

Causes

Industries  
Green house gases

~~Release of chemical~~

Depletion of

ozone layer

Solar Energy

Volcanism

Earth quake (Tectonic plate)

Climate Change

~~Remedies~~

Reforestation, Solar Energy

~~Green transportation~~

Alternate source of energy

~~Latest technology~~

~~Reduction of fossil fuel~~

Consequences

increase in temperature

melting glaciers

Rising in sea level

Cyclones, floods

~~Heat waves~~

~~Heavy rain falls~~

Loss of earth fertility

Date: \_\_\_\_\_

# Climate Change Causes and Consequences

Day: \_\_\_\_\_

## Outline

Date: \_\_\_\_\_

1- Introduction

2- Causes:

(a) Industrial Revolution

(b) Deforestation

(c) Release of Chemicals

(d) Ozone Depletion

(e) Earth quakes

(f) Solar Energy.

3- Consequences:

(a) Increase in global temperature

(b) Warm years / Heat waves

(c) Losing Earth fertility

(d) ~~floods~~ Floods and impact on Economy.

(e) Heavy rainfall

(f) Higher process of decomposition.

4- Remedies.

(a) Reforestation

(b) Using alternate source of energy

Day: \_\_\_\_\_

Date: \_\_\_\_\_

(e) Using Solar Energy

(d) Latest technology technology

(e) Green transportation.

5- Conclusion.

→ Need comprehensive  
Outline

→ Self explanatory  
phrases

## Introduction:

Dancing around the fire is not a solution to any ~~problem~~. One should try to see beneath the surface to grasp an ~~idea~~ about the basic issue. Despite a stream of strong words by the various rulers of Pakistan Nothing concrete ~~have~~ been done ~~to~~ In order to counter ~~climate change~~ in the country. Rather the situation has been taken a quantum leap for the worse. Climate change is ~~neither~~ <sup>neither</sup> ~~neither~~ new issue nor it is fully settled one. Developed countries are dealing with it successfully ~~whereas~~ in underdeveloped countries like Pakistan. it ~~occurs~~ ~~or~~ became a ~~major~~ threat. ~~to~~ all ~~forms of life~~ Industrial revolution, Deforestation, Release of chemicals,

Ozone depletion, Earthquakes and solar energy are the major causes of climate change. These causes have drastic consequences: Increase in global temperature, Heat waves, Losing earth fertility, Floods and its impact on economy, Higher process of decomposition and heavy rainfall.

Reforestation, Using alternate source of energy, Using solar energy, Latest technology and Green transportation are some effective remedies. Unless the issue of climate change addressed properly, Pakistan can neither become prosperous nor respectable.
