CSS 2025
August - 2024 (Mock-4)

ENGLISH ESSAY

The worst disease in the world
today is Corruption

Outline:

Introduction of Worst Disease

- Muslims and Transparency International

Worst Disease in Pakistan

- Disease curers are effected by this worst disease
- Pharmas and Doctors nexus effected by worst disease.
- Doctors and Govt. Accounts offices nexus depriving Government Servants of free medical due to worst disease
- Karachi is suffering due to this worst disease

Effects of this worst disease on Pakistanis

Neighbour countries and worst disease
India and worst disease love and hate relation
Iran and Anglo-Iranian Oil Company

- Paving the way for the worst disease
Afghanistan during American Invasion and the worst disease
- Bangladesh students vs. Sheikh Hasina and worst disease
- Middle East and Africa and the worst disease
 - Govts toppled in Libya, Yemen, Iraq, Syria and Sudan and the worst disease

Terrorism and the worst disease

- Terrorist organizations bribed and used through worst disease against enemies

USA and the worst disease

- In Every conflict in the world USA hands are dirty with Corruption and effected by worst disease.
- Justice System and worst disease
- Traitors are born as a product of this disease

Conclusion

- Indeed the worst disease
- Made world less than a hell

(3)

The worst disease in the world today is Corruption. It has claimed more lives than the accidents all around the world. Corruption in its outer sense is considered not much deadly.

But in reality its effects are far more intense than what one can imagine.

It affects the morals of the people.

It is rooted in human nature of greed.

This greed and the worst disease leads to selling morality. Corruption is the

root cause of all the injustice in the world. Corruption is not only

of material nature in terms of money

but also of influence, protecting

the wrong doer and interfering in

the normal discourse of procedures.

Protecting someone for getting benefits

from him in return it can be

of material nature or for power

acquisition that will be explained

later here how it takes place.

Being muslims corruption is

considered haram in our religion

and muslims are strictly

prohibited to do so any such

act. In Hadith it is mentioned in the following words

"The one who gives bribe and the one who takes bribe the destiny of both is hell." (Hadees)

Even though the Holy Prophet (PBUH) has considered it such an ill and prohibited act but even after that Muslims are more effected by this worst disease although its spread all around the world.

According to **Transparency International Report 2023** which is the latest one that published. No Muslim country is in top 10 least corrupt countries of the world according to **corruption perception index 2023 of transparency international 2023 report**.

Pakistan the only Islamic nuclear power in the world ranks at **133/180** with a score of **29**. The top 10 countries include Denmark, Norway, Germany, Luxembourg, Finland and others.

In Pakistan the above rank is justified and seen in practice as every govt. department is effected

②

by the menace of corruption. This is not done by either people belonging only to lower class but its also done by people belonging to lower, middle and higher classes alike.

Even the curers of this worst disease i.e. Anti-Corruption department, National Accountability Bureau and other internal and external accountability and corruption controlling departments are itself effected by corruption. Not everyone is corrupt but corruption is found everywhere and in every walk of life.

There are incidents where Anticorruption and NAB officials have committed corruption not just of material nature but like keeping a person in their lockups without any solid evidence and due to political agendas and working on the directions of the present gorts. its not a recent example its happening over decades that they are being used for political engineering of the political parties.

Similarly, the judges are also compromised, either due to influence, pressure or threats or material greed.

Above we can see the curers of this worst disease of corruption are also effected by corruption, now we see the Doctors who treat all the diseases of patients but unfortunately they are also effected by a disease and that disease is the worst disease in the world and that is corruption.

Doctors and pharmaceutical companies nexus involved in looting patients and depriving them of their hard-earned money is also a corruption.

Doctors due to their commissions and other incentives only recommend expensive multi-national companies drugs. This argument can be bought here that patients demand MNCs drugs/medicines but not everyone does so, as majority of the population in Pakistan and globally is poor and middle class so their argument can be valid for 5-10% of the patients or

for highend localities. But why even the poor who cannot afford the medicine even cheap or expensive are also given the same medicine irrespective of the fact that they can't buy them. Such patients are forced towards taking loans as doctors have not provided them with an option to purchase the same formula. In market drugs with same formula are sold at 10 times of the prices but doctors do not recommend the formula but recommend medicine of a specific brand which is the worst form of this disease i.e corruption. Doctors do this for their commissions in the medicines and trips abroad are also sponsored by pharmaceutical companies and gifts are also given to doctors and even cash is given at some instances. Their personal expenses are beared by pharmaceutical companies. This is the corruption as you are not performing your duties according to your oath which you take as a doctor when you wear the white coat.

All this corruption money is considered as marketing expense by pharmaceutical companies. and the biggest of all expenses even more than 50% is marketing expense even seen at 85% of the companies total expenses. This is the reason **drug regulatory authority** allows only **5%** as marketing expense.

Similarly, this marketing expense is also allowed to the tune of maximum **10%** according to **Income Tax Ordinance 2001**. Any expense in marketing head above 10% is **disallowed** i.e. they cannot claim any tax benefits.

Doctors and Accounts offices of Govt are also operating a nexus where all of the medical related funds are withdrawn by doctors and Accounts offices staff by fake receipts and bills just after the budget which leads to no money left for genuine government servants to claim their medical expenses and bills. Such acts can at times claim lives of people who are suffering financially and are

8

unable to afford the medical expenses. Their greed of few bucks has lead to someone else loosing their lives.

This corruption is not just limited to doctors or Anti-Corruption or Accountability departments but its spread all across the department. One of the most notable example in Pakistan is Karachi, where gutkas and other tobacco based or related items are allowed in Karachi by police as they take bribes from the factories and sellers and are putting the lives of citizens in danger as such products are cancerous and can causes cancers of mouth and other types. Similarly sanitation and waste management departments like Karachi waste management Company and Karachi Municipal Corporation are sleeping and the city is experiencing piles of waste all around the city adding to the worst picture of the city. Similarly roads and streets are damaged and require

repair but everyone is sleeping, recently Karachi has seen a lot of rise in snatching and looting events by thieves and at some instances people were also shot during snatching. This is a big question mark on the performance of law enforcement agencies that the city is bleeding under their nose. In Quran it is said by Almighty Allah

"A person who kills one human being is equal to he killed the whole humanity."

This is the situation of Pakistan but this worst disease of corruption is not just limited to Pakistan but is worst disease of the world.

Its spread in our immediate neighbour India, both the countries got independence from Britain in 1947 on 14th and 15th August Pakistan and India respectively.

Corruption in India is also deeprooted they have different scams

exposed in its history the notable ones "Harshad Mehta Scam 1992", "Telgi Scam 2005". There are also reports which exposed the worst disease. **Hindenberg Report on Adani Group** reports its inflated price and market value and after the bubble was blown by the report Adani group's market value crashed. The report says Adani group has done excessive borrowings from Banks to acquire its new ventures and this borrowing has a large portion coming from Public Government banks. This indicates that the worst disease had played its part here as well.

Telgi Scam was a stamp paper scam where the govt. treasury was being looted as the stamp papers were printed by them privately and sold around India and government treasury was getting nothing in return. This was a huge loss to the government treasury and exposed

the involvement of several government officers and departments even politicians were involved where everyone was getting its due share as agreed, for ignoring it and letting it run without paying any heed.

Iran is also Pakistan's neighbour and its funding to different groups around the world like Hez bollah, Haoutis and other small and large factions across the globe, so that they operate as Iran's proxies and work for their agenda at global level. Iran and Iran's Anglo-Iranian oil Company was the bone of contention due to Iran's oil reserves and the worst disease was used by western powers to topple several gov'ts in Iran so that they continue to get the major share of Iran's oil i.e 84% and 16% was given to Iran. This caused a resentment among the people overtime and resulted in several blood baths by USA and Britain supported governments against their opposition

as well as general public on the roads. Reza Pahlavi was the last ruler of Iran who was inclined towards west after that Iran's revolution came and everything went out of western hands and Iran became their worst enemy who was once a close ally. CIA was used multiple times by bribing oppositions and different parties helping them acquire power and led them to work for them.

Arranging mass protests against the Pahlavian people centric government of Muhammad Mossadegh, which resulted his government's toppling.

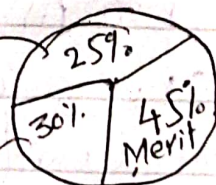

Corruption has always been used as a tool to implement agendas.

In Afghanistan during American invasion the pro American Afghan govt. had done a lot of corruption in the country and had amassed a lot of wealth through corruption so when USA and NATO were leaving Afghanistan the government

also fled with all the corruption earned wealth to abroad.

Once our part Bangladesh is also rooted in corruption, the worst disease in the world today. Bangladesh who got separated from Pakistan in 1971 had recently mass protests by students against the corrupt practices of the government of Sheikh Hasina Wajid, daughter of Sheikh Mujib-ur-Rehman the founder of Bangladesh. Students demanded abrogation of employment quota for the families of freedom fighters as it was 30% which accounts a huge percentage. By accounting for all the quotas it comes to around 55% and the merit quota stands at only 45%.

All other quotas
Combined

Freedom
Fighters
Quota

As Bangladesh also has a large young population which is unemployed and seeking employment.

But due to this freedom fighters quota there were several irregularities were found, and seen that government blue-eyed individuals were getting jobs on this quota and the general youth was not getting jobs.

As open merit was only 45% so their chances were very low.

These malpractice lead to Bangladesh's youth to overthrow the govt of Sheikh Hasina Wajid who was 3rd time Prime Minister of Bangladesh.

Middle East and Africa also has seen this worst disease playing its role. Where using it and due to people being morally corrupt, it's easy to lure them to money. This has resulted several stable government of Libya, Syria, Yemen, Sudan being thrown by supporting their opposition and funding

them so they become their allies and proxies.

Terrorism is also rooted with this worst disease. Terrorists are the hard-core mercenaries who for money can attack on the payer's enemy. If they fund them they will attack their enemies and use every tactic against them. USA has over the years used the worst disease to manipulate groups and people in its favour so that they favour him and in return it will offer them money and power that after getting money and removing the previous govt USA will make them believe that it will accept them and get them recognized as a power at international level.

Justice system is no different its also sold in the hands of those who carry the worst disease with them and effect them.

5

Traitors are born in result of this worst disease for them corruption will make them rich and they are willing to even compromise everything even their country and religion for it.

As we can see the situation in today its in no way a reality that Corruption is the worst disease in this world today.

As learnt through various past and present example we know that this worst disease makes world only less than a hell. As it kills people. Diseases are spread due to it. People lose morals and compromise on them. They become traitors in this greed. They commit crimes due to this. They hide crimes for it. They cause mass-murders of their opposition. They plan and execute attacks and kill their enemies without having on their hands any traces of the event. Corruption is the world's worst disease no medical disease can

be compared with it. Efforts should be made to curb this in order to make this world a better place to live.
