

Brain Storming

Outline

1. Introduction

1.1 Hook / Attention Grabber

1.2 General Statement

1.3 Thesis

2. Main Body

2.1 Causes of Climate Change

2.1.1 Increased Human activities

2.1.1.1 Increased carbon emission from motor vehicles

2.1.1.2 Increased use of plastic and plastic products

2.1.1.3 Rapidly increasing human population

2.1.2 Industrialization

2.1.2.1 Rapidly increasing energy demands

2.1.2.2 Industrial waste

2.1.3 Increased Food demand

2.1.3.1 Increased Number of cattle population

2.1.3.1.1 Increased population of broiler and layers

2.1.4. Fossil fuels energy dependency

2.1.4.1 Power plants

2.1.5 Green House effect

2.1.6 Green House / Greenhouse emission

2.1.7 Deforestation

2.2 Consequences of climate change

2.2.1 Floods

2.2.1.1 Increased intensity of rains

2.2.1.2 Glaciers melting

2.2.2 Extreme weather

2.2.3 Drought

2.2.4 Economic effects

2.2.4.1 - Infrastructure damage

2.2.4.2 - Crops and Livestock damage

2.2.4.3 - Human life ~~loss~~

2.2.4.4. Change of ~~working~~ hours

2.2.4.5. Increase. spending on health.

2.2.5. Social life effects

2.2.5.1 - Increased ~~Psychological~~ problems

2.2.5.2 - Increased ~~Adversities~~ among people

2.2.6. Child Abuse

2.2.6.1. Childhood is effected

2.2.6.2 - Extracurricular Activities effected

2.2.6.3 - Greater impact on their education

2.2.6.4. - Increased health issues in child

2.2.7. Negative impact on education

2.2.8. Negative impact on human health

2.2.9. Effects on marine and territorial life

Introduction

Barack Obama

Introduction

Barack Obama quoted that "we are the first generation to feel the impact of climate change and the last generation that can do something about it". Climate change is neither a new issue nor it has been controlled successfully. Developed nations are taking measures to mitigate the effects of the climate change successfully. Unfortunately, developing nations like Pakistan that are most affected by the negative implications of the climate change, have no resources, vision and infrastructure to combat its effect. So, the ^{main} causes of climate change are the increased human activities, industrialization, increased food demand, fossil fuels burning, Green House effect, green house gases and deforestation, which have far reached consequences in the form of increased floods, extreme weather conditions, drought,
