

Work on your grammar and sentence structure

Choice of jargons should be more mature

Improve coherence of ideas

Outlines:

- 1 Introduction
  - a) Hook
  - b) Background / General Statement
  - c) Thesis: Despite living in the science world, science cannot provide us the essentials of life. Science has failed to save us from drought, food insecurity, destruction of belongings and from the diseases and death.

science has failed to save

2 Main Body

- 1 Sectors where science seems to have failed us: (Anti-thesis)
  - 2a) Science solving the water drought with major inventions of water storage bodies
  - b) Three Gorges Dam of China, a marvel of science
  - c) Dam of Pakistan solve the major water issue of the country

Show certainty in your arguments

Incorrect structure

- 3b) Science save human beings from the food scarcity, food availability. Science increases the production of food to compete with increasing population.

Wheat (a staple food of Pakistan) is hexaploidy in nature; science saves the shortage of food crops. To maintain the nutrients of the crops; science introduces the concept of fertilizers (NPK).

4 Science saves us from Natural Disasters  
Science especially from Natural Disasters  
increasing danger e.g. March 2021  
on high level from coming storm

5 Science save us from deadly diseases  
Cancer can be cured with the help of  
Science inventions.  
Science is saving lives. Mortality rate  
decreases  
Vaccines of Polio, Covid, life changer.

6- Rehabil - to be grounds where  
Science act as having; science  
cannot save humans from Natural  
disasters (Therapy)

Science along with all of its  
having strategies - failed us  
Drought occurred even in 2023, 2022 (Medicine)

Natural crisis in India, Egypt and  
Kuwait are examples of  
failure in having the  
experimental of ones life

Pakistan's in 2021, 2022 - food shortage  
in 2021, 2022 - Science development

April - to have human beings  
from water crisis

Four billion people almost - two  
- third of the world's population  
experience severe water scarcity  
(UNICEF)

b) Science can help in saving but cannot save human beings from Natural disasters.

Famine, a prolonged period of hunger prevails in many countries.

76 Million people in need of emergency food assistance. Science fail to provide nutrient full crops. (Cancer is increasing due to the use of the fertilizers in the fields).

Science is not saving us in production of unhealthy foods.

More the science is developing, more dangerous diseases overlapping.

Death of Natural ingredients, composition leads to death of healthy life.

Organic food concept originate to save human beings from Science.

c) Destruction is the second name of Science; in terms of War Conflict- Weapons, Ballistic Missiles, Tanks, Bombs are all inventions of Science.

Nuclear War origination is a result of bad use of Science.

Michael Jackson, pop singer and dancer believed Science will save him.

D) Science cannot save human  
beings - from the reality of life  
Death is the real face of life  
Michael Jackson, a pop singer  
and dancer believed science  
will keep him alive

Michael Jackson, an international star, pop singer and dancer had a firm believed in the science and his miracles. His food was tested in the laboratory everyday. After checking, he ate the food. He even believed that Science inventions will make him live again if he died. Despite all, he died at 50 years. Science is helping to reshape the living standards. Science is having us in multiple disciplines. Despite all inventions of Science to save human beings, Science fail to do as the Natural disasters can eliminate the life in few seconds. Despite living in the Science World, Science cannot provide the human essentials of life. The very essentials of life are Water, Food, Health and protection of life. Unfortunately, Science failed to save us from drought, Water crisis, famine, War, destruction, diseases and death. The first section of this essay would discuss the sectors where Science care us and helps in providing the essentials of life. Whereas, the second section would counter the arguments given in the favor of Science as a savior of life.

No Doubt, Science save the human beings in many perspectives but it is wrong to say that Science can save us. Science cannot compete the Natural powers in the Universe.

First comes the role of science in solving the water crisis of the world. Science being very helpful in solving the water related issues of the entire world. The creation of the Dams in each country solve the water crisis problem to some extent. Dams are built to store the excess of water and to prevent the country or areas from the flood and to provide the water when there is the shortage of water. Water is an essential element/compound for the human life. So along with the other water storage inventions, Dam Concept is the perfect work. Three Georges Dam of China is one of the largest dam of the World and the Science miracle. The Three Georges Dam in China has a water storage capacity of 39.3 billion cubic meters, which saved the huge population of China.

- from facing Water Stress - Pakistan  
 faced a lot of water stress  
 especially due to its conflicts  
 with India. Dam helped in  
 the water storage problems. Dam  
 and Science helps in saving  
 the shortage of water. Science  
 save billions of people from  
 water stress. Science is a blessing  
 to provide the essential of our  
 life. It is possible to make channels  
 to flow water to areas where  
 there was the shortage of water.

Besides Water saving strategy, Science  
 helps in fulfilling the food needs  
 of the huge population. Human  
 population is expanding, without  
 the help of science it is  
 quite impossible to feed so  
 much of mouths. With the use of  
 biotechnology, many of the useful  
 food products are available in the  
 market. The production of food  
 crops increased with the help  
 of science. The staple food of  
 Pakistan is wheat (hexaploid in  
 nature) but is not the natural  
 wheat, as the natural wheat  
 production rate and quality  
 is low as compared to  
 the artificial one which is

Consuming more a day -  
In addition, fertilizers (NPK) which  
are essential for the crop production  
are the invention of Science.  
Science have humans beings from  
nutrient depletion of the soil.  
Nutrient deficiency is compensated with  
science. So, Science is vital to  
cope the food scarcity. Hence, it is  
not wrong to say "Without  
Science, hunger starvation will be  
seen".

Furthermore, Science save humans  
from natural destructions.  
Disasters such as flood, cyclone,  
storm and many others can  
be controlled with Science  
inventions. Last week, Karachi  
was on high alert from the  
coming storm, which will cross  
the Karachi sea before  
moving towards Oman. Such  
type of predictions are  
life saving. It help the people  
to move towards the  
protective zone to lessen the  
losses from such type of  
natural disasters. Floods, alerts,  
storm alerts all before  
time save alert of  
life losses. Science is a

A life saviour ✓

Finally, Science save from deadly diseases, reduces the pain and help to cure the ill person. The inventions of Sciences in medicines are game changer for life. Science inventions helping to complete the deadly diseases like cancer, Cancer can be cure, diabetes, Transplant of heart and many others are examples. Vaccines of Polio eradicate the harms of this disease. Recent report of World health organization clearly indicates the less mortality rate with comparison to the past. Covid 19, a dreadful virus, is under control with the blessings of science. So it will not be wrong to say. Yes Science is a game changer in human beings life. ✓

So far this essay had shed light on those sectors where Science is a life saviour. Now this essay would present the counter arguments to refute the premise that life can be saved by science or

Science Can Save us ✓

First comes the Science as a  
Water provider and Saver. No doubt,  
Science can save us and lessen

the Water scarcity or stress.

Unfortunately, Science failed to save  
us from Water stress. Almost

50 percent of the World population  
faces the Water stress or  
scarcity. In Pakistan, 2022, 2021 drought

in Karachi (Sindh Area) are the

clear example of the failure

of Science in saving the

human beings vital need ✓

All of the developed countries and

developing countries face the Water  
stress, which means Science cannot

save us. India, Egypt, Lebanon and

Kuwait along with many other

countries face the Water scarcity ✓

According to the UNICEF, four billion

people, almost two-third of the

World's population experience

severe Water scarcity. Henceforth,

Science with all its claims

fail to provide security to

man's life ✓

Furthermore, Science can help us in solving the food scarcity but hunger, starvation and famine are the natural phenomena occurred due to some natural events and science cannot handle it. So science cannot save us from famine impile of its technologies of large food production. According to the recent hunger report, 70 Million people in the world are in the need of emergency food assistance which shows that science cannot save us.

Science claim of providing nutrients essential for food production also fail as the more use of science technologies, more the cancer rates. Every 1/10th of the individual is in danger of this life-threatening disease so science fail to complete the natural composition of soil and food crops. So science cannot save us. Organic food stands in the market which means only natural life can help in saving one's life.

Despite alot of useful technologies of science, it cannot be

Wrong to say that Destruction is  
the second name of Science. In  
terms of War Control.

All of the human destructions  
materials, Weapons, Murder, Tanks  
are leading the humans to  
the Nuclear War. Science is  
leading the humans to the  
vast destructions, how it can  
be the life saving for  
human beings.

Science can help in treatment but  
Science cannot save human beings  
from the reality of life and  
that is death. Michael Jackson  
tried all of the Science  
preventions of saving humans  
from dying and he followed  
all of the precautions it  
maintained the healthy long  
life. Despite all of his efforts,  
he believed in Science, he  
died at the age of 50  
years only. This explains the  
fact that Science cannot  
save us.

Science is a blessing in a  
disguise and helps the humans  
in facing the challenges of  
human life but Science cannot

Save us - from water scarcity, hunger  
starvation, nuclear war, famine,  
natural disasters, diseases and  
death. Henceforth, Science cannot  
Save us,

Concluding paragraph should be  
comprehensive  
It is very brief
