⑥ Conclusion

One statement is enough to describe the current behaviour of West: hypocrisy

thy name is West. The Western countries are more developed and have high literacy rates.

They consider themselves the sole speakers of human rights.

However, there are many examples in the past as well as in the present time which depict their statements falsehood.

Moreover, the ongoing war against Palestinians has exposed the hypocrisy of West. They

not only kept a silent mode on genocidal killing of Gazans, but also supported the putative right to self defense of Israel. Not only this they also

curbed the protests, which were held to raise voices for

Stopping the war. Apart from this regulation of social media is also in the hands of the West who reshapes its image through it. All these show that Western countries once regarded themselves as flag-bearers of human rights; however, the current genocidal actions of Israel against Palestinians has exposed their hypocritical face that they only defend to protect the human rights owned by the western people.
