7. (b) separate
8. (c) hopeless
9. (c) heartening
10. (a) encourage

PART II

Q2: Make a precis - - - title.

Title:

The Art of Oratory Over Time

The future of oratory is uncertain. The word 'orator' has lost its essence as it is no longer considered a noble task. In ancient times, the orators were envied as they set the framework for future course. In modern age, oratory is sidelined as not much attention is casted upon the art of public speaking. Due to time constraint, popularity of other forms of communication has stolen the limelight from oratory. Sir Winston Churchill retained the great oratory traits of ancient era as he carefully arranged his ideas into words. He belongs to one of many famous English orators group. His speeches, over the span of five decade, holds great

historical significance. They are a part of human's and world's history. They are evidence of his great legacy.

Total wordcount = ~ 440 words

Precis' length = ~ 140 words

Q7: Translate the following - - - expression.

Allah Almighty has blessed Pakistan.

with mineral resources. The need is that we extract these minerals from the Earth through mining ~~and~~ to make products from them and sell in the international market to earn foreign exchange. This way, instead of exporting agricultural goods, products made from minerals should be exported so that more revenue is earned and employment opportunities are boosted. However, while manufacturing products, international standards, individuality, and innovation has to be considered so that we become independent and stand on our own feet. An economically strong and prosper Pakistan is the interpretation of Jinnah and Iqbal's vision of independence.

Q3. Read the following . . . follow.

Q1: What is the main . . . science?
According to the passage, the main goal

of AI research is to perfect 'machine intelligence' in relation to natural intelligence of humans such that the machine can imitate human behaviors like 'problem solving'. In computer science, AI research is characterized by study of "intelligent agents" i.e. devices which respond on the basis of their perception of environment to achieve ^{maximum} accuracy in their goals.

Q2: what is the AI effect ---- time?

AI effect is the phenomenon in which machines evolve with time as the scope of AI broadens and tasks that require "intelligence" are removed from the list. This impacted the definition of AI over time as the tasks i.e. ~~autonomous~~ optical character recognition is removed from AI list as it became a routine occurrence.

Q3: How has the - - - through?

After being founded as academic discipline in 1956, Artificial Intelligence research has been characterized by waves of optimism and pessimism. The recurring cycle it has gone through included hope and despair, followed by loss of funding and renewed funding, and lack of coordination between its subfields.
