religious and social roots is a secret to shine.

6. Conclusion.

The dual nature of world is a challenge for humanity since inception. It is mawed with enigma of right and wrong. In a some way every opportunity is two-edge sword. The social media is no exception. New Generation has to choose whether to utilize it positively or not. In majority it is a blessing in disguise. By seeding them with unprecedented skills the benefits outnumber the negativity. The globalized world and freedom enlarged the slope of skillset in youth. The complete world stage is available for them to learn, compete and compare for utmost reward. Modern professions changed and ended the archaic academic structure and disparities. However for few, it is a nightmare. Unmatched psychological and social stress proved wrong impacts. The freedom garbed the real aim of life, while the opportunities led to rage race and imbalance in life. The world stage backed deceit and exploitation with modern professions lacking sense. In contrast, positive utilization covers every negativity. Brindled, directional usage under guidance and proper freedom utilization for development is a miracle. Successful usage of opportunities for skills attainment with check and balance for ambitious life is a reward of it.

Social media is a two edge sword.
It impacts youth with unprecedented skills

to compete in a modern world grabbing every opportunity for development and success. It's a useful tool, an oxygen for many to turn this world upside down in seconds. This turn is positive mostly. But exceptions are there. The same social media proved as a nightmare for some. The internet is rife with incidents that led to disasters due to improper use of it. However its a blessing and proper utilization produce rewards that outnumber its atrocities.

The new globalized world is without boundaries properly set for them to take maximum advantage. The rise of multinational corporations (MNC's) provide stage in every corner. Their number from 7000 in 1960's now touches million-as per WTO.

Similarly the bipolar world led the nations towards global stage instead of national.

Chinese BRI an evident example.

The CPEC in Pakistan with prediction of three lac plus employment opportunities.

Such initiatives provide wide scope for this generation to learn, train and eat the riped fruit with rewards.

The definition of freedom is squashed with the new trend.

The freedom of choice, time and location is unmatched. They can now explore the world and diversify their skillset.

from home. The recent surge in virtual education is a blessing. "Khan Academy" with millions of subscribers. Google hiring without degrees and twitter operated virtually with teams from every part of world proves such freedom. The Thailand has a 16bn revenues as per Tourism Index report. The majority of the visitors are entrepreneurs and employees that work from home. Such freedom is due to social media which diversify the old trends of skills acquired by youth.

The wider canvas of opportunities led to new age of media. The monetization of contents on social media; the connectivity of masses and cultural cross amalgamation due to positive trends of social media became a heaven for many. Diversified learning with content creators education world. The "GFX-mentor" of Pakistan educating world on graphics. The Amazon covering A to Z of world and products back skilled IT professionals with courses available free. The recent Elon musk space X satellites initiative covering the complete world with internet can be a wonder. Such game and platforms to learn and showcase talent was a dream in past.

The world is providing stage for talent showcasing, talent hunt and

Learning. The contents viraled by dependes on social media with positive messages and services teach many. The growth in western world with problems identified by research of content creators and analyst produce mirage of solutions to problems around w. Leading to better comparison, analysis and performance. The shark tank of India raised the morale of new entrepreneurs in India. Experience sharing and motivational speeches of leaders guide them well. Free learning platforms like fever backed India with IT exports of 5 bn \$ — Report by IT department of Pakistan. The earning in dollars by multiple pakistani IT houses back economy. There are about 5 lac plus IT companies as per Umar Saif — IT head in Pakistan. This trains youth better.

Modern professions like content creating, data analytics, block chain learning gave rise to skills acquiring youth. This a new generation is able to learn and earn from home from world class professionals and get hired without even a degree. The recent rewards advertised by Google and jobs for IT experts required no degrees but skills. MIT offered multiple social media courses free in COVID. Monetization and upsurge

of content creators, vloggers and media industry with youtube web channel of Pakistan like "Green" is positive.

However there are unmatched psychological and social stress that is mainly due to this social media trends. The privacy is an asset which is breached much. The recent audiotape in Supreme Court and content shared on social media destroyed multiple families. There are increased suicidal case in world - WHO. 4 lac people ^{did} suicide in last year in America. This impactful atrocity and deceitful glamour made humans uncontented and never happy.

The freedom garbed the real purpose of moral and meaningful life. The flexible working hours badly disturbed work-life balance. The recent Japanese law of forceful holidays and incentivizing people to enjoy life with families is an odd example. People feel like they lack much due to following multiple people with no real understanding of fake and real. The e-commerce lusted much by fake advertisement. The working hours are wasted perfectly with techniques to deceive employer and do personal work.

The world stage became an epitome of deceit and exploitation.

Getting rich and popular in a night is the purpose of life of many. The tech-giants and multinationals ready to exploit masses with fake and catchy advertisements. The skills are sold by people having no skills at all. The recent group of discord with signals of blockchain made youth loose hard earned money of their parents. The internet skills are never permanent with booming technology and world ready ^{and} hungry to replace you as soon as they get cheaper skilled labour.

Modern professions like vlogging and content creation on social media lacks moral sense. People getting famous by exposing their families and daily matters with masses learning skills like that are good for nothing. The misinformation and cyber crimes - skills used and learnt for such purposes are increasing. The content creation with no check and balance or without guide made youth lethargic with no aim in life. They are waiting for a boom instead of small steps. The families are disturbed and social circle widened with no emotional attachment. The humans are becoming machines and avarice for skills attainment to earn more and more is good for nothing.

The advantages and skillset improvement however outpace the negativities of social media. The bridled and directional use under mentors can prove good. The new skills offered by giants like Amazon, MIT, Google and many more can be learnt and implemented efficiently for personal and societal growth.

The western concept of E-learning and technical schools are good case studies. Finland education with targeted skillset. Huawei Company model with higher intake of interns to produce skillful experts are examples. In Pakistan stands at 63rd in University-Industry linkage index. Such link can be improved by it.

New freedom can provide miracles. Without any location and time bound a person can outperform many if focused. Using modern platforms for content learning, creation, academia help and finding solutions to problems around us can provide us skillful youth. Pakistan leads in youthful population with median age of 23. as per population bureau. Utilizing this youth as world leaders can produce gems. The population bulge often used for never saw the two hands but only focused the mouth to feed. Utilize those hands to lead world. Encourage, train and

Give directional subsidies for talented youth in order to uphold our glorious history back again.

The South Asians — specially the Indian people are skilful. They are always exploited for that — (Indus saga book). Making the generation learn these skills and guidance can utilize and encourage them to perform for our country and end menace of this brain drain. Diversifying the opportunities with free internet access to all and scholarships and E-programme for distant learning is the need of the hour. The public private school gap must end to ensure no disparity in courses and learning so that this gap may end.

Proper mass education and open discussion and education on usage of media is a must. The teachers must guide and end curiosity instead. The self learning is harmful. Guidance of parents and teachers is better than an internet search. Better moral standards and glamorizing the true talent can make youth learn the real skills needed for their betterment. The fame of no morals is worst than an respectable skill to earn. Such guides are to be taught to ensure a positive direction.

Adherence to the moral and religious roots of our elders. An ambitious welfare and success in next world is a target. Learning skills with such strong pillar of religion and parental guide can help us this generation to attain success that is real and praiseworthy. Skills are must and the opportunities are much. The selection of the right one is a game of success.

In-short, world is full of opportunities. The social media give a bigger share of it. The right way is to learn from mistakes. The Chinese are leading example of it. They not only rule the world but also educate their masses with skills needed to be an expert.

Their practice model of focused learning and guidance with censored media to bridle youth in right direction created better results. The focused approach, by learning from the right mentor. The difference between gradual success and one-night glamour must be educated.

The permanent nature of ideal skills for self and nation development is the aim. The success of 1 is never better than success of many. The skills to give to the society and find solutions of our problems are less taught. Following and creating the right skill is goal instead.
