Q-NO-7

Once, African philosopher said that when britishers came to Africa. They had passion and we had land. They (Britishers) said we are here for the sake of your development. We blindly followed them, the moment we touched reality we had passion and they had our land. Similarly, when social networking science came, then they had facebook and whatsapp, they said this is free to use. Again, we blindly believed them, when we woke up to the reality by the time we had facebook and whatsapp and they had our free will and personal information. Thus, whenever something free of cost is offered, we have to let go our independence as a price for it.
