Q No-1

## Translation

(A)

Any sort of noise that disrupts man's life is called noise pollution. If this pollution is left unbridled without check, it will have severe consequences on body and mind of both men and animals. Noise pollution in Pakistan is one of those problems that cause troubles and pain. This pollution has reached dangerous level in both city areas and in big cities. For instance, according to metrological survey in Punjab, noise pollution has reached 91 db. However, maximum bearable capacity is 75 db. This means that physical and mental health of many people is already at stake.

Nature has made an amazing arrangement <sup>by</sup> ~~by~~ instilling <sup>chain of</sup> hopes in human nature and leading it to hold it. When one chain breaks, he holds another. This continues till his last breath. If this chain of hopes might not have been part of human nature, he would have perished at his first hopelessness. He would have died due to hopelessness.
