## Impact of Poverty on Education

### OUTLINE:

#### 1- Introduction

Thesis statement: Poverty is one of the challenges faced by education system. Poverty causes lack of infrastructure, lack of skilled teachers, unavailability of books and other expenses which effect education system very seriously. Inflation, corruption and poverty are causing lack of oppertunities for students to learn ~~the~~ skills as well as education knowledge.

2- Poverty challenges education system.

3- Causes of poverty:

a- Inequalities in ~~income~~ resource distribution

Not required

~~b- Population growth~~

~~c- unemployment~~

~~d- Lack of access to health care~~

~~e- Lack of government interest~~

#### 4- Effects of poverty on education:

a- Poor sense of discretion in students

b- Limited access to technology

c- Lack of infrastructure

d- Lack of skilled teachers

e- Unavailability of transports for distant schools

f- Lack of parents' support

#### 5- Solutions for poverty to improve education systems:

a- Cash transfer to poor families

b- Ensuring that schools have necessary teachers, resources and infrastructure.

c- Early childhood nutrition programmes

d- Awareness of education to parents

e- <sup>Ensuring</sup> ~~Availability~~ availability of technology for every student

f- ~~By~~ Improving role of government

#### 6- Conclusion.

## Essay

"Without education, it is complete darkness and with education it is light. Education is a matter of life and death ~~for our nation~~ <sup>for Pakistan</sup>. The world is moving so fast that if you do not educate yourselves, you will be not only completely left behind but will be finished up;" (Quaid-e-Azam Muhammad Ali Jinnah) This means that education is an essential part of everyone. But, education system in Pakistan is facing various challenges. One of those challenges is poverty. (According to an American economist) (Lawrence H. Summers) Inequality <sup>in</sup> of resources distribution, population growth, unemployment, and poor health care system are leading poverty in Pakistan which causes inclination <sup>poor</sup> in education system. Lack of resources lessen the self-awareness, self-confidence among children. ~~Less~~ Lack of health care ~~pro~~ causes mentally, physically and emotionally weaknesses

in children to get education. Lack of infrastructure is also a barrier for students to get education. Not every student may have access to technology especially in rural areas and they ~~don't~~ do not get updated knowledge from internet. Most of students cannot afford transportation facilities because of ~~less~~ lower income of their parents.

As parents cannot afford <sup>so much</sup> ↓ expenses,

they do not support their children to get education. Poverty causes ~~less~~ ~~lower~~ lack of skilled teachers because skilled teachers demands more salaries.

In this way students face problems to get education. These problems should be solved under the provision of government by facilitating students and ~~aware~~ awareness <sup>of education among</sup> to ↓ parents. Poverty is one of the challenges faced by education system. Poverty causes lack of infrastructure, lack of skilled teachers, unavailability of books and facilities which ~~causes~~ <sup>affects</sup> education system very seriously.

Poverty is causing lack of opportunities for students to learn skills as well as knowledge.

Education is a gateway to a better future, but for many children in poverty access to quality education is a distant dream. Limited access to quality education can severely limit a child's potential and preserve the cycle of poverty. Lack of facilities leads to poor education system which further inclines the poverty and inflation because of <sup>unskilled</sup> illiterate government and uneducated public. This is how cycle of poverty goes on ~~on~~ on the basis of education. According to American economist, Lawrence H. Summers, The only way ~~to~~ out of poverty is <sup>through</sup> education. This means that education system of every state should be developed and improved.

In Pakistan and other developing countries, resources are not ~~is~~ being distributed equally among public which causes

lack of facilities and opportunities. People do not get opportunities to improve their lifestyle, by getting education, which causes unemployment and poverty. In Pakistan, about 45% of population is uneducated because of decline in resources distribution. Lack of resources and opportunities causes poor sense of self-care among people. Then they start labour work rather than education. Their focus shifts from education towards getting income to meet their basic necessities. This is how poverty is caused by unequal distribution of resources.

Poverty as being a major barrier for students to get education, is because of increase in population. SS

In Pakistan, according to World Bank, poverty has been recorded at ~~37.3%~~ 37.2% as of 2023. In 2019-20, more than 2 million people went below the poverty line in Pakistan. Annual population growth rate in 2022 was about 1.9%. This

inclined population is leading poverty.  
Growth in population causes less availability of facilities for education such as transportation, books, infrastructure and skilled staff in schools. This is how population growth per year becomes the reason of poverty which challenges the education system of Pakistan.
