- (iv) ~~limited~~ access of ~~internet~~

(5) Conclusion.

Science is the Pursuit

and application of ~~knowledge~~ and understanding of ~~the~~ ~~natural~~ and social world following a systematic methodology based on evidence. A

Your sentences are ambiguous

Scientific explanation uses observations and measurement and new discoveries explain something that ~~we~~ ~~see~~ in the natural world. In development of

Science from ancient times to the present, it encompasses all the branches, i.e. natural, social, and formal. However the role of science is very important in present day. Science get ~~useless~~

See in history due to new discoveries
in different fields and now it is
advance in present in more inventions
of technology in different fields.

Not a topic sentence

in past centuries when people
suffered from malaria disease and
no one knows what is that and
scientists did many experiments and
invented the new disease name called
malaria and invented the medicine. But
not in the field of medicine, scientists
got success in the field of literature.

Informal writing

Why are you telling this to me?
How can you relate Shakespeare
to science?

technology in agriculture. Major
contributions were of literature are poetry
forms still in today like, William
Shakespeare, John Milton, may introduced
the poetry and wrote many novels
to develop the knowledge.

Sentence structure
mistake

So it is proved that science
can be seen us in every field
like new discoveries, like the new
treatments in medical field and
advanced technology, and promote
the agriculture but there are many
problems in science that affect the
daily life of mankind, and the issues.

④

But Science can be saw us through new discoveries and the field of Science in different fields discussed below.

Science has been discovered many things in the world, and the major field of science in the field of medicine.
