

"An investment in knowledge pays the best interest"

Work on presentation. This is unacceptable.

Outline

① ~~Introduction~~

1.1 Attention grabber ~~Write a short description of it.~~

1.2. Thesis statement: ~~Knowledge is power - holds true in all the era especially in today's modern era. It is because of knowledge that individuals develop and countries prosper. Knowledge let the countries to create effective policies, technological advancements, highlights new ways of solving people's problems and creates awareness about people's rights. So, knowledge investing in knowledge will do wonders at individual level and collective level too.~~

Thesis statement is too long

Does not address the topic

② ~~Effective economy via junction of knowledge bearing actors~~

2.1. Informed policies

2.2. Exploring new ways of solving problems

③ ~~Knowledge; reason behind technological development.~~

3.1. AI, machine learning etc

3.2. Research and Development department is a product of knowledge

④ Knowledge produces ~~holistic~~ view of the world

4.1. Philosophers like Tabbar bin Hayan and others

4.2. Scientific theories and research articles. ~~about~~

⑤ Knowledge draws line between right and wrong

5.1. Creating morally upright society.

⑥ Educate people about their rights and rest will be done automatically.

6.1. women Supprage Movement

⑦ Critical Analysis

The whole essay is critical analysis. A separate heading titled that doesn't make sense

⑧ Conclusion.

Short outline. No. of body paragraphs should be 15-17

You are writing benefits of knowledge, not how investment in knowledge pays the best interest

All of your essay is based on state. This is an abstract essay  
70% of your topic should be on individual.

"As Knowledge increase, wonder deepens"  
(Charles Morgan)

Write in 3rd pwr

The world around us ~~has~~ was not same thousands of years ago. Humans have evolved from caves and stone age to industrialization and urbanization. Previously, when there were no inventions made people had primitive ways of life.

Even the light which falls on this paper was not created.

Don't write like this.  
Don't address yourself or your writing.

People used to rub stones to have fire for the purpose of light but today ~~his~~ source the source of light is the smallest invention, which was a big achievement back

when Thomas Edison invented it. Even the paper itself was not a thing until china

No example in an intro

created it. These all phenomena are an outcome of knowledge realization, knowledge exchange and knowledge implementation.

This means if a country wants

to do wonder she simply  
needs to invest in knowledge.  
The coping mechanism of developed  
countries is strong because of their  
informed policies, exploring new ways  
of solving people's problems and  
technological advancement.

Hence, knowledge is the most  
useful investment that one can do.

Unstructured. No relation to the  
given topic, no structure.  
Also short intro

Intro should be  
200-250  
words.

When economy is in the hands of educated people then nation keeps on progressing at a sustainable rate. All the great economists such as Adam Smith, Alfred Marshall and others have focused on education. Adam Smith studied social philosophy at the University of Glasgow on scholarship. His ideas about economy have shaped many policies and consequently have benefited many countries in nation building. His idea about market competition is adopted by China and the position of China is well known.

No relation to how investment in knowledge pays the best interest.

You are writing what Educated people do.

No structure to paragraph

to all! The educated policy  
makers and economists makes  
the policies specific to the  
country's urgent need and  
saves the nation from disintegrated  
tion

Directly address the argument in the topic sentence

World trends are  
and ways of life are changing  
and so the modern problems  
will require modern solutions.  
Increasing population, climate  
change, water scarcity, energy  
crisis and all other problems  
that many countries are facing  
currently requires modern  
solutions which is only possible  
when the policy maker is  
educated enough to carve out  
the needed solution way out.

Sweden's government uses  
52% of the trash and garbage  
to make energy to satisfy  
nation's energy needs. There is  
another expedition in the  
Atlantic Ocean, where the  
oceanographers says there  
are such minerals which can

be used to generate energy.  
So, governments and policy  
makers when educated ~~then~~  
they know how to take such  
decisions which will help in  
the progress of the nation.

Again the paragraph discusses the importance of educated people not how investment in knowledge pays the best interest.

Knowledge isn't limited to just education

Technological advancement is the best depiction of how knowledge building and knowledge exchange can revolutionize all the sectors of any country. The evolution of Facebook, chat gpt and others shows the level of knowledge build up and usage involved in these. From "Facemash" to "Facebook" the social app has gone through numerous changes. ~~Study~~ New features keep adding on like ~~post~~ initially it was just an app which would allow students to communicate with each other. but later features like Newsfeed and timeline ~~increased~~ the scope of facebook. Then, the contemporary shows us the rise of chat gpt which is a product of generative Machine Learning. ~~Therefore, the~~ on the basis of knowledge technology is growing day by day.

Knowledge about ~~on~~ space, sea, ~~wildlife~~, societal issues, religion etc, allows individuals to develop theories, ~~articles~~ and research work regarding these topics. Previously philosophers used to think and observe, their intensity of thinking was so high that they even used to question their physical existence.

Philosopher like ~~Jabir Ibn Hayan~~ gave the concept of ~~Asabiya~~ which means unity. He explains

the rise and fall of nations which is applicable in today's society as well. Asabiya can be applied to the fall of Ottoman Empire as they lacked internal cohesion and unity.

Then, the concept of Allama Iqbal's Khudi (Self ego) which explains the relation between God and mankind.

"Khudi ko kar buland itna kar  
har taqdeer say paiky  
Khuda bandy say khud pochy  
sata teri Maza kia hai"

You cannot write roman English. Also don't write quotes outside of paragraphs

These philosophers have not given theories on concepts on basis of mere thinking but on basis of observation and knowledge.

Similarly, many scientists have given theories which helps to explain the scientific and biological phenomena. Theories like Newton's 3rd law, ~~and other such theories are all because of knowledge.~~

How we would know phospholipid looks like of plasma membrane theory or Fluid Mosaic model would not be given. The structure of cell and DNA is also explained by scientist because of the knowledge that they had. So, knowledge has done wonders to and for the mankind.

Something is moral  
or not is judged on the basis  
of some standards; these  
standards are set by education.  
Education guides individuals  
behaviour about what is wicked  
and good. The Education guides

~~guides people in all aspects and areas of life. In the political arena, acts like lack of accountability and transparency, non-fulfillment of basic rights of people and such all acts are highlighted as immoral by the books, theories, articles, etc. At societal level, crimes, deviance, neighborhood rights non-fulfillment are all termed as immoral by different subjects and theories. In this way and others, education draws a thin line between moral and immoral which keeps people away from immorality and also from nation's destruction.~~

~~Depriving people of their rights is the worst thing that a state can do with its people, but even more worst thing is when people are not even educated about their rights and so cannot do anything~~

to get their rights back.  
 This happens in different cases like if the people are not educated enough, the basic necessities are not available to them like those of rural areas and when women of that place are not educated. If any of the above condition is removed, as per the requirement of place, then people will strive to get their rights in place. Back in 1848 when women's suffrage women happened in which women gathered to get their right to vote. The right to vote is the basic citizen right that every citizen ought to have. Struggle of women paid off and the first right to vote was granted to the women of New Zealand. So, when the people become aware of their rights then they will work to get them.

How does that relate to investment in knowledge

Far knowledge is the basis of everything. Nations and individuals should invest in knowledge if they want to progress in the long run.

To sum it up, investment in knowledge acquisition, knowledge creation and knowledge implementation is the best investment. The rapidly changing environment requires updated and informed policies, technological advancement and modern solutions to modern problems. all is possible by the power of knowledge.

Not a proper conclusion. Does not follow proper structure

You need to practice formal writing and Study how to break the topic down. Work on paragraph and outline structure.
