Q#3
1-Introduction
Ibn-e-Khaldun gave the concept
of the rise and fall of civilization.
In this concept, he contended
 that the sole reason of rise and
tall of any notion, tribe or society due to is I the presence and absence of
Assabiya. Similarly, he argued that
 Strong Acabiya in a State mean
Strong unified state and weak
Asabiya refer to weak, disunited
State. This concept of his can
be traced in today and previous world where KISA rised itself or
a global power after WWII. while,
Careat Britan, USSR, and Germany
went downward in the exercions
20 century. Hencezet can be
said that the rise of nortion
and their full can be traced
in conception of Ibn-e-Khaldun
 Asabiyah.

1-Introduction Marx viewed that any cociety is developed and is shaped as per the need and demand of that economic system However, he contended that the mode of production is the goods and services preduced, reproduced and consumed ne really alligned with the relation of production Thulys a class struggle between have's and have's not came which led to the establishment of on exploitative economic system so, it can be deduced that failure to establish a balance is the mode of production mechanism eventually led to class struggle which till today is determining the social applitual and spirtue process of human life. 2-Ways mode of Production influences Social, political and Spirtual process

By modes of production, Marx rejou	
to how goods and services are	
freduced, concumed and are distributed	
in the society. The major component	
of modes of Production are Means of	
Production and relation of production	
Means of Production refer to the factor	
of production which is land, labour,	
Copital etc. while relation of production	
 means the synergy created blu	
 Factor of production and labor. Hence,	
 it create a super structure class of	
 a society where distinction between	
the bours and the haveinst	
become more apparent. Similarly, this	
eventually lead to a class struggle.	-
i e the conflict between closses over	
 maragement of economic resources.	
 21- Modes of Production influencing	
social process	
 Marx argue that the unequall	
dynamics of mode of production lead	
 to generation of wealth For or	
small segment bourgeovis. Which	

leads to caccal incorporatity and close ctruscle Like, if a factory duriner large a new technology he will inturn pay less to the labour who is hearking in the prospects of labor approard mobility in the society. 2.2 - Mades of Production in placeously political pricus This ma secret that there who awas the means of production are the main political benificary.
