made on and
died as the same position. Perhaps, there
are some human and its dear conflict
which makes him to be like a
tree. Throughout the life like he made
such beliefs, Politics, instincts, which
shield himself to the same position, even,
he do not know as he had to know how
to get out from the problems he made.
However, Maudsley does understand the
appearance that how they are about a tree.
They can move on with new beliefs,
Politics, and reforms instincts for
the development of them type.

There norms and values of culture
Shield in individual as a tree, at every
stage of life individual has to face
various defined ideas if so desired.
Following are the viewpoint on the development
Firstly, Man lives with his deals
memories of childhood. These memories
build his character according to what
he experiences in past. And, for any case
if he does not able to maintain his
emotions he may transfer the psychological

issues. This scenario is explained by
Stigmata Freed's Psychoanalytical theory
 which explains that how childhood
 memories affect traumatizing character
 of human and bad experiences traumatizing
past made him to smile Not on past.

Hence, man becomes what he experienced are
 and recharacterize by those experiences. NOT a
 due to poststacked norms. Mostly how very normal
norms in patrilineal societies depend
 on man. They feel disruptable on the
 superiority of man whereas they scaled
harmatically by their men. The
Humanistic theory of Maclay express
 that women value shared home after
marriage are satisfied with the
 dominance of man, they do not even
 able about having women free law. Thus,
traumatic relations exists between a
husband and wife.

Thirdly, It is important for every
individual to learn the same old
values of culture. The societies already
define the role and practices for
every individual. And for every person
they are supposed to do those defined

practices in each stage of the evolution-
ary theory of William Storer Hall at
an evolutionary stage of human from
feeding to death. The societies depend
their role. Thus, males were making
but here.

In addition, societies itself works
and grows as a tree because of the
old defined values. Following are two
statements regarding that view.

First of all, society unable to
accept the gender equality. Majority
of it has been considered that there
are only two genders, male and female.
However, new, multiple gender has
been perceived but societies are unable
to accept that. Judith Butler in her book

Gender Trouble says that there must be

perceived femininity and most of her followers
agree with her ideas but patriarchal
societies are unable to accept modern
views on gender. Hence, societies old values
makes them trees.

In this way, religions are
interpreted to suppress man. Even religions
are misinterpreted for one cause. But,
due to only one cause whole society

stayed away from development. In the
Europe before enlightenment, Pope dominated
-d the whole Europe and which interpreted
the Christian religions and used people's
wealth for church use and more has
ought to vote against Pope as it was
considered voice against religion. Hence,
religious misinterpretation stops man to
grow.

Further, there are societies which are not
interested to know their basic rights.
They do not want to participate in the
politics as they consider it a chaos
phenomenon. For doing this they left their
rights on the hand of others and eventually
even basic rights were not fulfilled.
As per the statistics of Bureau of Palestinian
Almost 25mm children are out of school.
There shows that new people are not
moving forward for their rights.

Additionally, states are behaving like
free because of their values and structure
of system. Following are the points regarding
their.

If states had, ~~power~~ For instances,
Resigning countries are able to get

used as labor. As they suppressed by advanced powerful country through underdeveloped and developed countries have resources and labor. Now are stillful, but the developed states dominant their with the drax advanced technology. The Dependency Theory of Paul Prebisch had the view that the recourseful and skillful labor are suppressed by the advanced technology of developed states. Hence, peripheral countries are Resourc labor for the developed societies.

In the same way, the ideological difference restrain from forming. For some states ideological values are more important than their needs of development. They compromise with their success but never make enemy a friend, whether their enemy is beneficial or created as friend. The scenario fits to the Indo-Pak ideological relations. can not be ends whether these steps ends type of harsh people. Hence, ideologies make states to behave like a tree.

Additionally, To compulsate their own decisions, state announces conditions

which are not helpful, as they do not rise purchasing power of people. Vocals speeches with long last, all the stage the presents the stilted all the ~~officials~~ ~~Pakistan~~ ~~work~~ ~~work~~ on ~~daily~~ ~~rehabilitation~~ ~~stage~~ by providing aids to ~~Welfare~~ ~~program~~ will not help it to solve its emerging problems.

~~The~~ ~~British~~ ~~also~~ ~~make~~ ~~not~~ ~~as~~ ~~the~~ ~~like,~~ ~~then~~ ~~of~~ ~~old~~ ~~politicians~~ ~~as~~ ~~game~~ ~~of~~ ~~getting~~ ~~power~~

The politicians are make a tie as politicians represents politicians which does not help countries to move on following and the viewpoint regarding this.

First, politicians are using some old politics to confer public. They make speeches forwarded to grab the attention of people. However, they do not show any power to implement such promises. The politician political party (PPP) remains unable to fulfill its slogan (Roti, kapra, aur makhan) and fails to raise the

status of India is every great. Here, politicians make country a free world can not more forward.

Further, politicians shields on getting aids to fulfill needs. As their needs politics make the

Use of current account deficit. Politician is also facing the same issue of current account deficit and it's

politicians tried to solve their problem through getting loans in aids. However, they must realize that \$350 of IMF can not solve the issue of Pakistan's problems. Hence, politicians shield on getting aids for the development of country, a better approach.

Global institutions and Global system also work as free as it dominated by those who are powerful. Following are the viewpoints on this. Firstly, markets structure indulge world into a free trade. As all states are in the system of balance of power. First it has been endorsed that

World is bipolar but now all states are rising towards the power politics to get superior position, at any cost. The world has been faced millions of deaths in world war 1, world war two and now in Ukraine war and while international institutions are fails to stop the disintegration war. Hence, the market structure of world is moving but the world did not make world a peaceful place.

Basically global laws compromise freedom of states. Because world have on the decision of powerful. International institutions of laws are however made for independence but they make on the decision of who dominant then they being act a free United Nations allowed United States justification on war on Libya and world war 200 plus millions of people for 3000 people. Hence, global law are state of free state to the same position and can not change for the better.

Thirdly, Brave Daria is a poetry of powerful to make

often a free. Powerful makes multiple policies to keep down weaker ones from ^{itself} ~~itself~~. Through scholarship, etc, and business people more ~~things~~ the developed countries and bunch of skills full subjugated from under-developed countries. This Brain drain game has been ~~holding~~ as last year if ~~if~~ Palestinian moves for the ~~abroad~~, as per Statistic Bureau report. Hence, Brain Drain game is ~~holding~~ hold to keep down weaker

Otherwise, Environmental affects also well as trees ~~volunt~~ does not results good: Following are the View Point on 1073. As arranging conferences ~~depl~~ not help to save down from global warming. As world has been facing serious climate change issues ~~institutions~~ decided to change ~~the~~ conference to ~~halls~~ on it. However, results show opposite. According to CNFCC ~~man~~ of State fulfilled ~~the~~ ~~claim~~ to cut down carbon emissions. Hence, conference does not ~~reduce~~ helps.

Last but not the least, Carbon market made development efforts carbonizing carbon emission on tree - because, result says opposite. But other countries affecting badly. The recent flood in many countries such as Taiwan, India, Moscow says all. Hence, development of carbon emission is strict like tree.

In conclusion, Man is a selfish person tree but world experiences make him to smile in a care person. These experience are the part some of societies laws and behavior of family towards a child. Even state rebellion these old values of culture had developed the idea uniquely and when made him to face problems. Global level efforts fails to carbon laws problems of states as they dominated by the power. Hence, though's not a tree but he can not move on because it has a value of burden.

Very general and value of specific to the essay conclusion
