

Q.No. 3

a) Cyclone

General Instructions

1. Give numbering to headings.
2. Do not write lengthy paragraphs. Write medium sized paragraphs with headings.
3. Do not use table for comparison and contrast questions.
4. Draw figures/diagram/flowchart where needed.
5. Start new question from fresh page.
6. Write unit of the answer in ability section.
7. Explain mathematical steps and the reasoning for better score.
8. Change colour scheme for references to give them more visibility.
9. Manage time well.
10. Wide page borders are discouraged. Should be reasonable.
11. Avoid writing wrong references.
12. Give more weightage to expressly asked part/s of the question.

The surrounding area of a cyclone has initial destructive part of most destruction, while the central part. Eye is the calmest part of cyclone. In Pakistan the last cyclone with highest damage came in 1993. Moreover

recently, Cyclone Biparjoy which occurred in a month of time had the potential of the same of 1993 which damaged infrastructure along with loss of economic movement due to demographic.

B3. b

Earthquake:-

Earthquake is caused due to sudden release of energy from faults which causes vibration on land surface.

Causes

① Plate Tectonics movement:-

The movement of tectonic plates sometimes cause friction of the plates with each other in many ways such as

Divergent which causes moving away of the land surface.

Convergent:-

moving towards each other

Lateral moving side by side of each other but in opposite

direction.
Elastic Rebound - This above mentioned movement then reverse in sudden way like elastic which cause the energy stored in the rocks to release.

② Volcanic Eruption - also cause seismic energy to release suddenly.

③ Mining - also sometimes cause disturbance in the lower level of tectonic plates causing earthquake.

Shallow focus - Deep focus

The point of the fitting of plates which is called fault line varies in depth
Shallow focus? depth is 0-70 km

⇒ Intermediate focus's depth is 70-300 km

Deep focus? depth from 300 to 1000 km

Measurement of Earthquake

Earthquake is measured through Seismograph in unit of Richter scale

The normal range is 0-4.5

The intense range is 5-8

The earthquake of Kashmir²⁰⁰⁸ was 7.8 Richter scale. In while of

Afghanistan 2015 was 7.6 Richter scale

Morollo Earthquake

Happened on 8 September 2023. Killed nearly 3000 people.

Its intensity was 5.8 Richter scale.

C Dengue fever-

It is a mosquito born disease which transmit dengue virus through biting.

Symptom The person infected has the symptoms of high fever, chills, body aches and joint pain.

Risk - In some case it even leads to death.

Global concern - It has many times converted into pandemic causing concerns worldwide.

Too short.

Causes :- ① As the disease is spread through the mosquito Aedes Agyptee ~~which grows~~ ^{endemic and even} mostly around stagnant water thus the chances of stagnant water must be reduced or covered.

② Full clothes should be worn

along with anti mosquito bite lotions application.

③ Mosquito nets should be used.

④ The person infected must be kept hydrated to prevent risk of death.

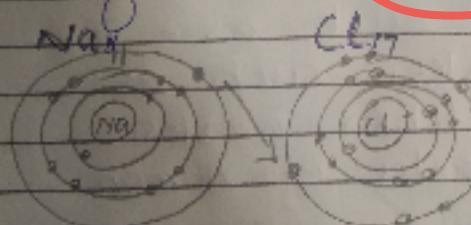

According to WHO around 2000 have died from it.

d Distinguish Ionic & Covalent bonds

Atoms make bonds with other atoms of molecules to complete its Octet or duplet rule.

Ionic bond Covalent bond.

In ionic bond there is complete sharing of electron.

In covalent bond there is partial sharing of electron.

In this example, Sodium gives its electron of outer shell to chlorine which has deficiency of one electron to complete its octet rule.

In this bonding of nitric acid Nitrogen has deficiency of three electrons to complete its octet rule which is catered through partial sharing with three

Ionic

Covalent

Cations
Anions

Hydrogen atoms which have deficiency of one atom to complete its duplet rule.

Usually formed between metal and non-metal.

formed between non-metals only.

Stronger bond

normal bond.

Cannot be formed between identical elements

can be formed between identical atom elements.

Q. 4 - a.

Causes of Land Pollution:-

Land pollution is the contamination of soil and surface of the land. Most of the cause are human activities such as:-
 Domestic station wastes such as home wastes, kitchen wastes and sewage wastes of human body.

Commercial and industrial wastes:-
 the poisonous materials that are come out of industries and commercial places

Deforestation:- the same waste which could be naturally deposit through forests keeps accumulating

due to absence of forests. Moreover the left over of Deforestation also cause the undeposited waste adding to the pollution in the same way deforestation also cause degrading of the quality of soil, leaving it with lesser capacity for productivity.

Pesticides / herbicides / intense

agriculture - The use of such chemicals also degrades the quality of land.

Acid rain :- The ^{hazardous} chemicals present in air due to human activity is deposited on soil through rain.

Floods - Flood brings with it harmful sediments and pathogens from frozen mountains which contaminate the land.

b:- COP 27.

COP 27 was held at Sharm el Sheikh Egypt under the UN Framework Convention on Climate Change.

Its purpose is to unite the world against global warming and climate change.

under one umbrella and aim for concerted action collectively as Angela Merkel, Chancellor of Germany said: all must agree on a binding mechanism to fight climate change.

Aims:-

COP 27 agreed on so the major following major goals this year - i.e.

Reduce carbon emission as soon as to limit the global warming to 1.5° above pre-industrial era.

Help developing countries financially to bear the damage inflicted upon them due to climate change who have least contribution to global warming but are bearing the reward of nature indiscriminately.

Provide technology to developing countries.

Apart from giving financial assistance it aimed to provide technological assistance to these countries to transform their energy needs from non-renewable sources to renewable ones.

d. Fundamentals of AI

Artificial intelligence is a system that incorporates machines with the intelligent feature of human beings.

- It has the ability to learn from data available to it, thinking process, language, perception and other multiple forms of information.
- Moreover it has the feature of NLP i.e. Natural Language Processing which were ~~the~~ inherently supposed to be human quality alone.
- In the same way it has the capacity of storing large amount of data, and process and sift through it for different purposes
- Meanwhile it can also solve problems of vast amount nature.

Irrelevant answer

Sec- II

Q. 6. a $10, 100, 200, 310 \quad \underline{430}$

Explain the reasoning in detail for such questions

b $3, 7, 23, 95, \underline{479}$

b $(3n - 4) \text{ cm}$ $\begin{array}{r} 3 \\ \times 2 \\ \hline 6 \end{array}$ $\begin{array}{r} 23 \\ + 3 \\ \hline 26 \end{array}$ $\begin{array}{r} 479 \\ 26 \\ \hline 219 \end{array}$

$(2n + 3) \text{ cm}$ $\begin{array}{r} 2 \\ \times 2 \\ \hline 4 \end{array}$ $\begin{array}{r} 23 \\ + 3 \\ \hline 26 \end{array}$ $\begin{array}{r} 380 \\ 26 \\ \hline 14 \end{array}$

$+ (2n + 4) \text{ cm}$ $\begin{array}{r} 2 \\ \times 2 \\ \hline 4 \end{array}$ $\begin{array}{r} 23 \\ + 4 \\ \hline 27 \end{array}$ $\begin{array}{r} 384 \\ 27 \\ \hline 11 \end{array}$

Solution

$$3n - 4 = 2n + 4$$

$$3n - 2n = 2 + 4$$

$$n = 2 + 4$$

Put * in eq (1)

$$3n - 4$$

$$3(2y) - 4$$

$$6y - 4 \Rightarrow 5y$$

Put * in eq (2)

$$2n + 4 \Rightarrow 2(2y) + 4$$

$$4y + 4 \Rightarrow 5y$$

Put * in eq (3)

$$2(2y) - 3$$

$$4y - 3 \Rightarrow 4y = 3$$

$$y = 3/4$$

$$\text{length is } 5 \times \frac{3}{4} \Rightarrow 15/4 \quad 2(2y) - 3$$

$$\text{value of } n \quad 4y = 3$$

$$2n + 4 \\ \cancel{+ 2n + 3} \quad \cancel{4} = \quad \cancel{8n + 3}$$

$$2n = +3 \\ - 2n$$

$$n = \frac{3}{8}$$

$$2n = 3$$

$$2 \times \left(\frac{3}{8}\right) = 3$$

$$\text{width } \frac{15}{4} - 3 = \frac{3 - 12}{4} = \frac{-9}{4}$$

$$\text{length } 15/4 = \frac{15}{4} \times \frac{9}{4} = \frac{135}{16}$$

$$\text{Area} = \frac{135}{16} \text{ m}^2 \quad \underline{\text{Ans}}$$

C

$$\text{Nisha} = y$$

$$\text{Nish} = n + 15$$

$$\text{Romi} = n$$

$$\text{Romi} = n$$

$$\text{Nisha} = n + 15$$

5 years ago.

$$y - 5 = 3n$$

$$(n + 15) - 5 = 3n$$

$$n + 10 = 3n$$

$$n + 10 = 3n$$

$$n + 10 = 3n$$

$$n = \frac{10}{2}$$

$$3n - n = 10$$

20

$$2n = 10$$

$$n = 5$$

$$y = n + 15 \Rightarrow 5 + 15 =$$

Nisha age \Rightarrow 20 year Answer

d

How? Explain the steps.

Bigest possible number
of cartons needs is
42.

Q. 7. a

Solution:

$$20\% \text{ of } u = 80$$

$$\frac{20}{100} (u) = 80 \times 5$$

$$u = 80 \times 5$$

✓

$u = 400$ The original
price of shirt

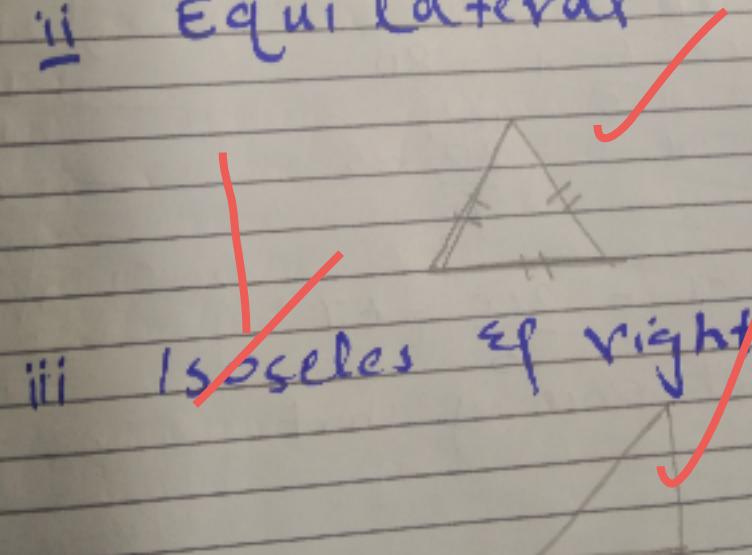

b:-

BROTHER = QDḠS̄NQA
SISTER = T̄IT̄SQA
or
ZJZYNA.

i-Scalene triangle.

Figures are correct but define in sentences.
Also, led pencil is not allowed in exam. Only
blue and black colours are allowed.

o ii Equilateral

iii Isosceles & right

ol

Write the formula of size pizza with

raisin.

Probability.

$$\frac{3}{8} = \frac{3 \times 100}{8} = \frac{300}{8} = 37.5\%$$
