4.4- Natives of country will be known to their rights and duties.

4.5- Technical growth and advancement of a country depends on knowledge.

Conclusion:

What makes a person or a human being better than any other thing in this universe?

It is of course knowledge. Knowledge that prioritizes Adam (A.S) from Angels. Knowledge that was the first revelation to Hazrat Muhammad (P.B.U.H). Knowledge a key to the world of imagination and thoughts that leads to Paradise. When a nation, an individual or a society invests in knowledge they get the best interests. This was a quote by Franklin. Knowledge impacted an individual in many ways like an individual gain his/her purpose of life, he finds the signs of Divine power, he earns good to make his life better, he learns how to live a life far better than animals. He knows that he is not an animal that eat, grow, sleep and die. He knows his norms and values. Same

is the case with society. Society breaks its so called taboos and stereotypes when it invests on knowledge. Because knowledge give it a sense of right or wrong. Society with knowledge will have peace and positivity because there everyone knows their values. Parallely, knowledge give great ~~interest~~ interest when they are invested on countries. Economic stability, peace, Technical growth, good policies, law enforcement and rule of law all leads to interests gain by knowledge investment on a country. Keeping in mind all the evidences, indeed knowledge pays the best interest when investement is done on it.

An individual gain the purpose of his life as an interest of that he invested on knowledge. As knowledge give the way to live a life a person with knowledge knows why he is made. He donot spend his life purposeless rather makes a purpose and went on it. like, Hazrat Muhammad (P.B.U.H) devoted his life to Islam his purpose was to spread Islam and make the way that leads to Jannah. Additionally, the purpose of a Muslim stated by Almighty is only known to the Muslim who gains knowledge of Quran. It proves knowledge gave meaning to a meaningless life.

Furthermore, A person that gains knowledge came to know more about Divine and his blessings. When people live in solitude or do meditation

they feel more near to Divine, and that is because of knowledge. Because knowledge gave them this sense. In the past, many Scholars and Sufis talks about Divine powers and Divine like: Bulbh Shah, He told his preachers that Divine is in your hearts when you find him, you donot need to roam around the forests and seas. Likewise, Allah asked to search him and that is only possible when a person gain knowledge.

There is a common quote that a man is a social animal, as man was a ~~monkey if we read history~~ monkey according to history it has characteristics like many animals but what makes it different from other animals is knowledge. knowledge

makes a man more civilized, educated and trustworthy. He came to know his values. He believes that he is not born just to eat, sleep or grow he has some purpose and values that is because of knowledge. In past, people were not aware of languages, they live in the jungle and cave with animals, they even donot know about dresses than they makes houses, dresses by leaves and language, all because they gain knowledge they invested on it. They came to know about their ourselves and others resultantly they are no more social animal now.

Furthermore, when an individual gain knowledge, he finds his purpose of life and resultantly he works for it. That leads to earning a good lifestyle. To

live in a civilized society, a person needs to earn money and that is by investment of money or doing job and these both are only possible by only knowledge. Elon Musk, indeed a great example here, he became a billionaire just due to his knowledge of business. He used his mind and stuck to a purpose and just gain that. Due to him, USA has grown so much. Thus the knowledge of a person can lead to advancement of countries economy as well.

Moreover, an individual came to know what is good or bad for him. If a person donot have knowledge he cannot tackle society. Suppose, a girl donot know about a bad touch or a good touch how she will tell

anyone in case of any harassment
Likewise, When a person does not
know about the effects of
smoking on his health he
will smoke without thinking about
its effects. Thus, to give an
individual sense of good or
bad he/she should invest on
knowledge.

Apart from interests gain
by individuals knowledge also
gives the best interest to
the society. Society will know
ledge will never think
conservatively that can be seen
easily around us. In Pakistan,
a boy with beard known
as "Dharrri" is said to be
pious but a boy with shave
is considered a bad boy.
Any thing done by that guy
is taken in a wrong manner.
Likewise, the act done by
daughters is ignored by

: 6/1

their mothers more often but when the same act is done by their daughter-in-laws they get ~~angry~~ furious. ~~The~~ If they gain knowledge their minds will be broaden and they will think same about their daughter-in-laws as they think about their daughters. Thus knowledge is a great investment for a society.

Furthermore, knowledge gave the interest to society in the form of that there is no gender discrimination there. If a boy of a society and a girl of the same society gain education, they enjoys the same social values, they learn the same moral lessons that society will become heaven on this crucial world. In past, Madina was the state that showcase this kind of

society. In Madina, there was no gender discrimination, there was respect for every woman. Woman was beloved in every relation when they are wives, mothers, sisters or daughters. All was due to the knowledge given by Hazrat Muhammad (P.B.U.H) and his companions. Thus, there will be no discrimination ~~of~~ on the basis of gender when society is based on knowledge.

8/10

In a nutshell, all the evidences prove that knowledge paying the best interest when it is invested on an individual, country or a society. As knowledge makes the person odd one out from uneducated people and makes a person more sophisticated thus knowledge is a great investment for an individual. No one can manipulate a person with knowledge because knowledge has broaden his vision and his way of thinking. Same goes with the society, when society invests on knowledge they don't think conservatively, they don't lead people to war, they break their taboos and they live with no gender discrimination. Interest did not end here it goes on when it is invested on countries that country leads to economic stability, technical growth and

legislatively strong when it is invested on knowledge. Consequently, if an individual, country or society invests on knowledge and not just gain knowledge but implement it, this world will be a better place to live on.
