

Can Science Save us

Brainstorming:

Outlines-

Introductions:

Science can save us in terms of health, technology, education, crime investigation, make life easy, can also strong the nation and also improved the thinking and broadened the research.

Science and health:-

- Diagnosis of Disease
- Cure of Disease
- Advancement in Medicines.

Science and education:-

- Laboratories and Lab work
- Research in Secondary level.
- Ensure practical over theory.

Science and Technology:-

- Artificial Intelligence
- Chat GPT
- Robots

Science in terms of crime investigations:-

- via DNA
- via NADRA investigation
- Tracking

Ensure Country Sovereignty:-

- Nuclear weapons
- Strong technology

Science and daily life:-

- Management of time
- Minimize the Excessive use of Resources-

Development of Economy :-

- Exhaust Metals - Minerals
- Develop (institute) Scientific institutes

Recommendations:

classmates.

- use of practical instead of Theory
- Develop App instead of playing Game

conclusion:-

ESSAY

Science has made the world a globe on which every country, nation and state is interconnected.

Science has brought the world from darkness into enlightenment. From the late seventeenth century, many parts of world is exposed to us. Science save us in terms of health, education, technology, Crime investigation and Country Sovereignty.

Science has been made great advancement in field of Health, from diagnosis to treatment. Therefore many disease like cancer, lungs infection, blood clotting, chest pain can be diagnosed via City scan and MRI. So, these do (City scan - MRI) has great contribution in diagnosis of disease. In addition to, after diagnosis, Science also has major achievement by treated these disease through - Radiation and heart Surgeries. After treatment, Science has magnificent development in Medication to helping and preventing patient from major harm. So, Science save our health from diagnosis to treatment to Medication.

In addition to, Science has also great work in educational institute. Lab has been established in every institute which ensure practical work over memorization.

of theory. So, science has made great achievement by helping educational faculty to develop lab in school from secondary to high level universities. Therefore, science broadens the thinking and research of student, providing them the opportunity of research. Hence, we can say, science save us by providing great lab work and research institute.

Moreover, science has also great work in field of technology in the form of Artificial Intelligence, Chat GPT and Robotics work. You can say, as asking anything to AI from everywhere at any time. AI limitize the world into single globe. In addition to, Chat GPT helps people in education, research work and office work. Science has made great work in Chat GPT. Moreover, science has also developed in Robotics work, which, used in variety of way from daily life to countries war. Hence, we can say that science made our life easy and save us due to it's great achievement in technology.

Moreover, science also help society from excessive crime and criminal by the help of DNA, Criminal Record and by tracking criminal. In Pakistan, Zainab Rape case, Criminal is exposed by the help of DNA verification and several other criminal also exposed due to

their criminal Record. Major Robbery case are solved by tracking the criminal by using modern technology. Therefore, science save us from major & minor criminal case by it's technology.

In addition to, Science has also save countries sovereignty by making nuclear weapons and other great war machinery for it's dominance. In History, Pakistan has three wars with India, 1948-1965-1971. But after becoming Pakistan nuclear ~~power~~ there is no war between India-Pakistan.

So, in Balakot attack, Pak strong air defence system make impossible this strike. Hence, we can say that Scientific technology has very strong impact on Pakistan Sovereignty.

In addition to, Science has also helped daily life by limitize the work time and helping in work management. Most common example is Traffic Signal, which ensure traffic to part-part on their path. Moreover, In the field of agriculture Urea, and other fertilizers has also great impact on our lines. Moreover, In the field of industry Science has made great contribution in Dying, car mechanism, computational work. Hence, Science has helped us in our daily lives.

In addition to, Science has also ensure in enhance
ment in world economy. For example, In Balochistan
there is reservoir of copper and other mineral.
Extraction of these metals has great impact
on world economy also country economy. Also,
Extracting of various metal by the help of
Scientific technologies (isotopes) has major
economy influence. Therefore, Science can
save country Economy.

Hence, there are various recommendations for
more improvements. Children and student
should have to concentrate on developing
various scientific techniques instead of playing
online games. In Educational institutes, faculty
have to emphasized on practice work rather
then theory.

In conclusion: Science save us by serving
humanity, nature and world. Science helped
in every field, health, education and technology
it helps from children to elder so we can
say, Science save us.
