2.1 Fighting or wars brings death, disability, destruction, hunger, diseases, poverty and hatred.

Fighting or wars leads to loss of human life, devastating families and communities, physical and emotional scars leaving individuals with lifelong challenges. Also leads to displacement of refugees, trauma, destruction of cultural heritage and environmental damage such as destruction of ecosystem and loss of biodiversity. Man gets control over his mind and plays havoc with everything comes into his mind and dyes the earth with blood of his race.

War or fighting takes every body to his next possible prey to tear it into pieces to satisfy his brutality. A very relevant and timely examples are USA and Afghanistan war which comes to end by only negotiation after so many years. The Israeli - Palestinian conflict is still a longstanding and complex issue with deep historical, cultural and political roots. It just leads to humanitarian crisis, death, destruction, hunger, environmental damage & political instability.

2.2

china left war and move forward towards planning of economy, social progress & left behind many countries of world in prosperity & power.

china a fast progressing country, affluent in economy, leader in technology, strong in health, serene in society, teaches the lessons to world that maintaining peace, avoiding war to win the race of success and happiness. The nation give attention to the education of their masses, explore them through technology to become prosperous without getting involved in war to loot the resources of other nation. china although involved in wars many times, the sino-indian war of 1962, Russian conflict 1969, and vietnam fight in 1972. It soon realized that real power is power of prosperity and economic strength. Now china is playing and world is appreciating its role. It has given more importance to education, agriculture, industry, promoted these with monetary incentives of tax exemption and cheaper energy supply. The difference is obvious, its gains are much higher than the so called benefits of wars.

2.3 Great nations manage gender equality and provide opportunities which leads towards peace and prosperity:

A great nation prioritize gender equality, providing opportunities for all individuals to thrive, leading to peace and prosperity. A great nation build on foundation where every individual has access to equal opportunities, resources and rights. when women are given to equal opportunities in education, employment, incentive respect and leadership, they will contribute significantly to economic growth, social development and political stability. This in turn leads to more strong, healthy and inclusive society where everyone can thrive. By prioritizing gender equality a nation can break down barriers, challenges stereotypes and create a culture of mutual respects and understanding. As a result Nation can uses the benefits, leading to a bright future which makes nation wins without wars.
