

The Investment in Knowledge Pays the Return

Outline:

1 Introduction

Weak understanding and deconstruction of the topic

a) Thesis Statement

To gain knowledge is to enhance the wisdom as well as intellectual capability of man which, ultimately, makes man to find out new and innovate something new for the betterment of humanity and planet.

use gender neutral terms/words

b) Contextualise the meaning of Statement

Irrelevant details

1 factors persuade a man to seek for knowledge

a) Need of civilized society and transformation of society from uncivilized to democratic society

b) Revolution in life brings about by the gaining of knowledge

c) Need of proper law and constitution which claim the security as well as welfare for society.

Irrelevant

- d) Discovers / findout the thing or reasons behind the creation of universe.
- e) Findout the solution to resolve the conflicts amongs states
- f) ways to prevail the quench for knowledge.
- g) Need of Innovation to expedite life

3.1 Effects to gain knowledge.

- (a) Philosophers who gave the concept of state and prominent rules and regulation to run the state.
- (b) Industrial revolution which supported the man to earn bread and butter
- c) Knowledge gives the skills to preserve the food and mineral for the betterment of mankind
- d) By attaining knowledge man has become able to bring revolution in information technology.
- e) Brings the concept of globalization

- f) Persuade a man to frame policies and make a man to get other amenable on the policy for peace process.
- g) Innovation in medical field to secure the further mankind
- h) Makes a man to forecast the upcoming weather and climate change.

4.1 Way forward to enhance the compatibility of knowledge.

- a) Equalize the educational course of developing state to the developed countries
- b) Government should take a steps to convene the convention for students.
- c) Expedite student scholarship programme
- d) Ensure the ~~app~~ applicability of local language which make under talented student understand.

5.1 Conclusion.

After the agreement of Magna Carta, between king and public it had been proved that there had been some intellectual outlet who had knowledge to formulate civilized society. However, to gain knowledge is to enhance the wisdom as well as intellectual capability of man, which ultimately makes a man find out new and innovate something new for the betterment of humanity and planet. The ultimate object of the given statement is to elaborate the importance of knowledge which instigates a man or a student to find out the solution of ongoing issues as well as find out the solution to tackle the myths. Greek philosophers gave the concept of civilized and protective society based on their knowledge and philosophy.

Do not add examples in introductory paragraph

By following them, many coming
philosophes and social scientist
gave the further improvement
on the bases of knowledge
many scientists had been
made an efforts to find
out myth behind the creation
of universe; In this way
many scholars framed a
constitutional system, many
scientists explored the world
behind plane, discovered the
panacea ~~for~~ to treat the disease,
innovated the machine to
expedite the already slow
scale of life, brought the
advance technology to speed
up the way of life, ~~to~~
innovated the machines which
helped the man to earn,
innovated artificial machine
to search about, innovated
the gadgets to communicate
and innovated smart
network to keep all states

to get on with. Furthermore after attaining knowledge man has become able to frame a proper policy to get on with other states diplomatically. To highlight the importance of education every state should adopt some pragmatic steps which will be supportive for the public of ~~an~~ respective states as well as for the peace in world.

In the state of nature, some scholars argue, man was just ~~bound~~ to living to survive. Crescendo, man started to gain knowledge from the happening around which ~~groomed~~ and his intellectual. Upon the base of that intellectual ~~ctual~~ he felt a need of family to be kept

safe and sound. In this way a start of civilized society was began. with the passage of time man needed proper state system and city system. On the basis of knowledge philosophers like Plato and Aristotle started to introduce the government and rule system to run the society.

This was started about thousands of year ago. After the Greek philosophers, a few centuries to go, some philosophers of the 16th and the 17th centuries introduced constitutionalism and separation of powers, just on the base of their knowledge and intellectual. And that concept of separation of powers and democracy, almost, is being performed

~~access~~ across the world
, except a few countries.
It means knowledge gave
the best ways to run
the state system and
also back up to keep
rule of law within the
state as well as within
society. Without knowledge
it might have impossible
for a minor number
of faction or political
party to run the state
and make the people
obide by ~~the~~ the law and
constitution. Along with the
constitutional system know-
ledge also makes a
man to innovate some-
thing novel for the better-
ment of mankind.

On the basis of knowledge
and research man tried
to find out new planet
other than the Earth. By

Following this research man innovated ~~newer~~ advanced tools and instrument which started to revolutionize the life of man. While, in trying to cross the Earth, eventually, man innovated the telescope. Now this telescope is very applicable to find out the movement of celestial bodies as well as forecaste the ~~it~~ would be happening. Even some satellite have been invented and sent toward the space. Moreover some satellite predicts the weather forecaste on the ~~the~~ behalf of instrument. Such as SUPARCO a space department in Pakistan reveals the forecaste of weather

Similarly, NASA a west space search outlet working on the celestial bodies.

The most important by applying the knowledge to innovate the new things man has innovated the advance means of transport and trade. Before that innovation it was seeming very impossible for man to reach a point which is about a thousands kilometers far away from his residence within hours. But, now, on the basis of knowledge and research it has done. ~~The~~ The common example of this is the aeroplane and Railway system. Even, now man has been able to communicate with one another

within no time. If man would not have thought about it, he had no search for knowledge. Ultimately, the man of modern man ~~is~~ might have lived or resorted to the state of nature. In the state of nature man could not ~~adopt~~ or ~~prescribe~~ proper treatment for minor fever and influenza. While on the basis of knowledge, the modern has become able to diagnose the disease within no time. Because advance laboratories and equipment have been innovated to diagnose. About thousand years ago man was unable to treat with leaven, malaria, and Tuberculosis. A massive

~~chunk~~ chunk of casualties had been reported every year. But now such a fever can easily be treated within two or three days. On the basis of knowledge man has been able to carry out brain surgery as well as heart surgery. On the other hand after being expert of anatomy and physiology now man has discovered the chemicals in terms of medicine conducive to treatment.

By advance means of innovation man has become able to discover the method of vaccination which is now a days, applicable for every nascent and infant and these vaccination help to keep the

immune system of man strong as it should be. By keeping view on the medicines; man has become able to discussy chemical to overcome the stress of othes.

On the basis of knowledge, this work or job, is carried out by the psychologists.

On the basis of the knowledge psychologists have easined best skill of communication which help them to make their patient to conuience. By the best communication skill, a psychologist is able to findout basic reason and ~~core~~ become able to conclude. similarly knowledge pays the best in the regard of globalazation. Such as diplomacy plays a

vital role in relation between states. By attaining knowledge man has become able to understand the neighbouring state's interest. On the global stage diplomat tries to convince the other's state diplomat for concern ~~for~~ project on the basis of his/her communication skills. After convincing a good ~~set~~ ties is resulted. In this way both states gain a lot of economic benefit as well as political benefit, even, by making or framing peace treaty. For example in case of Congo and China it has been observed due the lackness of education in Congo it is not enriched in diplo-

matic relations with other states as compared to that of china. China's diplomats have the best knowledge about diplomacy, even, every developed country have the best knowledge of diplomatic relations. In order to keep on with diplomatic relations china has launched the Belt and Road initiative which would be win-win for china and respective state. A report revealed that about 25.4 bn dollars have been invested in Pakistan under the flagship of China-Pakistan corridor. Now china is willing to open universities in the Pakistan for

advance research and
for the purpose to share
the knowledge. in Phase
II of (CPEC) China Pakistan
Economic Corridor. In
these universities, ~~a~~ an
advance research would
be carried out on the
artificial intelligence and
information technology. By
keep a view on the arti-
ficial technology, it has
been observed that day
-to-day working on
the artificial technology
has been hasty.

Hence, a robots like
human with neural
such have been launched.

This all is just
done on the base of
knowledge.

Although world is headed
toward the advance
revolution in every filed

of life by applicability of knowledge - But in underdeveloped countries knowledge in the educational term is not ~~prese~~ outlined as in the course of advance and developed countries. By following the globalization means every state should pass down on equal knowledge to its students.

In this term, to advance the ~~the~~ knowledge every state should fix out a master of educational expert. Government ~~also~~ should also invest on the sustainable development. Enhance the education is one of the highlighted goal of sustainable development goal among the goals

given by the united nation.
To conclude whole discourse
it has been understood
the knowledge pays
the ~~(best)~~ best in every
field of life on global
stage and on domestic
level. Knowledge pays
the best ~~let~~ in the intersection
between human. So the
importance of knowledge
can not be denied because
it ~~(is)~~ ~~built~~ transformed
uncivilized society into
civilized society as well.
