# fluestion no: 06 Impacts of globalization on Rublic administrators Introduction: Globalization, a process of interacting and integrating among the people, companies and governments of different nations, have has gradually toans formed the framework of public administration. It leads to changes in the states and in their governments systems. Various nation states have changed their states functions, political model, economis autlays and others. 1) Globalization: Definition is Organization for Economic Cooperation and Development (OFED) deficed globalization as; "Shift from a world of distinct national economies to global economies in which production is internationally and financial capital flows freely and instantly among countries."

ii) Noam choamsky (Internationally acelained bio-linguistic) explains the terms; "Globalization means international integration in westren doctrinal system and it refers to a specific of intenational integration that has been pursued with paeticular intensely. Being an ideology, and process, globalization has become the dominant political, economic and cultival force in the 24t century and imparted the role of state. a It leads to changes in the role of the state and their governous bystens. 1 It has promoted market value and subsequently diluted the role of the state in the economy. a Economies and States are shifting to the market forces in order to partecipate and compete in the global markets and trade. with the states, witnessing these changes, their admitstrative systems and functions are also being affected. The ways in which the states been affected is described across the following dinension;

## Changing the role of the state: a) most states modeled on the carept of welfare state," globalization affecting changes across this particular role of the state. is new competition states energed that promotes public choice initiative, privatization and deregulation in the eurony. highlights the "market" as the primary factor and not the state; meaning that market is more efficiently providing services to citizens than the state. (iii) Bourdes the citizens will the choice of services based an Remanie capacity, whereas the state provides a camparatively les choice, b) Responsioners of the State: Globalization promotes policies that usually neglet the poor and disadvantaged sections of the society. Developing states and societies significant of disadvantaged people.

by making the state institutions mare reparsive and rewritive to the needs of dits disdovantaged people, a state can effectively fulfill me gap that globalization c) State-market Competition: As a state is the contituent in which the market operates, it can cooperate with the market in B-ways; case of market failures in terms of catalling prices of essentianal commodities. a 9 nstitutionally, state institutions can interene in the market by laying dawn and control of various player in a market. \* Stategically, the state can guide the market through defined streetegic quedelines so that broaders long term objectives of social development can be achieved.

## e) <u>Democratic model</u>:

of globalization, civil society also everyed as a viable force in a state.

Civil-society has gained importance due to its inclusive and pasticipatory citizens, friendly now the states adapted a mon-denseration model.

## f) changes in the Economic Role,

no longer control the currency as the global energy created by arline barring, stock market, and global franchise.

For instance, world beacle organization, dominant sole in influencing the decision making policies of the various states.

## g) Changes in the Political role:

Due to globalization, the political sole of the state changed because of the strengthened interstate relationships and dependance as the other.

States were created sourcegn but their swereignty is challenged by

globalitation due to "prolong" in convertions, contracting exercion and imposition.

#### W Social dimension

Social globalitation has created greater social awarders of Hunan Regults violation, child abuse, and compition.

These challages affect Rubble admitistration and the role of government. The major change in the canfiguration of public private spheres in favor of globalizing the composite sector has changed the locality rive of the government.

## Four challenges may be noted that;

closed model of bureaucray was a closed model, but globalishtea has brught all the states under one big unbrella bureaucray of the state is open to administrative structures of other state.

notion comes into close contact with that of the developed notion and the former is unquestractly berefited.

(170) Reforms in the public administrative authority may inspire administrative authority of other states to follow the reforms the dichotomy between the private and public admistrales satisfactory answer 12/20 Conclusion: though globalization has changed the ways through which a state's social, pulitical and economic hysten interacts with the other yet it also deenparied with certain challenges that patities by are serious don't to the traditional system of Public administration. Question 70:04 NPM and Public Service delivery Introduction: New Riblie Managerent (WPM) is a result-oriented and & market-based approach of promotes efficiency of the State by designeating the resources of

the state and its units. NPM energed against the backdrop of an of civil rights movement disintegration of Swiet Union, and extempted attack on breakray and government. Its approach is managerial modernity in the delivery of public services to modernize the post-industrial bureaucraires. 1) Features and Practices of New Public Management For efficient Public Service delivery: or) Administrators play the role of managers: Management have a role at upper Jevel of organization in NPM. Administrators work and perform duties of managers throughout the organization. (11) Organizational flexibility: NPM helps in creating mare flexibility and inpraes organisational dynamis. Walis get measured through targets and results are opposed to people just been available for work.

#### iii) market-based approach:

Government under NPM's advised to take an artians that from market oriented models in order to attend competitive edge and inprove efficiency. market based approach is troduces complexity and flexibility in government.

#### is Decentralisation of Resources:

plays an important voleni service delivery, therefore all the artivities should be adequate and appropriate. Reophe at lower lavel must be given an opportunity to strategize, implement and narter palicies until experted goals arbivered.

#### , Result-oriented:

NPM promotes result executed networks and processes by nearuring outputs. Organization Structures gats divided into to enhance productivity and introduction of contracts in the public sector to help forter quality and expected behavior fun employees

### vis Responsiveness of government:

NPM promotes responsiveness of any government. It encourages managers to habe sound decisions that cater the needs of the public. For this, organizated needs to be note responsive to the needs that arise from social, economic, and other aspects of society including political and technological empowers.

### vi Quality Service delivery:

NPM is an upgrade to the old network, processes and structure, that elevates ways of doing business for government institutions, public administration and nanagement. Organizations produced more improved products and services with the adoption of new public management.

## viii) Reducing the size of government and changing the note of government:

this refers to rolling back of state meaning that role of the state to be gust that of enables facilitationand typing bring in more of market players. It refers to sterring rather than being rowing. Thereby, efficiently chandizing the narried forces.

2) Pre-requisites for sucress of NPM in developing countries: the swenful implementation of NPM in developing courties. A Having an acceptable of economic growth \* Having experience in how to change the manage and operate in a \* Existence of strong judicial System and to ensure rule of law a State capacity to Pursue smooth transformation fun old administration to new public nonagement. 3) Is NPM relevant in developing Countries: MPM oriented reforms would fail of applied is developing countries like Patistan because of the following Masony is touch to create higher level of corruption
WPM provides greater feedon
to public navages, that used to
together with lover levelope

Supervisean, creating feitale climate for comption. As NPM advocates dramatic change from bureaucray to market approach, there tends to be greater prevalence of corruption.

(ii) Strong resistance to desertalization.

Owing to long history of centalization.

in public sectors, nautaining centralization leads to comption thus hinder application of NPM.

iii Absence of rule of law:

In decloping countries, there is a lack of application of laws related to contract enforcement and managing comption menance, the applicability of 1914 is difficult.

is) Inadequery of infrastructure as well as lack of experience:

Public enterprises in decloping countries are new operated and don't need privatization. So every case should be considered individually arrather the devisors that all public enterprises had be privatized.

Public expertation and government:

Public services in developing countries are not of high quality services, so don't put the government under pressure. ND Concept of one size fits all!" of the institutions to a laver level. Conclusion: Through NPM es an effective model for efficacións exention of public services Haverer in developing coutr'es, Challenges like comption prevalence, attience of me of law, law of shilled labor and expertise and Isvial diversions hinden the ways for efficient exention of polities under NPM model answers are well composed content is good and relevant 12/20 work on time management attempt all 4 questions rest is all good
