	Topic: Artificial Intelligence can be the	
	Savior of homan race.	-
	OUTLINE	-h
1.	Introduction:	
	thesis statement.	
2.	The rapid development and adoption of	70
	Al in various feilds which is beneficial as	
	well as dreadful.	
3.	Artificial intellègence com be a Savior ay	-e
	human race. (thesix)	-0
a	Enhancing Efficiency and productivity. Not savior,	- a
Ь	Improving health care and medicine. beneats	-
c	Enhancing Education and learning.	e
d	Enhancing Environmental Sustainability	_ Li
e	Power of right decision makings.	-
4	Artificial intellègence connot be a Savior	1
	of human race. (Anti thesis)	
a	Job displacement and economic disruption	-
4	in a real threat that can replace humans.	-
b	At is emotion less, heart less to diagnosis and treatement	-
#	to disruption as medical treath care.	_
# c	Damaging critical thinking Skills in	
4	young generation.	
+ d	It is cruial to critically evaluate the	
	Impact on environmental Systemability.	
- e		
	otherwise it impact the decision making	
e	loopso

Al Powered technologies can optimize energy consumption and recture waste. It problemoning a example contribute to renewable energy systems and environmental monitoring. Ve consider transition in the competete absence of emotions from the competete absence of emotions from a machine material it mare efficient on not paragraph a machine material it is sentence they are able to make the right decisions in a short span of time is to anti-thesis in a short span of times to anti-thesis? In multiple the application of the privary and interaction with technologies. Womies about to the repercussions of an interaction with technologies. Womies about the repercussions of an interaction of the horner beings interactly clearly world. The horner beings interactly create fear at logsing their folias of the control with the horner beings in the property of the world premisely of horners beings. Artificial Integrace in emotion less. The attention which leads to the distription as meetical health care. In the wave at Infected period of human beings. Human beings. Human beings. It is the distription as meetical health care. In the wave at Infected period of human beings in the squirent with the period the lower and belonging resulting and the prival integral to the lower and belonging the same sense in that period the love as belonging ness. Artificial Intelligence can create a minuless new generation. In the even of minuless new generation.	Date 3	
consumption and reature waste of the transming a example contribute to renewable energy systems and environmental monitoring. Vo cohesive transition has beence of emotions from the competence absence of emotions from a marginal at more efficient on not paragraph a machine makes it more efficient on not paragraph in a short spem of time. The best example as this is its usage in houthly care. Antificial Intelligence in privacy and the repercussions of an interaction with technologies. Womies about sold interaction with technologies, womies about to the repercussions of an interaction with technologies, womies about sold displacement, suggested the repercussions of an interaction of the hornor beings to the repercussions of an interaction of the hornor beings. Can expands its boundaries which effects the work premistry of hornor beings. Antificial Integrate of emotion less, heartless which leads to the disruption as medical hearth lave. In the work and integrate of humans beings, they need human support representations of the first politicism of large may be sense this is not laggered by they need human support recover the graph press. In that period the love and belonging ness that the give such love as belonging ness. Artificial Intelligence can create a minutess new generation. In the era of		
Contribute to renewable energy systems and environmental monitoring. To cohesive transition The compelete absence of emotions from a machine makes it more efficient as not paragrae they are able to make the right decisrons in a short span of time. The best example af this is its usage in houlth care. The no transition from thesis to anti-thesis is multifacetal Antificial intelligence to putients. The school of the make to privacy and interaction with technologies. womies about Too displacement, spegunating duck privacy and the sepercossions of an inchast sepaguirinheration of cligital world. The human beings naturely create fear af logsing their job as At Can expands its boundaries which effects the work premitry of human beings. Artificial integerse in emotion less, heartless which leads to the distription as medical health care. In the wave of infected period of humans beings, they need human support, care into the greate and the to give so the love and belonging ness. Artificial intelligence can create a minuless new generation. In the era of		
and environment monitoring. No conesive transmon No conesive transmon No conesive transmon a machine makes it more efficient as not a paragrap a machine makes it more efficient as not a paragrap in a short span of time. The best example at this is its usage in hauth lare. Arrifical intelligence in houth lare. Arrifical intelligence in the privacy and internation with technologies. Womies about the internation of internation with the hornor beings naturely create fear of lossing their job as All can expend this boundaries which effects the work premistry of hornor beings. Arrificial integence in emotion lets, heartless which leads to the disruption as meetical health care. In the lower of Infected pened of humans beings, there is the summent was a meetical health care. In the lower was a love which All didn't able to its logical to the private and belonging as the private and the private and the lower was beings. In that period the love and belonging as the private and logical to the private and private and logical to the private and p	consumption and reduce waste. It No reasoning	ig no example
and environmental monitoring. No conesive transition The compelence absence of emotions from a machine makes it more efficient as not a paragrap a machine makes it more efficient as not a paragrap in a short span of time. The best example at this is its usage in hauth care. Arrifical intelligence in houth care. Arrifical intelligence in the privacy and interaction with technologies. Womies about interaction with technologies. Womies about sobolisplacement. Supequenting data privacy and the repercussions of an inchast especialism technologies. cligital world. The homen beings naturely execute fear of lossing their job as Al Can expends its boundaries which effects the work premistry of homen beings. Artificial integence in emotion less, heartless which leads to the disruption as meetical health care. In the work of infected period of human beings, they need human support care if the disruption love which Al dight able to this integers for our or person immediately along with meeticine but the caush be able to give such love as belonging ness. Artificial Intelligence can creak a mindless new generation. In the era of	Contribute to renewable energy systems	
The compelete absence of emotions such a paragraph of machine makes it more efficient as not a paragraph they are able to make the right decisions in a short span of time. The best example of this is its usage in houth lawre. Artificial Intelligence of the privary and interaction with technologies. Womies about cligital world. The homen beings no treely create fear of lossing their job as All can expends its boundaries which effects the work premistly of homen beings. Artificial integence in emotion less, heartless which leads to the disreption as meetical hearth care. In the lower of infected period of human beings. The formal beings in the following the property of the admitstance of the property of the admitstance of the following and the same love which All didn't world to the following against a filling and the love and belonging ness in the filling on the love or belonging ness to give such love or belonging ness. Artificial Intelligence can creak a mindless new generation. In the era of	and environmental monitoring.	
they are able to make the right decisions in a short spen of time. The best example as this is its usage in hautth lare. Antificial intelligence is anti-thesis: is multifacetal hording upon the Job market; privary, and interaction with technologies. womies about sorbiplacement, Sufegurating data privary and the repercussions of an inchestosystyumenter through digital word. The human beings naturely create fear of lossing their job as Al can expands its boundaries which effects the work premity of human beings. Artificial Integence in emotion less, heartless which leads to the disreption as medical health care. In the wave of Infected period of human beings. Huy need human support, yare if the agument was mallificiation all admit able to trying along with medicine but the love and belongingness to the disreption of the sum of the period the love and belongingness which all medicine but the love and belongingness with medicine but the love and belongingness with medicine but the love as belongingness. Artificial Intelligence can create a mindless must generation. In the era of mindless must generation. In the era of	The composite absence of emotions from	
in a short span of time. The best example af this is its usage in harth care. Antificial intelligence influences: is multifacetal attributed intelligence influences: is multifacetal touching upon the Job market, privary, and interaction with technologies, womies about interaction with technologies working data privary and the repercossions of an inchestosphigumentarthern of cligital world. The human beings naturely event fear of lossing their job is Al can expands its boundaries which effects the work premirry of human beings. Artificial integence in emotion less, heartless which leads to the disreption as medical health care. In the world and infected period of human beings. They need human support is farefit the againent was love which Al didn't able to thought are made sither than love which Al didn't able to the disreption with medicine but the love and belonging ness to give such love or belonging ness. Artificial Intelligence can (reake a mindless new generation. In the era of	it may ellicient all no	ot a paragrpal
in a short span of time the things of this is its usage in habitacere. Artificial Intelligence in the sist is anti-thesis is multi-facetal houching upon the job market, privary, and interaction with technologies, womies about interaction with the human beings naturely claim that would the human beings their job as Al can expands its borrelaries which effects the work premistry of human beings. Artificial integeries in emotion less, heartless which leads to the disreption as medical health care. In the wave of infected penil of humans beings, they need human support, farretting allowing love which Al didn't about to insult layer males sense in that penil the love and belonging ness. In that penil the love and belonging ness. Artificial Intelligence can create a minutess new generation. In the era of	they are able to make the right accessions	
Artificial Integence in habitations is multifacetal Artificial Intelligence in the privacy and interaction with technologies. womies about interaction with technologies. Wo structure? and the repercussions of an inchacteration of the homan beings instructured digital world. The homan beings instructured clarification with the homan beings instructed the work premistry of homan beings. Artificial Integence in emotion less, heartless which leads to the disruption as medical health care. In the wave of infected period of human beings, they need human support, care if the eigenment was malificulty layer male sense in that period the love and belonging and them love which Al didn't able to its publication and sense in the period the love and belongingness can care a person immediately along with medicine but the cash along the love as belonging ness. Artificial Intelligence can creak a minutes new generation. In the era of	in a short com or time the ses sample	6
touching upon the Job market; privary and interaction with technologies. Womies about Interaction with technologies. Womies about Jos clisplacement. Sufegunating dark privary no structure? and the repercussions of an Pretadardish manual cligital world. The human beings naturely create fear of logsing their poto as All can expands its boundaries which effects the work premity of human beings. Artificial integence in emotion less, heartless which leads to the disruption as meetical hearth care. In the wave of Infected period of human beings, they need human support, care if the agument was they need human support, care if the agument was love which Al didn't able to troubling algorithm love which Al didn't able to troubling against in that period the love and belongingness. In that period the love and belongingness with meeticine but III can't be able to give such love as belonging ness. Artificial Intelligence can create a minutess new generation. In the era of	at this is it usage in houth care.

Artificial Intelligence is a machine, a man made machine which needs a Soft wave opgradation for productive uses if the soft wave didn't up grade on time it causes many problems in dairly like. The lapic is not about advantages or disadvantages. Despite as disadvantages there are many actuantages of Artificial Intelligence as a savier of human race. People are writed for their job displacement with AI but they didn't think that with the help of AI they all jet new level of enhancement and Still AI is machines which operated by human all they need in good	only people can help people or make	
Artificial Intelligence is a machine, a man made machine, which reads a Software opgradation for productive uses if the Software didn't opgrade on time It causes many problems in daily life. The topic is not about advantages or disadvantages Despite of disadvantages there are many advantages of Artificial Intelligence as a Savier of human race. People are worried for their job displacement with AI but they didn't think that with the help of AI they all jet new level of enhancement and Still AI is machines which operated by human all they need in good	them inderstand the consequences of	R
Artificial Intelligence is a machine, a man made machine. which needs a Soft ware opgradation for productive uses if the Soft wave didn't up grade on time It causes many problems in daily life. The topic is not about advantages or disadvantages Despite of disadvantages there are many advantages of Artificial Intelligence as a Savier of human race. People are worried for their job displacement with Al but they didn't think that with the help of Al they all jet new level of enhancement and Still Al is machines which operated by human all they need in good		
a man made machine. which needs a Soft wave opgradation for productive uses if the Soft wave didn't up grade on time it causes many problems in dairly life. The topic is not about advantages or disadvantages Despite of disadvantages there are many advantages of Artificial Intelligence as a Savier of human race. People are writed for their job displacement with Al but they didn't think that with the help of Al they all jet new level of enhancement and Still Al is massives which operated by human all they need in good		
if the soft wave didn't upgrade on time It causes many problems in daily life. The topic is not about advantages or disadvantages Despite of disadvantages there are many actuantages of Artificial Intelligence as a Savier of human race. People are writed for their job displacement with AI but they didn't think that with the help of AI they all jet new level of enhancement and Still AI is machines which operated by human all they need in jood		44
life. The topic is not about advantages or disadvantages Daspite of disadvantages there are many advantages of Artificial Intelligence as a Savier of human race. People are writed for their job displacement with Al but they didn't think that with the help of Al they all jet new level of enhancement and Still Al is maddines which operated by human all they need in good	a Soft ware upgradation for productive uses	
Despite of disadvantages or disadvantages Despite of disadvantages there are many advantages of Artificial Intelligence as a Savier of human race. People are worried for their job displacement with Al but they didn't think that with the help of Al they all jet new level of enhancement and Still Al is maddines which operated by human all they need is good	if the software didn't upgrade on time	
Despite of disadvantages there are many advantages of Artificial Intelligence as a Sovier of human race. People are worried for their job displacement with Al but they didn't think that with the help of Al they all jet new level of enhancement and Still Al is marchines which operated by human all they need in good	Pt causes many problems in daily	200
many advantages of Artificial Intelligence as a Savier of human race. People are usrried for their job displacement with Al but they didn't think that With the help of Al they all jet new level of enhancement and Still Al is madeines which operated by human all they need is good	The topic is not about advantages of disadvantages in	
People are worried for their job displacement with Al but they didn't think that with the help of Al they all jet new level of enhancement and Still Al is machines which operated by human all they need is good		TE TE
People are worried for their job displacement with Al but they didn't think that with the help of Al they all jet new level of enhancement and Still Al is marchines which operated by human all they need is good	many advantages of Artificial Intelligence	100
with Al but they didn't think that with the help of Al they all Jet new level of enhancement and Still Al is machines which operated by human all they need is good		
new level of enhancement and Still At in machines which operated by human all they need in good	reople are worried for their job as present	ar
New level of enhancement and Still At in machines which operated by human all they need in good	with the help of Al thousand let

treactor to keep an eye on student
So that they use an Positive way
af that gpt or Artificial Intelligence. Artificial Intelligence can help (s) to save energy and utilized it in proper way. At also helped is to make renewable energy resourses. metal bodies have more resistant and agrent ability to endure the space and hostile environment. they can perform defferent tak at same time they didn't get tired like homans. and they give humans a chance to utilize themselve in an Importat task. In a nutshall , necessity in the mother of all innovations. So is the case with Al and robotics will improve the way we think, the way we explore No structure new horizons, whether space or the happen so tapidly that we will see major Charpes and Innovations.
