

English Preci - Test - 2

Translation :

Any type of noise that creates disturbance in man's life is called noise pollution. If this pollution is left without resolve, it can badly damage the human and animals' body and mind. Noise pollution is one of the big causes of pain, complexity and distress in Pakistan. It has reached an dangerous level in commercial areas and big cities. For example, according to a survey of environmental protection agency level of noise has reached 91Db in Punjab but its ^{desirable level} ~~maximum~~ ^{maximum} ~~max~~ would be 75Db. Its means that mental and physical health of many people are at on risk.

Naturally ~~had~~ man has hopeful nature and always connects with this.

A strange scene of hope and its connection of man in the nature of man has exist. If he has lost one hope, he ~~grasp~~ hold another. When it also

he hold another. So the process
of is continued until his death
If this process of hope did
not exist in the man's nature
he dies with end of first
hope and he dies in disappointment
