## Question #02:

### Title: Nature of international law

Just as individual law is regulated through certain social values, the state conduct is regulated by a legal framework called as international law. The nature of international law is debatable. Some regards it as a legal or others as a sovereign. Being devoid of any social context, international law is misinterpreted by legal practitioners as they believe that international law lacks formal boundaries. Other proponents view it as something that compromises the sovereignty of the state. For this, a state can either be a sovereign or governed by international law. Both cannot be operated simultaneously. Theory of consent argues that a state regulated by international law is sovereign. The world court opines that the ability of a state to fix this, some regards it a bogus idea, other treats it a plain code. Neither view can interpret it completely.
