Mock Exams CSS 2025 (August)

Topic = Nations do not die from Invasion, they die from internal Rottenness

Brainstorming:

# Outline:

## 1- Introduction =

How nations die due to internal factors.

### • Thesis Statement =

Nations are more likely to collapse due to internal decay than external invasion.

Explain a bit

## 2. Historical Examples:

i. Rome's decline, The Soviet Union,

The fall of Qing Dynasty,

## 3. Internal factors lead to fall of a Nation:

i) Political corruption and ineffectiveness

ii) Economic mismanagement. iii) Social

inequality (iv) cultural and Moral

Decline (v) Religion.

You need to enlist

## 4. Comparative analysis: Internal decay vs External invasion.

i) Short term impact of internal decay external / invasion.

ii) Long term impact of internal decay.

## Lessons for future:

To address internal issues, strategies for strengthening national resilience, Bangladesh, India.

## Conclusion:

Thesis statement, importance of maintaining strong internal structures.

This is not a way to attempt paper  
You need to make elaborative headings  
You have to specifically discussed the asked part

## Essay

"Civilizations die  
from suicide,

You need to link the statement with the asked part

Not by murder"

(Arnold J.)

Throughout history we've seen many nations formed and got destroyed. But if we reflect on the main reasons that lead to its destruction and change mostly it happens to be the internal causes that destroyed it. The thought that nations are

more likely to collapse due to internal decay than external invasion if we reflect at history it has been proven to be true.

Do not use 3rd person pronoun

~~Let's take an example of Rome, a well developed~~

You need to rephrase sentence  
Add topic sentence

country that once ruled over the world got destroyed due to corruption, injustice, inequality. The Soviet union collapsed due to mismanagement lack of trust of people, and instability. The Qing Dynasty's fate was same as of them.

This is not the structure of essay

When people are like the bricks of a nation. And when those bricks are filled with greed, injustice, and lust for power becomes weak and eventually, the infrastructure of the nation collapses.

(2)

You are not following the structure

Follow subject verb agreement

Many nations today as well face such problems. There are many reasons of internal factors that lead to fall of a nation. Political corruption is a major cause in order to remain in power most of the influential people take advantage of their power and bribe to remain in power.

How it is linking the with the asked part

Ineffective people given the chance to withhold important positions only because they're loyal to the person whose in power as a result of which they don't think about the people but themselves.

Economic mismanagement unequal distribution of money leads to a corrupt society when people are

not paid enough and see that ~~that~~ <sup>Too general</sup> seniors are doing nothing but getting more they tend to become disloyal towards their job and as a result of which an immoral society takes place.

~~Let's take an example of India, today in~~

~~order to remain in power the current government officials take advantage of their past with Hindu-Muslims dispute and give air to flames of hatred and the nation is divided between Hindu-Muslim conflict. The officials make fake promises and as a result of which protests happens and people starts disobedience and the society will not be~~

peaceful. If the nation is divided like that the progress of the nation will be retarded. Due to internal conflicts the nation will not be able to match the developed countries.

This is not a way to add references  
Merge with arguments

"All nation can survive  
It's fools, and even  
The ambitious. But it  
cannot survive treason  
From within."

(Maurus)

"The decline of a  
Nation is not an  
External event, but the  
Gradual degradation  
of its values and  
spirit."

(Unknown)

"A house divided  
Against itself cannot  
Withstand."

(Abraham Lincoln)

Let's compare the internal and external factors on a nation. When a nation is being invaded it falls into temporary destruction when the new ruler or the government forms they work for the betterment of the nation. But when the country is being destroyed from within inside it's almost impossible for the nation to save itself from permanent destruction. So, we can say that an ~~inv~~ invasion has a short term impact on a nation and internal causes a long term impact on a nation.

In order to save a nation from this disaster a nation should address such p. issues to public.

Make new policies for strengthening national resilience. Make ~~strict~~ policies for corruption, injustice, and check thoroughly. We can take the example of Bangladesh, the people of Bangladesh stood together as a nation and fought against the corrupt government. That's the best example today we can see to set as history for other nations to follow.

There is a need to make formal argument

In conclusion, we can say that, nations are more likely to collapse due to internal decay than external invasion. It is important for a nation to stick together as a nation and do not fall prey of greed, injustice etc. The

religions around the world  
has also manuscripts about  
such injustice these things  
in a society destroys the  
society and thus in result  
as a whole nation.

Make bit elaborative

Your arguments are not justified you have  
not given the concert evidence  
Most the arguments are not structured
