

Mock Exam 01

Essay Topic :

" Climate Change : Causes and Consequences. "

Brainstorming.

Outline

Introduction

hook

General statement

Thesis statement

Main Body

⇒ Causes of Climate change:-

(a) Green house gases

(b) Burning of fossil fuels

(c) Deforestation

(d) Transportation

(e) Industrialization

(f) Waste disposal.

⇒ Consequences of Climate Change:-

(a) Global warming

(b) Health Problems

(c) Desertification

(d) Droughts

(e) Floods

(f) Heat waves

(g) Water and food insecurity

(h) Loss of Biodiversity.

Conclusion :

Introduction :-

"We are the first generation to feel the impact of climate change, and the last generation that can do something about it", said Barack Obama. Climate change is a global factor. Earth's climate is changing very faster than at any point in the recorded history. It is neither a new issue nor a settled one, in fact its raising with each passing day. Developed nations are dealing with it in a good manner. Whereas the developing and under-developed countries are still struggling. Unfortunately, Pakistan is one of them. The main factors leading to climate change are the emission of green house gases, burning of fossil fuels, deforestation, transportation, industrialization and disposal of waste materials. The main consequences associated with climate change include global warming, health problems, desertification, droughts, floods, heat waves, water and food insecurity, loss of biodiversity & biodiversity and soil erosion. These consequences are not new in nature but their intensity is far greater in developing and under-developed nations like Pakistan.
