

CRIMINOLOGY

MOCK-8

Subjective part-II

QNO3

How does Albert Bandura's social learning theory explain the process by which individuals acquire and exhibit criminal behaviour?

Outline

1. Definition

2. Overview

3. Observation, Imitation, Modeling

4. Behavior Factors

5. Personal Factors

6. Attention, Retention, Reproduction and

7. Motivation- (SLT Process Modeling)

8. Conclusion

1. Definition:-

Social learning theory emphasizes the importance of environment and the surroundings of the people to adapt particular

behaviour:- This theory suggest that specific crime attitude or criminal behaviour is learned from the attitude of others-

Example:- A children is upbringing in the environment where he witness criminals and crimes all the times, the possibility that child will become criminal is present-

2- Overview:-

Humans are adaptive to change. When they acquire the environment where crimes are criminal world is growing. They tends to become criminal

Reinforcement and Punishment-

Reinforcement and punishment are two major attributes for a person to become criminal. Because Car theft, burglary, Robbery gives intimate pleasure and excitement. Therefore Occasional

Criminals becomes Professional
criminals- Same goes with
punishment- When People thinks
the repercussions of doing
wrong- They feel that they
will loose their Reputation
in society. Therefore they
do not commit crime.

3- Behaviour Factors-

Behaviour works as Stimulus-
And than person receive the
effects as a receptor- Because
behaviour of People in society
makes a difference. When a
society involves in wrongdoings,
crimes everywhere becomes normal,
how can someone protect himself
from the effects coming from
that Society. People learn
criminal behaviour from their
peers, Parents, neighbourhood
and through Films, TVs.

4- Observation:- Observation is something
People learns by noticing
the acts of others.

Imitation:-

Action of using someone or something as model.

Modeling:-

Modeling is the implementation of the learned behaviour to do crime whatsoever.

6- Attention:- People pay attention and develops interests in the particular criminal behaviour or acts.

Retention:- The learned criminal behaviour gains retention in the individual. And then they tend to apply it through various means.

Reproduction:- It means the repetition of particular criminal behaviour due to reinforcement or sense of joy.

Conclusion:- Crime is the learned behaviour. It is important to create conducive learning environment not criminal one.

Q. No 8

(a) Green Collar Crime :-

The crime against the environment -
