

Q1:

Consequences Of Small-Scale Corruption

Majority of people do not focus on the long-term effects of small corruption. However, these small acts of corruption collectively propels a culture of distrust in society. These act can appear insignificant at start, but they have a snowball effects which leads to systematic corruption. The effects of corruption are not only limited to erosion of morality, but also inefficiency and diversion of resource for public welfare. Corruption strengthen ~~inequal~~ inequality by giving advantage to undeserving people. This leads to helplessness, hatred, and distrust in people believing in integrity. It is evident from studies that small-scale corruption makes citizens desensitized to big crimes resulting political instability, economic decline, and social unrest. Therefore, integrity should also account small actions to make fair and equitable world.

Q2:

Q1:

Most of people fail to keep their New Year resolutions, because the ~~initial~~ initial enthusiasm is short-term. People include goals such as losing weight, exercising more, quitting bad habits and learning new things in their New Year resolutions, but the enthusiasm to pursue these goals does not last long. Therefore, people fail to keep their New Year resolution.

Q2:

The resolution tend to be ineffective even people are highly motivated in the start of year. Because of wrong approach, vague goals, and disconnection between resolution and ~~reality~~ reality. The New Year's resolutions are often driven by impulsive ~~commitments~~ desires. These impulsive desires lack the genuine and long-term commitments. When people feel uneasy about the goals, the impulsive nature makes it easy to abandoned them. Secondly, the goals are broad and vague which are difficult to track. Moreover, these goals are often far from the ~~re~~ every-day reality of people. These goals ~~are~~ not do not compliment their responsibilities, and leads to a overwhelming state. Hence, because of wrong approach, broader and vague goals with disconnection with reality, people are unable to fulfil their New Year resolutions.

Q3:

The psychological factor keeps people making New Year resolution despite the failure is their desire for renewal. The human desire for fresh ~~start~~ start leads them ~~towards~~ towards making new resolutions.

at the start of the year. Beginning a fresh year provides an opportunity to revive their passion for working for goals. This desire of renewal by utilizing the ~~year~~ new year as opportunity motivates people to make New Year ~~resol~~ resolutions despite knowing that they may fail.

Q4:

The more effective approach to achieve lasting change instead of making New Year resolutions is to make resolutions that are well-defined commitments, practical in nature, and compliment their values. There is need to shift the focus from the ~~tempor~~ temporary resolutions to more lasting ones which can be attained through structured and achievable steps.
