

QUESTION NO 2

Title: Sovereignty of State vs International Law.

There are two types of law such as domestic and international law. The behaviour of an individual is defined in terms of domestic law. The behaviour of state is defined in terms of international law. Both the laws are different in the nature. The international laws lack the social agreement and central authority. The international law is not superior from the state. Due to this nature, the lawyers of the legal system of international law argued that the international law lacked effectiveness. A sovereign state does not oblige to international law. According to a theory of consent, a binding decision of international law is that when both international legal norms is accepted or rejected by the state. But, if a state is in the condition that it undertakes to perform any action according to treaty is an act of abandonment of sovereignty. This statement was written in the Wimbledon case. The international law is based upon on the toughest and strongest rules. Nobody can do justice with the true nature of international law and the limitation of sovereignty of state.

QUESTION NO: 3

1,

'Ad hominem' means to divert the attention of someone from important issue to anything which is not important. Lincoln uses the ^{non-}malicious tactics of ad-hominem.
