Creative

(v) Ubiquitous

Omnipresent.

(vi) Taciturn

Reticent.

(x)

Apathy.

Indifference

(vii) Abhor.

Loathe

Q.1

**Title:** Small Acts of Corruption:  
Leading to Massive  
Destruction in Society.

**Precis:**

People often overlook the consequences of small acts of corruption. These actions contribute to a culture where corruption is normalized. When rule-breaking is seen as acceptable in small compromises, it eventually grows into systemic corruption. Nevertheless, these acts erode trust and transparency in society, leading to greater dishonesty. They negatively impact ethics and morality, and hinder long-term development. Further, corruption diverts resources and undermines merit. It breeds negative emotions and fosters inequality between the rule-followers and shortcut takers. It creates the belief that

justice is unattainable, leading to apathy. Major societal issues, such as political instability and economic decline, can result from this apathy. Ultimately, every small act of corruption contributes to massive destruction, and the choices made shape the world around individuals.

## Q-2

(a)

New Year's resolutions are often driven by impulsive or societal pressures. This makes easy to abandon when challenges arise, instead of being based on genuine, long-term commitments.

(b)

Resolutions are not only rooted in impulsive desires or societal pressure, but are also typically vague and broad, making it difficult to track progress and measure success. It contributes to their ineffectiveness.

(c)

The psychological factor that keeps people making New Year resolutions year after year, despite knowing they may fail, is the human desire for renewal. The start of a new year represents a symbolic opportunity to start

fresh and hit the reset button. It fuels hope and optimism. The feeling of a clean slate drives people to make resolutions, even though the underlying reasons for failure often remain the same.

(d)

A more effective approach to achieving lasting change, instead of making New Year resolutions, is to set practical, well-defined goals that align with personal values. By focusing on actionable plans and creating a clear roadmap, individuals can track their progress.
