	Introduction
	The Scientific school of thought in
	administration, also known as swentific
	Management, emerged in the early 25th
-	century as an effort to bring systematic.
	empirical approaches to organizational
	and administrative processes. Championed
	by Mederick Winslow Taylor , et focuses
-	on optimizing efficiency, productivity
	and task specialization through
	Standardized methods and objective
	data anaylsis. This school emphasizes
	precision, discipline and accountability in
	administration, offering solutions to
	inefficiencies in governance structures.
	1
	he scientific School of thought:
	Oxe enets:
	1) Standardization of tasks:
	Tasks are broken into smaller,
	measurable components and standardized
	to uniformity.
	[[[[[[[[[[[[[[[[[[[[[[[[[[[[[[[[[[[[[
	specific procedures for tiling documents reduces delays.
	reduces delays.

Day: Date:	
2) Special ration:	
Employees are assigned vous based	
on their skills and expertise increasing	
efficiency and reducting duplication	
of effort.	
3) Time and motion studies:	And the second second
Taylor introduced time studies to	
identify the most efficient ways of	
performing tosks. This principle can	
be used in governance to streamline serv	ices
such as the issuance of lincenses or	
handling of Public complaints.	
4) Management of Objectives:	
Clear, measurable objectives are set	
for individuals and teams, ensuring alignment	nt
with aganizational or national goals.	
5) Incentive systems:-	
The concept of timining rewards	
performance can motivate employees and	
reduce comption or regligence in public	
Offices.	300 00000000000000000000000000000000000
Instrumental Role of Scientific	
Management in Good Governance	
"Ianagement in spour

Day	Date:
	1. Improving Efficiency 30 Buseaucracys.
	Pakistan's bureaucracy & often criticized
	for being outedly complex and slow. Implementing
	standardized procedures and workflows can
	minimize red tupe and improve Service delivery.
	For instance, the use of streamlined systems
	for land records.
	2. Accountability and Transparencys-
	scientific principles advocate for
	documentation and monitoring of
	administrative processes. Digital
	governance platforms, supported by clear
	benchmarks and periodic audity
	Can ensure transparency in spending.
	3. Data-Driven Policy Formulation:
and the second	Governance in Pakistan often suffers
	from ad hoc decision making. A
	Scientific approach would emphasize
	decisions are backed by data , such
	as demonstration turners or conomic
	as demographic trends or conomic metrics. e.g chsaas program through data analytics.
	4. Workforce Optimization:
	Assigning appropriat officials loves
	bused on merit and skill , rather
	than repotism galigns with the
	scientific principle of specialization.

5. Public Service Delivery:	
The application of time and motion	n
states can optimize essential some	24
such as hogithcase and education. For	
and introducing digital class nowns in wal was	respital
6. Reducing Coxuption.	
By introducing performance Unked	
incentives and accountability mechanisms,	
Public officials would be encouraged to	
out in the public's best interest	
Example: transparent appraisal system of law enforcement agencies an reduce bribery.	tor .
law enforcement agencies an reduce bribery	
Challenges to implementation	
in Pakistan 1-	
1) Resistance to Change:	
Entremented bureaucratic culture of	-
resists reforms. Overcoming this require	4
strong political will and widespread state	- 1 - 1 - 1
engagement.	noice
2) lack of Resourcess.	
Implementing scientific management	
requires significant investment in	
technology a training and infrastructure which might strain Pakistant budgetary a	nshin
3) Political Interference:	
Scientific administration demands	
impartiality, which is often disrupted 5	4

	Political in fluence in Pakistan.	
	4) Skill gaps:	
	Pakistan's workforce often lacks	
	the technical expertise to effectively	
	implement data driven solutions.	
	Examples from other Countries :-	
		•
	1) Singapores-	
	The country transformed its governonce	
	Through the application of scientific	-
	data-duren policies and e-governance.	
	(2) (2) (2) (2) (3) (3) (4) (4) (4) (4) (4) (4) (4) (4) (4) (4	
	2) South 1<0reas-	
	By using scientific management in its	-
	industrial policies of South Forest enged as an economic powerhouse.	
	3) Estonias	•
	Estania's digital governance	
	model a based on standardization and	
	automation? serves as a blueprint for efficient public semice delivery.	
A Participant	Recommendations for Pakistan	
	TRECONAT S CICCITAT =	
1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	1) Adopt E-governances.	
	Digital platforms can standardize	
	administrative tasks and enhance assess	bility.
	For example: digitaling public sector	
	records could streamline	and the property of the party o
	land disputes	

Day	Date:	
	2) Training Programse-	
Marie Carlos	government officials should be trained	
	in data analysis and management technique	ध.
	3) Merit- based appointments:	
	A system of recruiting and promoting	
	officials based on performance rather than:	
	political affiliations must be enforced.	
	ci) Pilot projects 1-	
	Introducing scientific management	
	through small-scale pilot projects in	
	specific sectors such as health or	
	education, can demonstrate freasibility and benefits.	
	and benefits.	
	conclusion :	
	20110013-	•
	The countries count of thought in	
	The scientific school of thought in	
	administration provides a robust framework	
	for improving governance in Pakistan. By	
	emphasizing efficiency, accountability	
	and evidence-based decision-mating, it	
	Offers solutions to many of the system.	<
	Challenges texed by the country. while	
	the mad to implementation may	
	be frought with challenges, a phasedy deliberate approach can ensure	
	successful integration.	
	Success to wite granton.
