Social media is considered as one of the major aspects of living a prosperous and advanced life.

Our new generation is undoubtedly learning unprecedented skills from social media. As they are improving language skills by making friends from versatile countries, fostering communication and collaborations, by watching online videos to improve writing skills by using technology, along with that they are <sup>learning</sup> marketing strategies and improving their reading skills by using social apps through social media.

Therefore, learning unprecedented skills from social media is impacting our new generation in number of ways, such as new generation is becoming more competent in its fields, their mind is getting sharper, they are able to build networks, they are learning informal languages. and somehow, their cognitive ability of thinking is enhancing.

By using social media our new generation is vastly improving their language skills. There are certain apps like Global pen friends where our new generation can make new friends from different countries all over the world, and they can practice languages with native speakers. Not only this, but we also have apps like Cambly and Speakler where thousands of students are learning and improving their English speaking.

skills in a best way possible. Thus, we can conclude that our new generation is wonderfully improving their speaking skills by using social media and its latest apps.

Moreover, social media is communication and collaboration.

Moreover, our new generation is learning the skill of fostering communication and collaboration from social media as it is online learning the great advantage of using social media is that they greatly facilitate communication and collaboration among learners. With platforms that allow file sharing, chatting, video conferencing and more. Thus, we can say that social media is a good tool through our new generation is learning communication and collaboration skill.

another part is our new generation is learning skills by watching videos on social media. Every person is able to learn about their respective field by using and watching videos on social media. Such as majority of population uses youtube as a source of learning. Doctors, Engineers, chefs, developers, marketers etc. All are finding youtube videos helpful and learning and improving skills from it.

Not only this, but our new generation is improving and learning writing skills by using social media.

Through social media people got aware of AI (Artificial Intelligence) now thousands of individuals are creating and producing quality content by using AI tools. They are able to secure their jobs as well. Content writers are highly taking benefits of using AI.

Many of individuals are also learning the skill of marketing by using social media. Apps like Amazon, are a biggest source for such skills. People are able to buy and sell products, gaining clients and enhancing their marketing strategies by making connection with international and national clients. Hence, we can say that our new generation is able to learn marketing strategies by using social media.

Furthermore, our new generation is learning the skill of reading by using social media. We have apps like Wattpad, ~~we~~ webnovel and FicFun by using these apps our new generation is learning the art of reading, writing and imagination. As these apps contain a number of fiction, non fiction, thriller, & comic stories for teen and adults. Thus, it is

evident that our new generation is learning unprecedented reading skills by using social media.

Along with some benefits, we have seen that impacts our new generation having of unprecedented skills from social media. As our new generation is becoming more competent in its fields. By using different apps and new tools our new generation is becoming competent in its fields.

Moreover, if we talk about the mental abilities then our new generation's mind is getting sharper, and it's one of the finest impacts of social media on our new generation.

Our new generation is able to build network. How it's possible for a person living in Asia to be taking online course organized by a university in the United States? With social media

enhancing the capabilities of online learning anything is possible. Ample of students are able to build a strong network which is a skill in itself. A lot of individuals are mastering by using social media.

However, our new generation is also turning lethargic by using social media, which we can say is having a negative impact on our new generation. Somehow they are becoming less productive in process as well.

Furthermore, ample of individuals are getting an exposure of informal learning language. As a lot of people are getting familiar with slangs in English language in particular which is creating and impacting our new generation's personality.

In addition, the cognitive ability of thinking and perceiving world is also developing in our new generation by using social media. As they are able to improve their critical thinking skills by writing, reading and speaking by using different apps like Wattpad, Cambly, Speakster etc.

In a nutshell, social media is indeed has proven a means of living a prosperous life as it helps our new generation in learning unprecedented skills such as making friends from different countries, fostering communication and collaboration, watching online videos to improving reading, writing and speaking skills, it has become a great means of skill learning.
