Question #3

Albert Bandura's social Learning Theory:

Introduction

Albert Bandura was a criminologist, lawyer ~~and~~ a ~~great~~ philosopher ~~as well~~. He introduced the Social Learning theory which explains the process by which individuals acquire and exhibit criminal behaviours. He explained the concept of criminal behaviour that turns a person towards the crime. He further elaborates the concept of crime for individuals that how an individual learns crime by his or her social environment. He described the features of criminal areas, like dense populated areas, lower class houses with upper class societies, where foreigners ~~are~~ stayed. Similarly, he further explains the behavior of criminal who are ready to do the crime as well.

this is general discussion
not a concrete explanation

Bandura's Social Learning Theory:

Albert Bandura's social learning theory defines the social means that facilitate or give ~~from~~ ^{the} ~~or~~ ^{her} a Straight path to do a crime. These are given below:

Crime in dense populated areas:

Most of the criminals are found in the dense populated areas where people are resident with lower income according to inflation. Like "Kachi Abadi in Islamabad" or "Afghan Basti in Peshawar" or many other places.

Lower class houses with highly expensive society:

Many of the crime experienced, when there is a society of upper class will parallel to a "Jobber Pati" or "Katchi Abadi" or "Afghan Basti". In this kind of situation criminal go to the upper houses when they find a suitable chance, they do the crime and

how do they learn it????
this is asked in the question

DATE: ___/___/___

backed to their houses easily.

Crime increases due to bad neighbours:

If the crime is done by the individual, then he or she are not by birth in favor of crime. But there are certain friends or neighbours who forced him to join criminal societies.

No guard is a chance for a criminal:

As a criminal is always tried to do a crime, when he found a suitable place like an ~~owner~~ owner is not at the home or all the family members are out of the town. Then, a criminal supposed it as a suitable time to do a crime. Majority of cases in a days reported due to some practice of theft done by criminal in this manner.

DATE: ___/___/___

Crimes are committed where foreign citizens have stayed:

Majority of crimes are committed by the persons who are not local to that particular place. They are mainly comes from other district and after doing crime, they returned back to their respective towns. Due to the reason, they are unknown for the majority of public due to their this outsider edge they do crime for their free will.

Crime done by a social chance:

Many of time an individual committed a crime for his free will. Due to dense popularity, due to foreign in the home or due to negative social pressure pursue a person towards the darkness of crime. By all mean social learning theory is determine the factors in the society which played role in crime-

explain the process by which individuals acquire and exhibit criminal behaviour

this is the debate and there is nothing written about it how they learn... not how they do!

incorrect incomplete ans there is no ref of the syllabus 4/20

Conclusion

Albert Bandura's Social Learning Theory explain the factors which are going to be a part of the crime. In which, crimes in dense populated areas, lower class houses with highly expensive society crime increases due to the bad neighbours, no guards is a chance for a criminal, crimes are committed where foreign citizens have stayed. These all are the concepts of social learning theory.
