In many post-colonial states, including Paxistan institutional brameworks and political instability have made the judiciary vulnerable external influences. Understanding this historical context is essential to appreciate the orgaing battle for judicial autonomy and the pernicious effects of political interperence on logal system worldwide. Political interporence in judicial systems manifests in several ways, ranging from overt actions like the appointment of partison judges to more covert tactics such as media manipulation. These forms of interference undermine the judiciary, ability to junction independently, eroding its credibility and effectiveness.
