

Essay

①

Progress is Impossible without change.

- 1) Introduction
- 2) ~~Thesis Statement~~ Not numbered separately, as it is a part of intro.
- 3) Crunch paragraph. Wrote a topic specific heading
- 4) How Change acts as a catalyst for new ideas and advancements. The topic is not saying change facilitates advancement. The topic is saying progress cannot happen without change.
 - i) ~~Technological advancements (e.g. the Internet).~~
 - ii) ~~Industrial Revolution~~
 - iii) ~~Environmental Sustainability.~~
 - iv) ~~Healthcare innovations.~~
 - v) How Change fosters Creativity and new Solutions.
- 5) ~~'The Impact of Change and adaptation on organizational and personal growth.'~~
 - i) ~~organizational Growth through Change.~~
 - ii) ~~personal Development through Change.~~
 - iii) ~~opportunities for growth.~~
- 6) why progress is impossible without Change. This is the topic.

1100

i) Innovation Requires new Approaches.

ii) Adaptation to new Challenges.

iii) The Problem-Solving Process drives Progress.

iv) Encourages Learning and Growth.

v) Societal changes.

Vague headings. They do not clearly point to topic

7) Conclusion:-

“Progress is impossible without change, and those who cannot change their minds cannot change anything.” (George Bernard Shaw)

You cannot use the statement given in the topic as an opening statement. The purpose of the essay is to explore the given statement. Not reiterate it.

This statement encapsulates the intrinsic link between change and progress. Progress, whether in technology, society, or personal life, is often seen as the path toward improvement, advancement, or growth. However, this path is never straight; it requires a willingness to break away from the status quo and embrace the

Word proximity

Word choice

unknown. Change, while often daunting, serves as the driving force that propels us forward. Without it, stagnation prevails, and progress becomes an unattainable ideal. Therefore, it is evident that the pursuit of progress in any sphere is inherently dependent on our capacity to accept and drive change.

grad person

True progress can only be achieved when individuals, societies, and industries are willing to challenge the status quo and embrace the inevitable change that drive innovation and growth.

Thesis statement is part of intro
It is not written separately

Self imposed condition

Indent. Directly address the point in the beginning of the topic

Change is the foundation of all progress, whether in technology, society, or personal development. By embracing change, we unlock new opportunities and push the boundaries of what is possible. Technological advancements rely on innovation; societal progress depends on challenging outdated norms, without

change, we risk stagnation and miss the chance to evolve into a better version of ourselves. Create a more advanced and equitable world. therefore, progress and change are inseparable, and only by accepting change can we truly move forward.

This is the repetition of the central idea.

Indent

firstly, technological development is the overall process of invention, innovation and diffusion of technology or processes. therefore, technological change is a social process strongly biased in favor of the financial interests of capitals. there are no currently well established democratic processes. Such as voting on the social or environmental desirability of a new technology. that would allow average citizens to direct the course of technological change. technological change is the first step for progress.

Too long for a topic sentence. No clear argument presented in the topic sentence.

Unnecessary detail
No clear idea

Irrelevant to the topic. The discussion should be based on idea not an example. The discussion from technological aspect is too broad to start the topic with. It should start from human or sub-human category.

This reads like a suggestion

(e.g., Zoom, Microsoft Teams) and collaborative platforms (e.g., Slack, Asana)

Naming apps does not count as an specific example.

What change? How does that show that change is imperative to progress.

represents a significant technological advancement

Concluding sentence?

Industrial revolution in the outcome of a change not the change itself. Besides that phenomenon will be an example. The argument would be "A societal structure cannot progress without change in mode of production."

Secondly, the industrial revolution is a basic necessity of progress.

progress needs the industrial revolution because many poor people work in the industries their

source of income is low due to no change will occur in industries.

Industrial revolution is a thing of past. You cannot address it in present tense.

It is important in economic growth by fostering manufacturing, division of labor, and increasing returns.

According to UNIDO (United Nations Industrial Development Organization) world manufacturing production reached USD 13,543 billion (at constant 2010 prices) in 2018.

Irrelevant. You do not discuss how progress is impossible without change.

Write as a continuous paragraph.

US, China and European Union, exposing the market to a high level of uncertainty, limiting investments and future growth.

Thirdly, the change can significantly enhance creativity and problem-solving, as it often disrupts

The topic is not what the change can do or lead to. The topic is something entirely different.

established ~~business and prompt~~
~~fresh thinking~~, for instance, during
Pakistan's shift towards digital banking,
traditional banking institutions had
to adapt rapidly. This transformation
challenged banks to rethink their
strategies and develop innovative
solutions. This collaborative approach
and the necessity to adapt to
technological advancements spurred
creative solutions and led to
more efficient and customer-
centric banking experience in
Pakistan.

Concluding
sentence?

You gave already
discussed the
technological aspect.
This is redundant.

Also do not discuss
what needs to be done.
Discuss how without
change progress
cannot be made.

Growth, change and adaptation
are crucial drivers of both
organizational and personal growth

Two very separate domains. Should not be discussed in
one paragraph

In organizations, change often
involves restructuring, adopting
new technologies or shifting
strategic goals. These changes
can lead to improved processes
enhanced efficiency, and a more
competitive edge. For example, a
company that embraces digital

This is not an example

transformation may streamline operations, offer innovative products, and better meet customer needs without change, stagnation can set in, hindering progress and limiting opportunities for growth. Embracing change enables individuals and organizations to evolve, innovate, and ultimately achieve greater success.

Similarly, the progress is impossible without change due to many reasons but some are describing here. The innovation requires new changes. New changes improve the economy, education sector, social sector and so on. On the other hand the main constituent of change is the problem solving process drives progress and encourages the learning of growth.

In conclusion, progress is fundamentally intertwined with change, whether at an organizational or personal level.

The ability to adapt and evolve in response to shifting circumstances is essential for growth and development. ~~Change disrupts the status quo, challenges existing practices and opens up new opportunities for improvements and innovations. Without change, progress stagnates; and the potential for achieving greater heights remains unrealized. Thus, embracing and navigating change is not just beneficial but necessary for continual progress and achieving meaningful development.~~

Not discussed essay

Lacks sufficient length and proper structure.

Work on paragraph structure. Work on expression and language. Work on understanding the nuances of the topic. Learn how to break the topic down. There should be academic understanding of the concepts. There is no research in the topic. No academic references. Work on incorporating those in the essay.
