Title "Corruption and its side effects"

Mostly, people ignore the probable outcomes of their trivial acts of corruption which proves to be disastrous at larger scale. Although these minor acts of corruption and bribery seem harmless in isolation but they snowball into larger ones, leading to normalization of the corruption-culture. These small compromises pave way for mistrust and injustice, thus hindering the progress and development of a society by promoting mediocrity. Furthermore, it promotes inequality which weakens the social fabric and serves as a precursor to great societal dilemmas. The only way to deal with it is integrity which means self-accountability. This leads to resistance against unethical persuasions, thus paving way for a fair world.

Ques#01

Every year, Millions of people make New Year Resolutions but most of them fail to keep these resolutions. Despite their initial enthusiasm, these resolutions tend to fade with the passage of time. The primary reason is that the goals they set are vague and the way they approach them is problematic.

Ques#02

These resolutions tend to be ineffective even though people are highly motivated at the start of the year because their resolutions are often rooted in Impulsive desires or societal pressure, which are difficult to track and keep on. Moreover, their goals are idealistic and unaligned with their day-to-day responsibilities, leaving them overwhelmed. Hence, despite the best intentions they rarely sustain their resolutions.

Ques #103

"Human desire for renewal" is a deep psychological factor that keeps people making New Year resolutions year after year despite knowing they may fail. This very desire provides them hope to start fresh as new year offers a symbolic opportunity to hit the reset button. Therefore, people are optimistic in making new year resolutions each year.

Ques #104

A more effective approach to achieving lasting change is to make a shift in their focus from symbolic resolutions to practical well defined goals that align with their personal values and are structured around achievable steps. This is the only practical way of making real, lasting Resolutions.
