

Qno 2.

COMPLEX NATURE OF INTERNATIONAL LAW.

The norms governing the behaviour of states are embodied in international law. As international law operates without social consensus and central authority, that's why it lacks in imposing effective sanctions on any state. So, international law is not above all laws but a part of law of any state. Due to which some professional lawyers argue about its legal character. If the states follow the rules that are binding them then these states are not truly sovereign states.

Furthermore, the Theory of Consent explains about international legal norms that are founded upon their acceptance by states that can be explicit or implied. All in all, there are multiple views on the nature of international laws and none of them do full justice with them.

Passage words: 360

Given words: 124

Ali has a clear view of the city as he is at the top of the tree.

Q no 7.

TRANSLATION:

The rise and fall are the stories of every nation, but for this a sense of consciousness and national unity is important. After the second world war, Japan faced a tough test; the devastation of the atomic bomb had already razed two cities. However, for the Japanese, a more significant ordeal was the humiliating treatment by General MacArthur, who had adopted a derogatory attitude towards the emperor. Despite this, Japan turned the tables by demonstrating resilience in the battlefield. In a few short decades, the nation successfully regained its lost position. This story holds a significant lesson for Pakistan.
