

Unethical use of AI tools in education and its consequences

Outlines

1 Introduction

- (a) What is artificial Intelligence?
- (b) How has it modernized today's world?
- (c) Is it a threat in human race?

2 Unethical use of AI tools in education

- (a) AI-assisted writing software
- (b) Cutting and pasting a paper without appropriate citations
- (c) Degree making mechanisms
- (d) Accelerating hacking and terrorism
 - (i) UNESCO Report 2023
 - (ii) ISA Report on terrorism
- (e) Cheating AI tools
- (f) Education not a top priority in government policies

3 Consequences: Unethical use of AI tools in education

- (a) Loss of certain jobs
 - (i) Unemployment: Report of UNESCO
- (b) Hinder the development of key skills:
critical thinking, ability to assimilate and
analyse knowledge

TECNO

SPARK

analyse knowledge

(c) Lack of knowledge

(d) Drives away from hard work

(e) Spoil the future of student

(i) Illiteracy population

(F) Failure Rate of Students

(ii) Data summary of Pakistan: Report

4 Way Forward: Unethical use of AI tools in education

(a) Meticulously designed Policies

(b) creating awareness among students about good use of AI tools

(c) Provision of quality education

(d) Focus on Sustainable Development Goals

(e) Skill base trainings

(i) Correct use of AI tools

(ii) Gross Domestic Product (GDP): Increase

(F) Impose penalty: Improper use

(G) Parents meeting with Teachers about Students.

5 Conclusion

Artificial intelligences are online applications or tools which are helping to perform the different task of life, such as; creating articles in just a minute, student assignment, and give any-knowledge in less time. AI tools mostly Peoples are use to perform business works due to busy self. Other than that, AI tools enhances the teaching strategies by giving pupils a distinctive educational opportunity. On the other side AI tools also helps to enhance the ability of Doctors; Using the different machines which are create by AI Robotics. Day-by Day AI modernized the quality of life of every person these relay on machinery mechanism to perform any task due to the lack of time. Moreover, AI tools help to perform inner or outer works such as; cooking, cleaning, sewing, working and in business;

TECNO
SPARK

run the office through Robotic mechanism, picking and giving files services etc.

Other than that, AI tools help in any performing tasks but it's are also gain the threat in human life. Everything, have consequences good or bad, benefits or losses.

AI tools also are the threats in human beings use of unethical in education, personal life or national or international level. If discussed about the AI tools, unethical use in education, Artificial intelligences are performing very infinity Role in Students life.

In Education mostly students are perform their assignment or other works using AI tools.

Furthermore, AI in Education, is a big threat in life of human beings.

Firstly, AI tools

also perform the assisted assignment writing for the students. Student write the topic name on searching bar of AI tools, it generates all the idea according to the requirement of searcher. Actually, it is a huge reason of failure Ratio of student in Pakistan. "According to the data summary Report of Pakistan; Almost 22% students increase in 2023 due to the failure Ratio Out of 100%." AI is a big threat in the future of student beings. Furthermore, it is proved that the students use AI tools for creating their homework or others assignments.

Secondly, cutting and pasting also a easy method to perform their assignments work and other articles which are consider in unethical performing

The students search the

the topic and than copy answer than paste after removing the plagiarism in topic or paragraphs, so why looking human writing. AI tools doing our works but in actually it is soet way to cheated ourself, which results failures. In short, it proved the student are doing these mechanism to perform their homework and which also refers to the unethical use of AI tools in Education and ourself as well as.

Thirdly, to make online degree using the AI tools also the part of misuse of Artificial intelligence in human life, Because of that when they create the online or AI education degrees, on that no stamp and no or Director's signature

due to the reason, Police case and other personal matters take bring.

"According to the research agencies of national level, find almost 12%.

Student having fake degrees of Education, during the apply for government level jobs." moreover, many student's use AI tools to make their degrees for jobs or perform any jobs in national or international level.

Fourthly, AI has led human beings to increase the speed of human performed tasks, and in some cases, it even exceeds our abilities. with automation, nefarious acts such as phishing, delivery of viruses to softwares, and manipulation of AI operated system seem to become difficult for human to control that there will be a very short time to

to do damage - control caused by such acts. Similarly, there may be new AI-enabled form of terrorism to deal with due to expansion through education institutes and autonomous drones as well - as. The law enforcement and defense organization will need to adjust to the potential threat these scenarios pose. It will take time, and extensive human reasoning to determine the best way to prepare for a future with even more AI tools to ensure that though there is potential for adverse impacts with its further adoption in education or others, it is minimized as much as possible.

Furthermore, AI tools perform their roles that actually terrorists create

to perform their personal goals, attack on students' school and other religious madrasas. AI tools, also help the terrorists to searching the good location and gathering areas of school. Mostly, student don't aware the correct use of AI tools, due to that the AI attack agencies attacked their targets due to the misuse of AI via students. "According to the UNESCO Report of 2015; almost the 45% student killed in the Pashawar School attack of terrorist".

In short it is proved that the Artificial intelligence also creates due to the attacks on school or other institution. International Services agencies (ISA) find the targeted areas of the institution and give the reports about the terrorist in

and resultantlly stays underperformed. For example, In the case of Pakistan, the government is unable to spend even more than 2% budget, giving priority to other sectors instead of Education. This is a negligence par excellence. That is why Pakistan not only facing a political crises every other day, but also economic, education and social turmoil of the worst order. Development of our country is, consequently, facing hindrance on account of this deprioritization of our education sector.

Further more, the above paragraphs discuss the unethical usage of AI tools in Education, that are performing the big threats in students life. The unethical use of AI tools in education brings

many consequences in Student
Life.

Firstly, while AI presents tremendous opportunities, people are uncertain of its likely impacts, and are picturing possible worst-case scenarios, including complete overtake of the human affairs from jobs due to AI, because the AI misuse in education expand the lake abilities of the students which are not able to perform any job or business due to the lake of knowledge. "According to AI researchers, machines are predict to be better than us in translating languages by 2024, writing high-school essay by 2026, driving a truck by 2053". In fact, it seems that all human jobs

will become automated within the next 120 years. In short, it is proved the AI tools are becoming to better the a high knowledge or experiences of student. due to the lack of manners and abilities in unethical use of AI in Education.

secondly, the critical thing abilities of the students becoming more hinder due to the misuse of Artificial Intelligences in Education for performing homework, And it is also expand the lack of knowledge ideas in human brain and drives away them from hard work and struggles. AI seem to spoil the future of the student due to the unethical usage in education. Students only rely on the

AI tool, those not serious about their studies and future as well. Due to that the failure rate student increase day-by-day in this era. Students feel not interesting in Education sectors due to the lack of governmental policies and other technology interesting base skill about learning.

However, the unethical consequences seem to be due to the unethical use of ^{AI tools in} Education. In short, the way-forward or remedies needs to enhance the educational sectors in human or students life.

Firstly, need to meticulously designed policies governmental level to

enhance the quality of education.
creating awareness tricks and
campaign about the correct
use of AI tools in Human
and student life as well.
provision of quality education
as well. Teachers should teach
the students about keeping
in mind the future or
goals of the student and
countries as well. The gover-
nment should impose penalties
on the students due to
the misuse of artificial
intelligence in human life.
And also needs to conducted
or held the parents meeting
about the student routine
in home during study
and also teaches the parents
how to treat with student
handle the situation.

Conclusionally, no doubt, the Artificial intelligencies perform the very important role in human life. AI doing for insiders and outsiders work to escape the time for other works. AI also having the benefits and losses. In Education, the misuse or unethical use of Artificial intelligence perform like a big threat for the upcoming generation and existing generation as well. Most of the student perform their works via using the AI tools and applications. Further more, it is a big threat also for the GDPs of Pakistan, and international level as well. Hence, the government should to priority to the top level Policies.
