## Q:01 Translation

(A) Any type of noise that interferes with human life is called noise pollution. If this pollution is left unchecked, it can have serious effect on the body and mind of humans and animals. Noise pollution is one of the major causes of pain, stress in Pakistan. Noise in urban areas and big cities has reached dangerous levels. For example according to a survey by the Environment Protection Agency in Punjab, the noise level in Lahore has reached 91 decibels while the maximum tolerable level is 75 decibels. This means that many people's mental and physical health is already at stake.

Q:01 (B)

### Translation

Nature has made a strange arrangement in human nature to always be bound by hope and its strings. One string snaps, so he holds the other. If the second one breaks, then the third one breaks, the breathing continues until the cord breaks. Perhaps nature had not placed this chain of hope in the nature of man, then he would have given up on the first hopelessness and died of despair.

Q:02
