of human soul personality. Individual and family become improve, uphold the moral of human soul country image become improve, and turning point for the global environment.

Western political philosopher defines creativity as inside the human soul while muslim philosopher

define creativity of expression

with the religious believes of the human soul. It was the

story of Socrates with his father. His father was a

carver and use stones for the painting. He creates the beautiful

painting with the help of stones and hammer. One day,

due to the habit of questioning, Socrates asked to his father,

Daddy! From where you find these beautiful images inside the

mountains and stones. His daddy replied --- O my lovely son, these

pictures are not in these stones, this is actually creativity

of expression of my inner soul. I just copy them into

this stone.

Quality, capacity of

Concept of creativity is the expression of the human

I never have to luck to listen this self concocted dialogue

The human soul is unique and need to be understandable concept. For an individual, family, society, profession, religion, country and at global level human soul played the vital role. These are attributes defined themselves by the creativity of expression of the human soul. Like the culture of questions at the ancient great time who turns the typical human soul into the creativity of expression and their creative expression of human soul make the world **For individuals' creativity** democratic world.

~~For individual creativity~~ defines the inner personality in the form of expression. Inner personality is reflected by the creativity of expression of an individual. As the example of Socrates's father, whose profession is stone cutting and with the creativity of his inner personality comes into the stone in the form of expression. That's why individual thought,

DATE: ___/___/___

Positive and negative thinking all are defined by the creativity of expression. Hence, creativity of expression for an individual defines its inner personality.

For family, creativity of expression explains the thinking of the family member. Because family thinking can only be explained with the help of family creative of expression that easily influenced by the environment of home. The interior designing of house, colour of paints, setting of beds, color of carpet, pictures frames, and many other things defines the creativity of expression of the family. Hence, family anger, softness, happiness and all their moods can be defined by the internal look of the house.

For society, human soul combines to define the value of the society. Because society is the combination of human soul, which strengthen or weaker the society. Here is the latest

example of Afghan refugees in Pakistan
The individual afghani soul combine
to make a collective of souls
and define the society. This
society defines or give perception
for the all afghan & fugees
by the expression or illegal
activities of some of them
which make creative expression
of all of them. That's why,
Human soul combines to define
the value of society.

Sir be merciful to Afghans
They are also humans!

For professional expression,
Human soul defines the
professional experience of the his
inner soul. In the form of
professional behavior, attitude,
manner, and defined role in
the professional life. This
professional expression creates the
difference between different human
souls who participating in the
office. Here is the example of
professional human soul is Elon
Musk, who changed the dimension
of twitter by his own inner
soul decision. Due to this single
soul, all other industries goes
down due to the professional soul

of Elon Musk. That's why soul defines its professional expression in the form of creative expression.

For religion, soul gives evidence in the form of creative expression to explain religious understanding of the human soul. Religion is the strong belief of a soul which demands knowledge to make soul a creative expression. Here is the example of Dr Zakir Naqvi, who defines religion in the simplest and unique manner. Due to this every unique concept of religion can get easier for the uneducated people. This is due to the knowledge of religion which creates the creativity of expression of the human soul.

There are multiple factors which pushes human soul to give expression in the form of creativity. One of the basic factor is individual competition and capacity of learning. The major difference between different

~~between~~ ~~but~~ ~~the~~ ~~different~~
 individual souls are done on
 the basis of capacity of
 learning. For example ~~Qaid-e-Azam~~
 was the soul of learning with
 passion and courage. The soul
 of Muhammad Ali Jinnah could
 not be equal to the any
 common worker of the Muslim
 league. Because competition and
 capacity of learning defines
 the human personality. That's why
 individual competition and capacity
 of learning push him towards
 a unique creativity.

Survival competition of family
 in the society make the ~~the~~ ~~the~~
 difference. Survival of the ~~the~~
 push a human soul to give
 expression in the form of
 creativity. Because family needs to
 survive and keep in ~~in~~
 with the other families in
 the society. For this purpose
 creativity of expression in the
 sense of economic improvement for
 the family, social value for the
 family is very important.
 That's why survival competition

Again having command over
 language but no relevancy and
 logic rendering me into sadness

push a human soul in the form of creativity.

Societal norms and values push the societal human soul to be a part of creativity. Because creativity of society expression explains the human soul of the society. Here is the example of Japanese societies, where social norms and values are very important for them. They give respect and receive respect. They obey the rules, laws and conventions. That's why, these societal norms and values push a human soul to give expression in the form of creativity.

Professional opportunity for soul to make himself creative. Because in professional life the most important thing which push the human soul for the creativity of expression is the form of better opportunity or strength in the profession. Many of human souls work day and

might give results in the
 form of creativity of expression
 for the better improvement
 in the society. The major
 example of government pay
 scale to improve the person
 from previous to next grade
 needs the professional creativity
 of expression for the human soul.
 That's why professional opportunity
 push a person towards creative
 expression.

There is the most come
 and important factor in religious
 factor and strong believe that
 makes creative expression in the
 human soul. Because religious
 is totally linked with the
 soul of the human. His
 creativity is directly with the
 peace of the religious soul.
 This is only done by the
 human soul in the form
 of religious obligation. Like
 religious prayers that makes
 the creative expression of
 the human soul. That's why
 religious faith and strong
 believe also makes creative
 expression.

The outcomes of creativity by the expression of human soul in the form of individual and family personality become improved. Because human soul is first connected with the individual and family personality of the circle. By improving the soul of an individual Work on grammar here environment of the society also improved which directly positively change the family of the individual as well. That's why creativity of expression gives the positive outcomes for the family and individual.

Moral of the human soul get strengthen by the societal and professional creative expression. Because human soul deals with society and professional attributes daily. These attributes become change by the effort of the human soul. These human souls uphold the moral of the other persons in the society and professional life. That's why societal and professional strength uphold the

moral of the human soul.

Country image become change with the creative expression of its human soul. Because country is known by its human souls. By the help of human souls country represent it self in the form of better country. Here is the example of Chinese people who shape their country in the form of creativity which makes it a better economic state in the world. That's why country image become change with the creative expression of its human soul.

Turning point for global environment by the creativity of human soul of countries. Because combination of countries sum up with global environment. That's why global environment is directly attached with the countries and soul of the people of that countries. Here is the example of ISRO - Indian space agency where

DATE: ___/___/___

The creativity was done in the form of landing of Chandryan at south pole of moon. This creativity changes the expression of Indian people in front of the world. Due to which USA and France started combine space station with India according to the recent G20 Summit report. That's why turning point for global environment by the creativity of human soul of country.

Political philosophers beautifully taught about the connection among creativity, expression and human soul. Western philosophers ~~define~~ Define creativity as inside the human soul. In the book, Plato to present, it is defined that plato and his student Arastotle debate, were doing debate and questioning which change the dimension of thinking. ~~Define~~ this they think beyond the limit and gives the strategy and formula for the upcoming generation that how to be a better form of governance

law, state. Similarly Machavali; The prince, book also defines about the human soul of the prince. It also defines the role of prince and explain how to be a soul of prince be creative. Hence, western philosopher defines beautifully the concept of creativity of the expression of the human soul.

Muslim philosopher defines creativity of expression of the human soul with the lens of religion. They define beautifully the concept of creativity in the form of religious term and conditions. A famous Muslim philosopher Al-Farabi define the human soul in the name of "wazir". He taught how to be a wazir become creative for his public. Similarly he told that wazir should know those things which others don't know. This is the sign of creativity for the human soul. That's why muslim philosopher defines creativity of expression of the human soul with the

lens of religion.

In conclusion, creativity is the expression of the human soul give the unique concept of inner and outer side of the human soul. This inner and outer form of human soul there are different attributes who played a vital role in the form of creativity in it as the expression. These attributes are individual itself, family, society, profession, religion, country, and its global environment. That ultimately connected and make create the human soul. In this phenomena, western and muslim political philosopher gives the direction to the human soul that how it can be creative for the better expression of itself. According to Rumi:

Quotation is wonderful

"You have to keep breaking your heart until it opens"
(Rumi)
