General Science and Ability

General Instructions

Section - 1

1. Give numbering to headings
2. Do not write lengthy paragraphs. Write medium sized paragraphs with headings.
3. Do not use table for comparison and contrast questions.
4. Draw figures/diagram/flowchart where needed.
5. Start new questions from fresh page.
6. Write unit of the answer in ability section.
7. Explain mathematical steps and the reasoning for better score of human negligence.
8. Change colour scheme for references to give them more visibility.
9. Manage time well.
10. Wide page borders are discouraged. Should be reasonable.
11. Avoid writing wrong references.
12. Give more weightage to expressly asked part/s of the question.

Causes:

The causes of land pollution are many, folded starting from natural wrath to human negligence and incompetent measures and policies of govt.

However, the main and obvious causes of land pollution are:

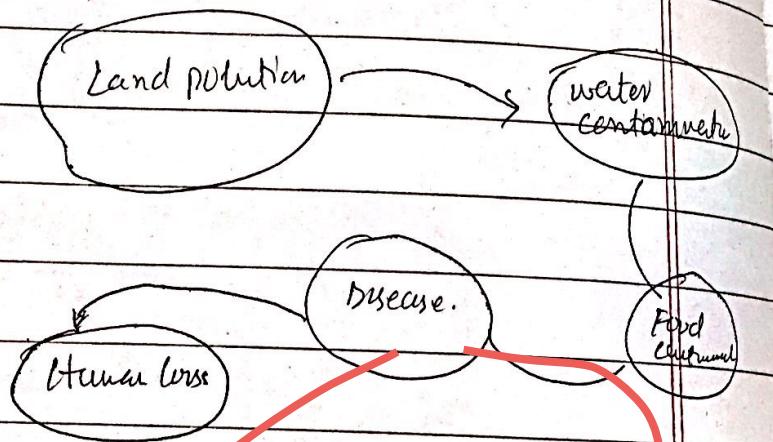

Date: _____

(2)

Date: _____

- Expand a bit
- a. Waste disposal: the disposal of waste and irregular dumping.
 - b. Urbanization and construction: construction of houses.
 - c. Mining and Extraction.
 - d. Litter: The negligence of people is throwing wastes on roads and everywhere. consequences:

Land pollution causes soil erosion, habitat loss, contamination of water and food.

b. What are the main goals of the COP-27?

Ans:

COP 27

COP 27 is the conference of countries of members of United Nations regarding climate change. The recent conference of the parties

Date _____

(3)

Date _____

was held in Egypt in November 2022.

The objective of the conference was to operationalize a loss and damage fund.

The UN Secretary General's remarks regarding climate change and alarming situation of global warming with rise in temperature was:

"we can and must win the battle of our lives"

Goals of COP-27:

The meeting resulted in the following goals:

1. **Mitigation:** The aim of meeting was to take measures like countries will have to increase their unconditional contributions to reduce the temperature (globe) by 1.5° to 2°.

2. **Adaptation:** The countries have to adopt certain vigorous measures to cope with disaster instead of waiting to SDGs goal of 2030.

3. **Finance:** The developed countries have to support the vulnerable countries to climate financially. 100 \$ bn were made promise at COP16.

4. collaboration:

The meeting called for collaboration in every sector like government, civil society and private sector to collaborate and coordinate in tandem to bring about rapid change.

But unfortunately most of the countries do not contribute to preventive measures of carbon emission and hydrocarbon consumption.

C. what is the role of GIS in environmental Sciences?

Ans

~~Gis:~~ GIS stands for Geographic information system

The role of ~~Gis~~ in environmental Science is multi-faceted, as Environmental Science is a broad area of Science ranging from, lands, forest, disaster, pollutants, soil, and much more. The whole ecosystem of man is called environment and the study and analysis of that system is environmental science

(a)

Day. _____

Date. _____

(5)

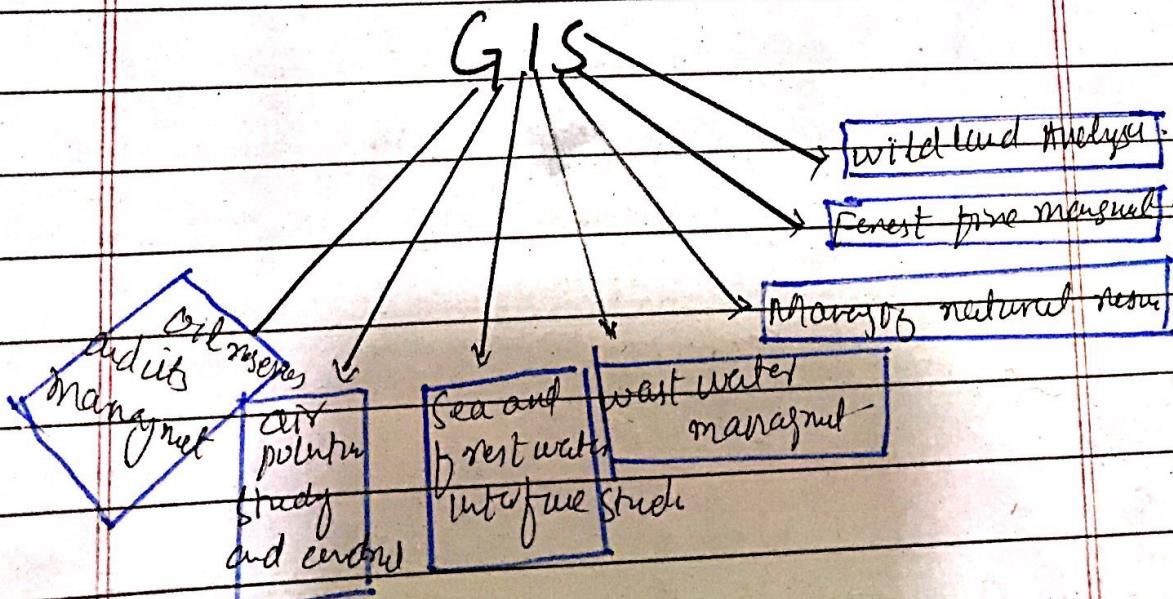

Day. _____

Gis is applicable in the areas of:

- ① wild land analysis
- ② Forest fire management
- ③ Managing natural resources
- ④ waste water management
- ⑤ sea and fresh water interface studies
- ⑥ Air pollution study and control
- ⑦ Oil reserves and its management

60

Environmental Science.

d. What are the fundamentals of Artificial Intelligence:

Date _____

(6)

Date _____

Ans: 4 (D)

Fundamentals of Artificial Intelligence

→ Artificial intelligence is the art of creating machines that performs functions like humans with intelligence.

It is that branch of computer which deals with automation of intelligent behaviour.

The fundamentals on which an AI works are:

- ① Act Humanly : Intelligence like human.
- ② Think Humanly : cognitive Science
- ③ Act Rationally - Doing the right things
- ④ Think rationally, - logistics, the rule of logic

Q

a. Give Structure and Function of Human Ear.

Ear, the part and sensory organ of human body responsible for

Day.

Date _____

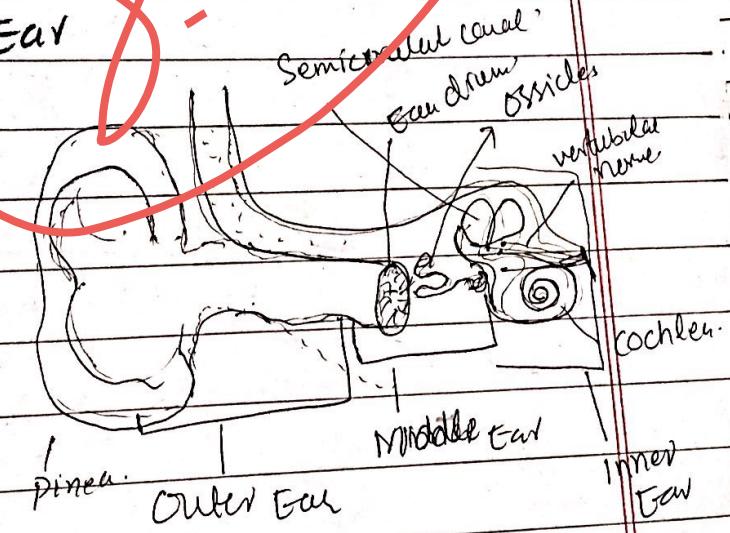

⑦

Day.

hearing and balance. The sound is received by the outer ear and when the eardrum vibrates, the ossicles balance the sound by amplifying and transmitting to inner ear.

Structure:

1. Outer Ear : Auricle / pinna \rightarrow meatus, tragus, helix, lobule
2. Middle Ear : Ossicles + Eardrum.
3. Inner Ear

Inner ear consist of cochlea.

vestibular nerve, semicircular canals.

Functions:

Ear is called the organ of hearing and equilibrium.

① the detection of sound

Date _____

(8)

Day _____

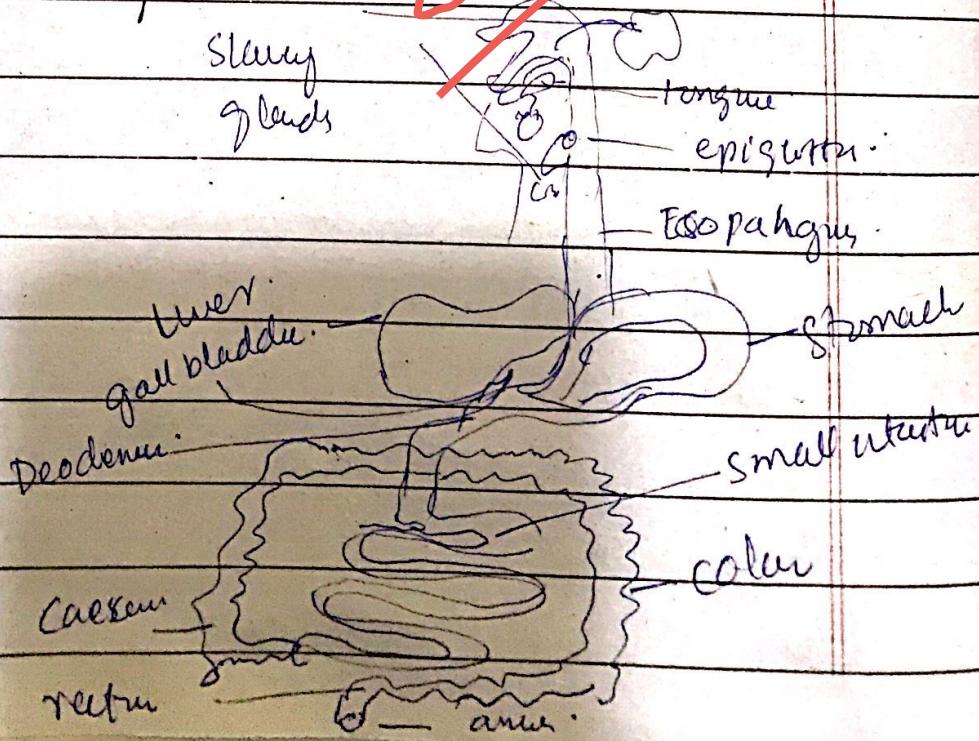

Date _____
4. 10

- ① Analysis of sound by transduction
↳ converting into impulses,
④ Maintaining balance, or equilibrium
⑥ What is digestive system? what
is the role of small intestine
in digestion?

Digestive System:

Digestive System

is the system that breaks down the food into nutrients such as carbohydrates, fats and proteins. They are absorbed into the blood stream and is used as energy for growth and repair.

Date _____

(a)

Day.

The role of small intestine:

- ① Breaks down food.
- ② Absorb nutrients needed for body, **Parts of small intestine?**
- ③ Get rid of unnecessary components.
Too short. Detail?

c. write a short note on vitamins.

Vitamins: Vitamins are substances

that are essential for the proper

function and development of body.

They are necessary for normal
growth, good health, good which
proper digestion. They do not provide
energy to the body but help in
proper functions of body.

Kinds: A, B, C, D, E, and K.

They can be soluble or unsoluble
as they are organic substances.

They shore up bones, bolster
immune and proper growth of hair,
nails, body skin and, much more.

Vitamin B can also have

B₁₂, B₆, folate and ad folat.

Date _____

(10)

Date _____

d) Describe the function of pituitary glands.

Ans

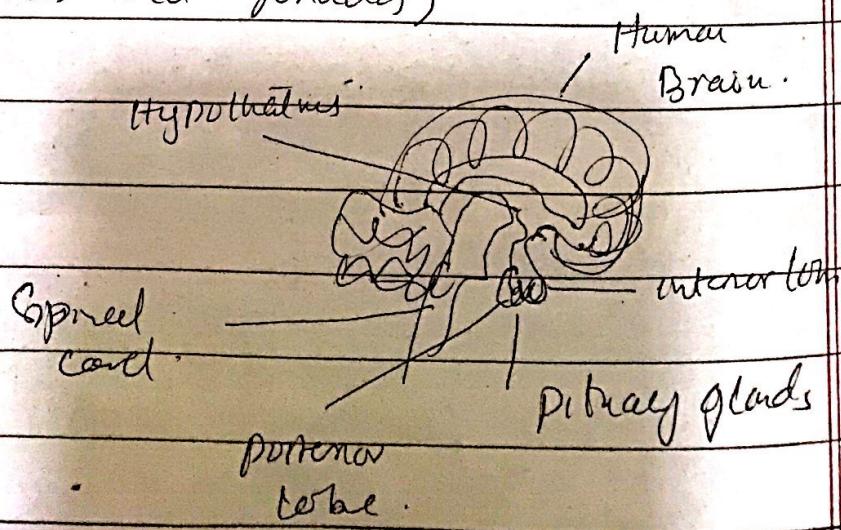

Pituitary Glands:

It is the major endocrine gland. It's size looks like a pea attached to the base of the brain.

Function: The main function of pituitary glands is to produce and release several hormones that help carry out

some functions of body like growth.

It is considered as the master gland as it monitors regulation and growth functions of body. It also controls the function of many other endocrine glands like Thyroid gland, Adrenal glands and gonades).

Date _____

(11)

Date _____

Section II

Q: a. Identify the series.

i) 10, 100, 200, 310 430

Solution: Addition

$$10 + 90 = 100$$

$$100 + 100 = 200$$

$$200 + 110 = 310$$

$$310 + 120 = 430$$

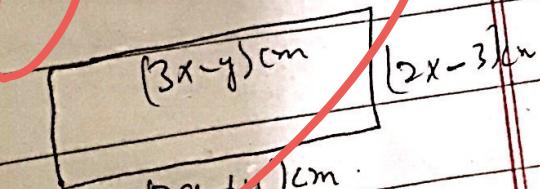

ii) 3, 7, 23, 95 479

Solution: Both Multipli
and Additn

Ex 2+1, x 3+2, x 4+3, x 5+4

ad $95 \times 5 + 4 = 499$

b) The Parameter of a triangle
is given below 114 cm. Find
the area of rectangle:

Ans:

Parameter of $\gamma = 114$ cm $(2x+y)$ cm

Area = ?

As Area of a rectangle is $A = WL$

Date _____

(B)

Day _____

$$\text{or } A = L \times b$$

L = length

B = Breadth / width.

As perimeter is given so,

$$A = Lw$$

$$P = 2L + 2w$$

So

C.

Nisha is 15 years old to Romi ---

Nisha's age?

Solutn

$$\text{Nisha's age} = N = R + 15$$

$$\text{Romi's age} = R$$

$$\text{Nisha's age 5 years ago} = (R + 15 - 5) =$$

$$\text{Nisha's age} = R + 15 - 5 = R + 10$$

$$\text{Romi's age 5 years ago} = (N - 5) =$$

As she was 3 times older so

$$R + 10 = 3(N - 5) = 2R = 25$$

$$R = 12.5$$

Date _____

(B)

Day. _____

As Romi's age is 125

So Nisha's age = $(R+15)$

$$N = 125 + 15 = \boxed{275 \text{ years}}$$

C. 210 oranges --- cartons needed?

Solution:

$$\text{Oranges} = 210$$

$$\text{apples} = 252$$

$$\text{pears} = 294$$

possible no. of cartons = ?

let calculate the common factors.

$$\text{Oranges} = 210 = 2 \times 3 \times 5 \times 7$$

$$\text{Apples} = 252 = 2 \times 2 \times 7 \times 7$$

$$\text{Pears} = 294 = 2 \times 3 \times 7 \times 7$$

common factors

$$2 \times 3 \times 7$$

$$= 42 - \text{so } 42 \text{ no. of cartons}$$
