

Can Science Save us?

Outline

Thesis Statement - Yes Science can save us through new discoveries in medicines, technology, in agriculture and daily life. However, there are many issues that will affect the daily lives of us, i.e. illegal use of weapons. People totally dependent on science and distorting the nature.

① Introduction

② How Science Can Save us?

- (i) through new discoveries.
- (ii) People have easy access of internet -
- (iii) Easy to communication
- (iv) Save us in wars with the help of weapons.

③ What are the major issues in science that affect us?

- (i) People physical health affected
- (ii) Adverse impact on nature

②

(iii) People totally rely on Science

(iv) People involve in illegal activities, i.e. - weapons

(4) What are the effective measures to handle the science.

(i) Balancing the innovation & responsibility.

(ii) Fostering resilience against misuse.

(iii) Ban on illegal use of weapons

(iv) limited access of internet.

(5) Conclusion.

Science is the pursuit and application of knowledge and understanding of the natural and social world following a systematic methodology based on evidence. A scientific explanation uses observations and measurement and new discoveries explain something that we see in the natural world. In development of science from ancient times to the present, it encompasses all the branches, i.e. - natural, social, and formal. However, the role of science is very important in present day. Science get - sciences

See in history due to new discoveries
in different fields and now it is
advance in present in more inventions
of technology in different fields.

In past centuries when people
suffered from malaria disease and
no one knows what is that and
scientists did many experiments and
invented the new disease name called
malaria and invented the medicine. But
not in the field of medicine, scientists
got success in the field of literature,
in technology, in agriculture. Major
notable work of literature are poetry
famous still in today like, William
Shakespeare, John Milton, many introduced
the poetry and wrote many novels
to develop the knowledge.

So, it is proves that science
can be see us in every field
like new discoveries, like the new
treatments in medical field, and
advanced the technology, and promote
the agriculture but there are many
problems in science that affect the
daily life of mankind, and the issues.

④

But Science can be saw us through new discoveries and the ^{the} ~~the~~ ^{is} ~~the~~ fields discussed below.

Science has been discovered many things in the world, and the major ^{the} ~~the~~ ^{is} ~~the~~ field of medicine. Scientists invented the new treatment of cancer and previous years the treatment of cancer did not be possible ~~that~~ ^{and} ~~that~~ ^{that} people died due to cancer, but now the treatment of cancer introduced and in developing countries ~~the~~ ^{are} ~~the~~ ^{are} successfully dealing with cancer patients. However, due to science people have direct access of internet, in ancient time people did not had mobiles, automobile and work with animals and hand in agriculture field. But ~~now~~ when science ~~today~~ ^{got} it success it introduced printing press machine, and people have direct access to print paper and after that ~~the~~ ^{due} ~~the~~ ^{due} to science the mobiles ~~phone~~ ^{phones} introduced ~~to~~ ^{and} ~~to~~ ^{and} people get easy access of communication. Before ^{this} ~~this~~ ^{this} invention people communicated with

While later and they get answers
in months, and now people get
answers in within seconds.
