8- CONCLUSION

The place was Greece - The time was four hundred years prior to Christianity - The bowl of poison was ready - There were people flooding that place - Socrates, the first ever intellectual of recorded history was about to die. He was about to sacrifice his life for wisdom and intellect. And then it happened - Socrates died but his death gave birth to ~~not~~ not only an era of knowledge but a history of intellect - From Socrates to Stephen Hawking and from Aristotle to Machiavelli, history has witnessed plenty of intellectuals contributing something to society - They shaped politics with empiricism and realism; they defined economy by capitalism; ~~and~~ it has shaped human thoughts and emotions by rationalism and romanticism - Be it Muhammad's Islam or ~~Buddha's~~ Gautama's Buddhism, be it Newton's Classics or Einstein's innovations, Intellectuals have always contributed to society positively and strongly - This defines how intellectuals have always played unmatched role in all aspects of society - With their contribution, Society has always gained something.

English Essay

≡ Rewards and punishment are the only effective regulators of human conduct
(Argumentative Discourse)

Essay Outline

1- INTRODUCTION

Rewards and punishment are the only effective regulators of human conduct because of their strong presence in political, economic, social, and philosophical lives of ~~the~~ man - ~~at~~ ~~times~~. The other school of thought believes in the contrary; however, their stance does not seem much convincing.

2- THIS IS HOW REWARDS AND PUNISHMENT ARE THE ONLY EFFECTIVE REGULATORS OF HUMAN CONDUCT ~~IN THE LIVES OF MAN~~

- (a) Rewards and Punishment Affecting the Political Lives of Man
 - (i) Driving force behind ^{formation of} men's political alliances
 - (ii) Inducing rule-following in man
- (b) Economic Arena of Man's Life Getting Affected by Rewards and Punishment
 - (i) By being the backbone of economic philosophy
 - (ii) By urging man to get involved in Capitalism

- (c) Social Lives of Man Getting impacted by Rewards and Punishment System
 - (i) Being the core reason behind the formation of societies
 - (ii) Inducing dopamine desires of being liked by society in man
- (d) Philosophy of Man's life getting its contours from Reward and Punishment
 - (i) Philosophizing Utilitarianism: Man only acts according to his desire of pleasures or fears of punishment
 - (ii) The existence of religion: The concept of heaven and hell

3- REWARDS AND PUNISHMENT ARE NOT THE ONLY EFFECTIVE REGULATORS OF HUMAN CONDUCT : AN OPPOSING YET UNCONVINCING STANCE

- (i) Reason as the opposing conduct of reward and punishment; however, reason, ultimately is driven by rewards and punishment
- (ii) International Relations between friendly Nations; however, International Relations are driven by National Interest
- (iii) Humanity getting together to fight Climate Change and help poor

nations; however, movements ~~against~~^{to} fight
Climate Change are the collective
utilitarianism of humanity-

4- CONCLUSION

~~It~~ was

The place was Greece - The time was four hundred years prior to Christianity - The bowl of poison was ready - There were people flooding that place - Socrates, the first ever intellectual of recorded history was about to die. He was about to sacrifice his life for wisdom and intellect. And then it happened - Socrates died but his death gave birth to ~~not~~ not only an era of knowledge but a history of intellect. From Socrates to Stephen Hawking and from Aristotle to Machiavelli, history has witnessed plenty of intellectuals contributing something to society - They shaped politics with empiricism and realism; they defined economy by capitalism; ~~and~~ it has shaped human thoughts and emotions by rationalism and romanticism - Be it Muhammad's Islam or ~~Buddha's~~ Gautama's Buddhism be it Newton's classics or Einstein's innovations. Intellectuals have always contributed to society positively and strongly. This defines how intellectuals have always played unmatched role in all aspects of society. With their contribution, society has always gained something.

drives is the principle of pain avoidance and pleasure seeking, ultimately - henceforth, rewards and punishment are the only effective regulations of human conduct because of their influence in ~~a~~ nearly all described ambits of a man's life in such a positive and strong way that cannot be antethesized -
