Q: 1 A- Translation:

Any type of noise that interrupts the life of human beings is called noise pollution. If this pollution is left uncontrolled, it may arise harmful effects on the mental and physical conditions of human beings as well as

4/10

of animals. The noise pollution is one of the biggest causes of pain, anxiety and misery in Pakistan. In urban areas and big cities, the noise pollution has ~~been~~ reached to hazardous limit/intensity. For example, according to Environmental Protection Agency of Punjab, Lahore in Lahore, the intensity of noise pollution has reached to 91 dB. However, the noise intensity is only bearable up to 75 dB. It means that the mental and physical health of human beings have already been deteriorated.

Q I B-

Nature has endowed the human nature with hope and hopelessness. If one hope breaks, another hope starts to develop. Similarly, if second hope deteriorates then third hope arises. So, the the cycle of hope

2/10

continues till the man's last breath. If the nature
has not given man the hope, the man has already ~~set~~
~~been~~ ~~enveloped~~ in hopelessness and he may die due to
the hopelessness.

Q: 2

(i) Either of these three umbrellas suits

me X

(iii) I met him last month ✓

4/10

v - I prefer the fifth act of Shakespeare

the best among all X
