The pace of technology and the wish to benefit from it, have gained so much in magnitude that our old information, sources of information, even the courses and subjects, are all becoming irrelevant. When every kind of information is accessible on the screen of a mobile phone, that can fit perfectly in the palm of a hand, then skill overpowers knowledge and action subdues thought. It is now feared that in the coming times, how will the clergy, sitting on the pulpits and narrating stories, be able to get attention of their listeners and how will the teachers, in their small classrooms, be able to teach the secrets of this universe to students, who are constantly consuming information from the internet.
